What Are the Risks and What Could I Get in Return?

Risk Indicator

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Main risks include: **concentration risk, counterparty risk, currency risk, liquidity risk, market risk, operational risk, redemption risk, sector risk, and securities risk. Pease refer to the Prospectus and the PRIIPS KID available at www.polencapital.com for further information on risks.**

This information pertains to the USD Institutional Class (ISIN: IE00BYWHB920) and it may differ from other shareclasses.

What Are The Costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:
In the first year you would get back the amount that you invested (0 % annual return)
For the other holding periods we have assumed the product performs as shown in the moderate scenario
USD 10,000 is invested

Costs Over Time	If you exit after 1 year	If you exit after 5 years
Total costs	USD 162	USD 929
Annual cost impact(*)	1.6%	1.6%

(*)This illustrates how costs reduce your return each year over the holding period.
