Returns are presented gross and net of fees and include the reinvestment of all income. During certain periods of the track record, net of fee performance was calculated using actual management fees, while the highest fee was used during others. Beginning, October 31, 2016, net of fee performance is being calculated using highest fee. Prior period net of fee performance was calculated using actual management fees plus fund expenses (where applicable). After July 1, 2025, net of fee performance was calculated using either actual management fees or highest fees for fund structures.

The annual composite dispersion presented is an asset-weighted standard deviation using returns presented gross of management fees calculated for the accounts in the composite the entire year. If 5 or fewer portfolios exist in the composite for the entire year, annual composite dispersion appears as "N/A". Policies for valuing portfolios, calculating investments, and preparing GIPS Reports are available upon request.

The separate account management fee schedule is as follows: Institutional: Per annum fees for managing accounts are 60 basis points (0.60%) on the first \$50 Million and 50 basis points (0.50%) on the balance of assets under management.

Past performance does not guarantee future results and future accuracy and profitable results cannot be guaranteed. Performance figures are presented gross and net of fees and have been calculated after the deduction of all transaction costs and commissions. Portfolio returns are net of all foreign non-reclaimable withholding taxes. Reclaimable withholding taxes are reflected as income if and when received. Polen Capital is an SEC registered investment advisor and its investment advisory fees are described in its Form ADV Part 2A. The advisory fees will reduce clients' returns. The chart below depicts the effect of a 1% management fee on growth of one dollar over a 10 year period at 10% (9% after fees) and 20% (19% after fees) assumed rates of return.
