## Morningstar<sup>1</sup>

Morningstar Sustainability Rating™ out of 1,782 Global Emerging Markets Equity funds as of 28-02-25. Based on 95% of AUM. Data is based on long positions only.

Polen Capital compensates Morningstar with a subscription fee that enables Polen Capital to access the Morningstar database; however, Polen Capital does not specifically pay Morningstar to obtain rankings.

\*Effective 24 January, 2025, the Polen Capital Emerging Markets ex-China Growth Fund has been renamed the Polen Capital Emerging Markets Growth Fund. The investment strategy was updated to include exposure to Chinese companies as part of its investment universe. In line with this update, the Fund's benchmark has been changed from the MSCI Emerging Markets ex-China Index to the MSCI Emerging Markets Index, as we believe this better reflects the Fund's new investment approach and opportunity set. These updates aim to broaden the Fund's emerging markets investment opportunity set while maintaining its commitment to investing in high-quality, growth-oriented companies. For additional details, please refer to the Fund's updated prospectus.

For full details please refer to the Pre-Contractual Annex available on the Global Distributor [website](#) and the Polen Capital Sustainable Investing Policy [Statement](#). **The decision of the investor to invest in the promoted fund should consider all the characteristics or objectives of the fund.** There is no guarantee that sustainable investing considerations will enhance a fund's investment strategy or performance.

An investment in the Fund concerns the acquisition of shares in the Fund and not in any underlying asset of the Fund. As a result, shares held in the Fund do not confer any interest or share in any particular part of the assets of the Fund. The value of the investment in the Fund can reduce as well as increase and, therefore, the return on the investment in the Fund will be variable. Income may fluctuate in accordance with market conditions and taxation arrangements.

## What Are the Risks and What Could I Get in Return?

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Main risks include: **concentration risk, counterparty risk, currency risk, liquidity risk, market risk, operational risk, redemption risk, sector risk, and securities risk.** Please refer to the [Prospectus](#) and the [PRIIPS KID](#) available at [www.polencapital.com](http://www.polencapital.com) for further information on risks.

This information pertains to the USD Institutional Class (ISIN: IE0002R6ZAT2) and it may differ from other shareclasses.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

## What are the performance scenarios?

For more information of the different performance scenarios of the sub-fund in unfavourable, moderate, and favourable scenarios over the last 5 years, please refer to the [PRIIPs KID](#).

Please see our Global [website](#) for more information.

Costs Over Time	If you exit after 1 year	If you exit after 5 years
Total costs	USD 145	USD 892
Annual cost impact(*)	1.45%	1.50%

(\*)This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5.13% before costs and 3.62% after costs. **There are no Entry/Exist costs or Performance fees for this fund. Recommended Holding Period: 5 years**

The costs information in this slide may not be exhaustive and the Fund may incur other expenses. For further information on costs, charges and other expenses, please refer to the Prospectus and the PRIIPs KID available at [www.polencapital.com](http://www.polencapital.com).

Composition Costs	One-off costs upon entry or exit
Management, administrative or operational costs	1.20% of the value of your investment per year. This is an estimate based on actual costs over the last year
Transaction costs	0.23% of the value of your investment per year. (This is an estimate. The actual amount will vary depending on how much we buy and sell)

**1Morningstar Sustainability Rating™** is intended to measure how well the issuing companies of the securities within a fund's portfolio holdings are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers. The Morningstar Sustainability Rating calculation is a five-step process. First, each fund with at least 67% of assets covered by a company-level ESG Risk Score from Sustainalytics receives a Morningstar Portfolio Sustainability Score. The Morningstar Portfolio Sustainability Score is an asset-weighted average of company-level ESG Risk Scores. The Portfolio Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk. Second, the Historical Sustainability Score is an exponential weighted moving average of the Portfolio Sustainability Scores over the past 12 months. The process rescales the current Portfolio Sustainability Score to reflect the consistency of the scores. The

Historical Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk, on a consistent historical basis. Third, the Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Global Categories in which at least thirty (30) funds receive a Historical Sustainability Score and is determined by each fund's Morningstar Sustainability Rating Score rank within the following distribution: • High (highest 10%) • Above Average (next 22.5%) • Average (next 35%) • Below Average (next 22.5%) and • Low (lowest 10%). Fourth, we apply a 1% rating buffer from the previous month to increase rating stability. This means a fund must move 1% beyond the rating breakpoint to change ratings. Fifth, we adjust downward positive Sustainability Ratings to funds with a high ESG Risk scores.

The logic is as follows: • If Portfolio Sustainability score is above 40, then the fund receives a Low Sustainability Rating • If Portfolio Sustainability score is above 35 and preliminary rating is Average or better, then the fund is downgraded to Below Average • If Portfolio Sustainability score is above 30 and preliminary rating is Above Average, then the fund is downgraded to Average • If Portfolio Sustainability score is below 30, then no adjustment is made. The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe.

Since a Sustainability Rating is assigned to all funds that meet the above criteria, the rating it is not limited to funds with explicit sustainable or responsible investment mandates. Morningstar updates its Sustainability Ratings monthly. The Portfolio Sustainability Score is calculated when Morningstar receives a new portfolio. Then, the Historical Sustainability Score and the Sustainability Rating is calculated one month and six business days after the reported as-of date of the most recent portfolio. As part of the evaluation process, Morningstar uses Sustainalytics' ESG scores from the same month as the portfolio as-of date.

**Risk Considerations:** Risk factors you should consider before investing: The value of investments and any income will fluctuate and investors may not get back the full amount invested. Where the Fund's Investment Manager has expressed views and opinions in this fact sheet, these may change.

The Fund invests in foreign markets which involve risks such as social and political instability, market illiquidity, currency fluctuations and limited regulation. Additionally, investing in emerging market countries may be less liquid and more volatile than securities markets in more developed markets or in companies that are less well-established and substantially smaller. These companies may often experience significant price volatility and potential lack of liquidity due to low trading volume of their securities.

All performance data on this fact sheet are in USD currency. Changes in exchange rates may have an adverse effect on the value, price, or income of the product. Whilst the Company aims to ensure the accuracy of the data contained in the factsheet, it is provided for information purposes only. It should not be relied on as the basis for making an investment decision.

**Operational risk:** management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.

**Counterparty risk:** a counterparty may fail to deliver the proceeds related to the sale of securities by the Fund or in safekeeping of the securities purchased by the Fund.

**Securities risk:** some of the markets or exchanges on which the Fund may invest may go up and down, and the value of your investment may not increase.

**Emerging Markets risk:** countries where investment markets are considered to be less developed. Investments are generally riskier than those in developed markets because they: may not be as well regulated and laws may be less sophisticated, may be more difficult to buy and sell, may have less reliable arrangements for the safekeeping of investments, or may be more exposed to political and taxation uncertainties. The value of the Fund can go up and down more often and by larger amounts than funds that invest in developed countries, especially in the short term.

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time.

All investments involve risks. The risk information in this document is intended to give an idea of the main risks associated with this fund. Any of these risks could negatively impact the value of the fund. Please refer to the Prospectus and KID available at [www.polencapital.com](http://www.polencapital.com) for further information on risks.

Investors should consider the investment objectives, risks and expenses of any investment carefully before investing as described in the Company's Prospectus.
