GIPS Disclosure

The Global Growth Composite created on January 1, 2015 contains fully discretionary global growth accounts that are not managed within a wrap fee structure and for comparison purposes is measured against MSCI ACWI. Prior to October 18, 2016, the benchmark for the Global Growth Composite was the MSCI ACWI variant with gross dividends. As of October 18, 2016, the benchmark was changed to the MSCI ACWI variant with net dividends, to more accurately reflect the Global Growth Composite's strategy. Polen Capital invests exclusively in a portfolio of high-quality liquid companies.

Polen Capital Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Polen Capital Management has been independently verified by Ashland Partners & Company LLP for the periods April 1, 1992 through December 31, 2015. The verification is available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Polen Capital Management is an independent registered investment adviser. The firm maintains a complete list and description of composites, which is available upon request. In July 2007, the firm was reorganized from an S-corporation into an LLC and changed names from Polen Capital Management, Inc. to Polen Capital Management, LLC.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using actual management fees. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The management fee schedule is as follows:

Institutional: Per annum fees for managing accounts are 85 basis points (0.85%) on the first \$50 Million and 65 basis points (0.65%) on all assets above \$50 Million of assets under management. *HNW:* Per annum fees for managing accounts are 150 basis points (1.5%) of the first \$500,000 of assets under management and 100 basis points (1.0%) of amounts above \$500,000 of assets under management. Actual investment advisory fees incurred by clients may vary.

Past performance does not guarantee future results and future accuracy and profitable results cannot be guaranteed. Performance figures are presented gross and net of management fees and have been calculated after the deduction of all transaction costs and commissions. Polen Capital is an SEC registered investment advisor and its investment advisory fees are described in its Form ADV Part 2A. The advisory fees will reduce clients' returns. The chart below depicts the effect of a 1% management fee on the growth of one dollar over a 10 year period at 10% (9% after fees) and 20% (19% after fees) assumed rates of return.

The MSCI ACWI Index is a market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world. The MSCI ACWI is maintained by Morgan Stanley Capital International, and is comprised of stocks from both developed and emerging markets.
