

POLEN EURO HIGH YIELD BOND ETF

[]

SERIES OF

FUNDVANTAGE TRUST

STATEMENT OF ADDITIONAL INFORMATION

April 14, 2026

This Statement of Additional Information (“SAI”) provides information about the Polen Euro High Yield Bond ETF (the “Fund”). The Fund is a series of FundVantage Trust (the “Trust”).

This SAI is not a prospectus. It should be read in conjunction with the Fund’s current prospectus dated April 14, 2026, as amended or supplemented from time to time (the “Prospectus”). This SAI is incorporated by reference in its entirety into the Prospectus. A copy of the Prospectus, shareholder reports, and financial information and other information, when available, may be obtained without charge, upon request, by writing to the Fund at 500 Ross Street, 154-0520, Pittsburgh, PA 15262, by calling the Fund at (888) 426-7515 or by visiting the Fund’s website at <https://www.polencapital.com/strategies/european-high-yield-etf>.

The Fund’s Principal U.S. Listing Exchange: NYSE Arca, Inc.

GENERAL INFORMATION

The Trust was organized as a Delaware statutory trust on August 28, 2006. The Trust is a series trust authorized to issue separate series or classes of shares of beneficial interest. The Trust has established the Fund as a separate series of the Trust. The Fund offers one class of shares. The Fund is a diversified, open-end management investment companies registered under the Investment Company Act of 1940, as amended (the “1940 Act”). Polen Capital Credit, LLC (“Polen Credit” or the “Adviser”) serves as the investment adviser to the Fund.

INVESTMENT POLICIES

The following supplements the information contained in the Prospectus concerning the investment objective and policies of the Fund. The Fund will invest primarily in fixed- and floating-rate high yield fixed income securities (commonly referred to as “junk bonds”). Under normal circumstances, the Fund invests at least 80% of its net assets in below-investment grade bonds denominated in euros. The Fund will not invest more than 10% of its assets in bonds issued by European governments or more than 10% of its assets in unrated bonds. These policies may be changed by the Board of Trustees without shareholder approval upon 60 days’ notice to shareholders.

The information below does not describe every type of investment, technique or risk to which the Fund may be exposed. Much of the information contained in this SAI expands on subjects discussed in the Fund’s prospectus. No investment in the shares of the Fund should be made before reading the Prospectus.

BANK OBLIGATIONS. Bank obligations in which the Fund may invest include certificates of deposit, bankers’ acceptances and fixed time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers’ acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are “accepted” by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits. The Fund will not invest in fixed time deposits which (1) are not subject to prepayment or (2) provide for withdrawal penalties upon prepayment (other than overnight deposits) if, in the aggregate, more than 15% of its net assets would be invested in such deposits, repurchase agreements maturing in more than seven days and other illiquid assets.

Obligations of foreign banks involve somewhat different investment risks than those affecting obligations of United States banks, including the possibilities that their liquidity could be impaired because of future political and economic developments, that their obligations may be less marketable than comparable obligations of United States banks, that a foreign jurisdiction might impose withholding taxes on interest income payable on those obligations, that foreign deposits may be seized or nationalized, that foreign governmental restrictions such as exchange controls may be adopted which might adversely affect the payment of principal and interest on those obligations and that the selection of those obligations may be more difficult because there may be less publicly available information concerning foreign banks or the accounting, auditing and financial reporting standards, practices and requirements applicable to foreign banks may differ from those applicable to United States banks. Foreign banks are not generally subject to examination by any U.S. Government agency or instrumentality.

- **BANKERS’ ACCEPTANCES.** Bankers’ acceptances are credit instruments evidencing the obligation of a bank to pay a draft that has been drawn on it by a customer. These instruments reflect the obligation of both the bank and the drawer to pay the face amount of the instrument upon maturity.
- **CERTIFICATES OF DEPOSIT.** Certificates of deposit are certificates evidencing the indebtedness of a commercial bank to repay funds deposited with it for a definite period of time (usually from 14 days to one year) at a stated or variable interest rate. Variable rate certificates of deposit provide that the interest rate will fluctuate on designated dates based on changes in a designated base rate (such as the composite rate for certificates of deposit established by the Federal Reserve Bank of New York).

- **TIME DEPOSITS.** Time deposits are bank deposits for fixed periods of time. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which may vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits.

BANKRUPTCY AND RESTRUCTURING RISK. The Fund may acquire or hold securities and other obligations of issuers that are in financial difficulty, and/or may be in, entering, or emerging from, bankruptcy proceedings. Bankruptcy or other insolvency proceedings are highly complex and may result in unpredictable outcomes. In any investment opportunity involving work-outs, liquidations, spin-offs, reorganizations, bankruptcies and similar transactions, there exists the risk that the contemplated transaction may be unsuccessful. Similarly, if an anticipated transaction does not in fact occur, a Fund may be required to sell the investment at a loss. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. Because there is a substantial uncertainty concerning the outcome of transactions involving financially troubled companies in which a Fund may invest, there is a potential risk of loss of the entire investment in such companies, as well as the risk that a Fund may be required to accept cash or new securities with a value less than a Fund's original investment and/or may be required to accept payment over an extended period of time. Under such circumstances, the returns generated from a Fund's investments may not compensate it adequately for the risks assumed.

BELOW-INVESTMENT GRADE SECURITIES. Subject to the limitations set forth in the Prospectus, the Fund may invest in "below-investment grade" or "high yield" fixed income securities (commonly known to investors as "high yield bonds" or "junk bonds"). High yield bonds are issued by a company whose credit rating (based on an NRSRO) evaluation of the likelihood of repayment necessitates offering a higher coupon and yield on its issues when selling them to investors who may otherwise be hesitant in purchasing the debt of such a company. While generally providing greater income and opportunity for gain, below-investment grade debt securities are generally subject to greater risks than fixed income securities which have higher credit ratings, including a higher risk of default, and their yields will fluctuate over time. High yield bonds generally will be in the lower rating categories of NRSROs (rated "Ba1 / BB+" or lower by Moody's or "BB" or lower by S&P and Fitch or will be unrated. The credit rating of a high yield bond does not necessarily address its market value risk, and ratings may from time to time change, positively or negatively, to reflect developments regarding the issuer's financial condition. High yield bonds are considered to be speculative with respect to the capacity of the issuer to timely repay principal and pay interest or dividends in accordance with the terms of the obligation and may have more credit risk than higher rated securities.

While the market values of high yield bonds tend to react less to fluctuations in interest rates than do those of higher rated securities, the values of high yield bonds often reflect individual corporate developments and have a high sensitivity to economic changes to a greater extent than do higher rated securities. Issuers of high yield bonds are often in the growth stage of their development and/or involved in a reorganization or takeover. The companies are often highly leveraged (have a significant amount of debt relative to shareholders' equity) and may not have available to them more traditional financing methods, thereby increasing the risk associated with acquiring these types of securities. In some cases, obligations with respect to high yield bonds are subordinated to the prior repayment of senior indebtedness, which will potentially limit the Fund's ability to fully recover principal or to receive interest payments when senior securities are in default. Thus, investors in high yield bonds have a lower degree of protection with respect to principal and interest payments than do investors in higher rated securities.

During an economic downturn, a substantial period of rising interest rates or a recession, highly leveraged issuers of high yield bonds may experience financial distress possibly resulting in insufficient revenues to meet their principal and interest payment obligations, to meet projected business goals and to obtain additional financing. An economic downturn could also disrupt the market for lower-rated securities and adversely affect the value of outstanding securities, the Fund's net asset value ("NAV") and the ability of the issuers to repay principal and interest. If the issuer of a security held by the Fund has defaulted, the Fund may not receive full interest and principal payments due to it and could incur additional expenses if it chose to seek recovery of its investment.

The secondary markets for high yield bonds are not as liquid as the secondary markets for higher rated securities. The secondary markets for high yield bonds are concentrated in relatively few market makers and participants in the markets are mostly institutional investors, including insurance companies, banks, other financial institutions and

mutual funds. In addition, the trading volume for high yield bonds is generally lower than that for higher rated securities and the secondary markets could contract under adverse market or economic conditions independent of any specific adverse changes in the condition of a particular issuer. Under certain economic and/or market conditions, the Fund may have difficulty disposing of certain high yield bonds due to the limited number of investors in that sector of the market. An illiquid secondary market may adversely affect the market price of the high yield security, which may result in increased difficulty selling the particular issue and obtaining accurate market quotations on the issue when valuing the Fund's assets. Market quotations on high yield bonds are available only from a limited number of dealers, and such quotations may not be the actual prices available for a purchase or sale.

The high yield markets may react strongly to adverse news about an issuer or the economy, or to the perception or expectation of adverse news, whether or not it is based on fundamental analysis. Additionally, prices for high yield bonds may be affected by legislative and regulatory developments. These developments could adversely affect the Fund's NAV and investment practices, the secondary market for high yield bonds, the financial condition of issuers of these securities and the value and liquidity of outstanding high yield bonds, especially in a thinly traded market. For example, Federal legislation requiring the divestiture by federally insured savings and loan associations of their investments in high yield bonds and limiting the deductibility of interest by certain corporate issuers of high yield bonds adversely affected the market in the past.

When the secondary market for high yield bonds becomes more illiquid, or in the absence of readily available market quotations for such securities, the relative lack of reliable objective data makes it more difficult to value the Fund's securities and judgment plays a more important role in determining such valuations. Increased illiquidity in the junk bond market, in combination with the relative youth and growth of the market for such securities, also may affect the ability of the Fund to dispose of such securities at a desirable price. Additionally, if the secondary markets for high yield bonds contract due to adverse economic conditions or for other reasons, some of the Fund's liquid securities may become illiquid and the proportion of the Fund's assets invested in illiquid securities may significantly increase.

The rating assigned by a rating agency evaluates the safety of a below-investment grade security's principal and interest payments but does not address market value risk. Because such ratings of NRSROs may not always reflect current conditions and events, in addition to using NRSROs and other sources, the Adviser performs its own analysis of the issuers whose below-investment grade securities are held by the Fund. Because of this, the Fund's performance may depend more on the Adviser's own credit analysis than in the case of mutual funds investing in higher-rated securities. For a description of these ratings, see "Appendix A - Description of Securities Ratings."

In selecting below-investment grade securities, the Adviser considers factors such as those relating to the creditworthiness of issuers, the ratings and performance of the securities, the protections afforded the securities and the diversity of the Fund. The Adviser continuously monitors the issuers of below-investment grade securities held by the Fund for their ability to make required principal and interest payments, as well as in an effort to control the liquidity of the Fund so that it can meet redemption requests. If a security's rating is reduced below the minimum credit rating that is permitted for the Fund, the Adviser will consider whether the Fund should continue to hold the security.

In the event that the Fund experiences an unexpected level of net redemptions, the Fund could be forced to sell its holdings without regard to the investment merits, thereby decreasing the assets upon which the Fund's rate of return is based.

The costs attributable to investing in the high yield markets are usually higher for several reasons, such as higher investment research costs and higher commission costs.

BORROWING. The Fund may borrow money to the extent permitted under the 1940 Act, and as interpreted, modified or otherwise permitted by regulatory authority having jurisdiction, from time to time. This means that, in general, the Fund may borrow money from banks for any purpose on a secured basis in an amount up to 33-1/3% of the Fund's total assets. The Fund may also borrow money for temporary administrative purposes on an unsecured basis in an amount not to exceed 5% of the Fund's total assets. The Fund may choose to borrow in order to meet its redemptions.

Specifically, provisions of the 1940 Act require the Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception

for borrowings not in excess of 5% of the Fund's total assets made for temporary administrative purposes. Any borrowings for temporary administrative purposes in excess of 5% of the Fund's total assets must maintain continuous asset coverage. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time.

CASH POSITIONS. A Fund may not always be fully invested. For example, when the Adviser believes that market conditions are unfavorable for profitable investing, or when it is otherwise unable to locate attractive investment opportunities in the high yield market, a Fund's cash or similar investments may increase. In other words, cash or similar investments generally are a residual – they represent the assets that remain after a Fund has committed available assets to desirable investment opportunities. When a Fund's investments in cash or similar investments increase, they may not participate in market advances to the same extent that they would if the Fund remained more fully invested, and the Fund's ability to achieve its investment objective may be affected.

CASH TRANSACTION RISK. Most ETFs generally make in-kind redemptions to avoid being taxed at the fund level on gains on the distributed portfolio securities. However, unlike most ETFs, the Fund currently intends to effect redemptions for cash, rather than in-kind, because of the nature of the Fund's investments. As such, the Fund may be required to sell portfolio securities to obtain the cash needed to distribute redemption proceeds, which may result in cash transaction costs (such as brokerage costs) that are not incurred with in-kind redemptions. The Fund imposes transaction fees to offset all or a part of the costs associated with a cash transaction. To the extent that the transaction fees do not offset the costs associated with a cash transaction, the Fund's performance may be negatively impacted. The Fund may also recognize a capital gain on these sales that might not have been incurred if the Fund had made a redemption in-kind. This may decrease the tax efficiency of the Fund compared to ETFs that utilize in-kind redemption process, and there may be a substantial difference in the after-tax rate of return between the Fund and conventional ETFs.

COMMERCIAL PAPER. The Fund may invest in commercial paper. Commercial paper consists of short-term (up to 270 days) unsecured promissory notes issued by corporations and other entities in order to finance their current operations.

CONVERTIBLE SECURITIES. The Fund may invest in convertible securities, which may offer higher income than the common stocks into which they are convertible. A convertible security is a bond, debenture, note, preferred stock, or other security that entitles the holder to acquire common stock or other equity securities of the same or a different issuer. A convertible security generally entitles the holder to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to non-convertible debt or preferred securities, as applicable. Convertible securities are subordinate in rank to any senior debt obligations of the issuer, and, therefore, an issuer's convertible securities entail more risk than its debt obligations. Convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of the potential for capital appreciation. In addition, convertible securities are often lower-rated securities. Convertible securities rank senior to common stock in a corporation's capital structure and, therefore, generally entail less risk than the corporation's common stock, although the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security.

Because of the conversion feature, the price of the convertible security will normally fluctuate in some proportion to changes in the price of the underlying asset, and as such it is subject to risks relating to the activities of the issuer and/or general market and economic conditions. The income component of a convertible security may tend to cushion the security against declines in the price of the underlying asset. However, the income component of convertible securities causes fluctuations based upon changes in interest rates and the credit quality of the issuer.

If the convertible security's "conversion value," which is the market value of the underlying common stock that would be obtained upon the conversion of the convertible security, is substantially below the "investment value," which is the value of a convertible security viewed without regard to its conversion feature (i.e., strictly on the basis of its yield), the price of the convertible security is governed principally by its investment value. If the conversion value of a convertible security increases to a point that approximates or exceeds its investment value, the value of the security will be principally influenced by its conversion value. A convertible security will sell at a premium over its conversion value to the extent investors place value on the right to acquire the underlying common stock while holding an income-producing security.

A convertible security may be subject to redemption at the option of the issuer at a predetermined price. If a convertible security held by the Fund is called for redemption, the Fund would be required to permit the issuer to redeem the security and convert it to underlying common stock, or would sell the convertible security to a third party, which may have an adverse effect on the Fund's ability to achieve its investment objective. The Fund generally would invest in convertible securities for their favorable price characteristics and total return potential and would normally not exercise an option to convert unless the security is called or conversion is forced.

CORPORATE DEBT SECURITIES. The Fund's investments in U.S. dollar or foreign currency-denominated corporate debt securities of domestic or foreign issuers are limited to corporate debt securities (corporate bonds, debentures, notes and other similar corporate debt instruments, including convertible securities) which meet the minimum ratings criteria set forth for the Fund, or, if unrated, are in the Adviser's opinion comparable in quality to corporate debt securities in which the Fund may invest.

Corporate income producing securities may include forms of preferred or preference stock. The rate of interest on a corporate debt security may be fixed, floating or variable, and may vary inversely with respect to a reference rate. The rate of return or return of principal on some debt obligations may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies. Debt securities may be acquired with warrants attached.

Securities rated Baa and BBB are the lowest which are considered "investment grade" obligations. Moody's Investors Service, Inc. ("Moody's") describes securities rated Baa as "subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics." Standard & Poor's[®] Financial Services LLC ("S&P") describes securities rated BBB as "regarded as having adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation." For securities rated BBB, Fitch Ratings Ltd. ("Fitch") states that "...expectations of default risk are currently low...capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity." For a discussion of securities rated below-investment grade, see "Below-Investment Grade Securities" above.

CYBER SECURITY. The Fund and its service providers are susceptible to operational and information security risks due to cyber security incidents. In general, cyber security incidents can result from deliberate attacks or unintentional events. Cyber security attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber-attacks also may be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make services unavailable to intended users). Cyber security incidents affecting the Adviser, Transfer Agent or Custodian or other service providers such as financial intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by interference with the Fund's ability to calculate its NAV; impediments to trading for the Fund's portfolio; the inability of Fund shareholders to transact business with the Fund; violations of applicable privacy, data security or other laws; regulatory fines and penalties; reputational damage; reimbursement or other compensation or remediation costs; legal fees; or additional compliance costs. Similar adverse consequences could result from cyber security incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions and other parties. While information risk management systems and business continuity plans have been developed which are designed to reduce the risks associated with cyber security, there are inherent limitations in any cyber security risk management systems or business continuity plans, including the possibility that certain risks have not been identified.

DEBT SECURITIES. Debt securities represent money borrowed that obligates the issuer (e.g., a corporation, municipality, government, government agency) to repay the borrowed amount at maturity (when the obligation is due and payable) and usually to pay the holder interest at specific times.

DOLLAR ROLLS. The Fund may enter into dollar roll agreements, which are similar to reverse repurchase agreements. Dollar rolls are transactions in which securities are sold by the Fund for delivery in the current month and the Fund simultaneously contracts to repurchase substantially similar securities on a specified future date. Any difference between the sale price and the purchase price is netted against the interest income foregone on the securities sold to arrive at an implied borrowing rate. Alternatively, the sale and purchase transactions can be executed at the

same price, with the Fund being paid a fee as consideration for entering into the commitment to purchase. Dollar rolls may be renewed prior to cash settlement and initially may involve only a firm commitment agreement by the Fund to buy a security. If the broker-dealer to which the Fund sells the security becomes insolvent, the Fund's right to repurchase the security may be restricted. At the time the Fund enters into a dollar roll, it will place in a segregated custodial account assets such as U.S. Government securities or other liquid, high grade debt securities consistent with the Fund's investment restrictions having a value equal to the repurchase price (including accrued interest) and will subsequently monitor the account to ensure that such equivalent value is maintained.

EXCHANGE-TRADED FUNDS (“ETFs”) AND OTHER INVESTMENT COMPANY SECURITIES. The Fund may invest in shares of other investment companies (each, an “Underlying Fund”), including open-end funds (ETFs and mutual funds), closed-end funds, and unit investment trusts (“UITs”), to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI. By investing in another investment company, the Fund will indirectly bear any asset-based fees and expenses charged by the underlying investment company in which the Fund invest.

Section 12(d)(1) of the 1940 Act generally restricts investments by investment companies, including foreign and unregistered investment companies, in the securities of other investment companies. For example, a registered investment company (the “Acquired Fund”), such as a Fund, may not knowingly sell or otherwise dispose of any security issued by the Acquired Fund to any investment company (the “Acquiring Fund”) or any company or companies controlled by the Acquiring Fund if, immediately after such sale or disposition: (i) more than 3% of the total outstanding voting stock of the Acquired Fund is owned by the Acquiring Fund and any company or companies controlled by the Acquiring Fund, or (ii) more than 10% of the total outstanding voting stock of the Acquired Fund is owned by the Acquiring Fund and other investment companies and companies controlled by them. However, registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth in SEC rules. In order for a registered investment company to invest in shares of a Fund beyond the limitations of Section 12(d)(1) in reliance on Rule 12d1-4 under the 1940 Act, the registered investment company must, among other things, enter into an agreement with the Trust. Foreign investment companies are permitted to invest in a Fund only up to the limits set forth in Section 12(d)(1), subject to any applicable SEC no-action relief.

Set forth below is additional information about the manner in which ETFs generally operate and the risks associated with an investment in ETFs, which are in addition to the risks associated with registered investment companies, generally.

In the event that a Fund purchases shares of ETFs, such purchase is expected to be made through a broker-dealer in a transaction on a securities exchange, and in such a case the Fund will pay customary brokerage commissions for each purchase and sale. Shares of an ETF may also be acquired by depositing a specified portfolio of the ETF's underlying securities, as well as a cash payment generally equal to accumulated dividends of the securities (net of expenses) up to the time of deposit, with the ETF's custodian, in exchange for which the ETF will issue a quantity of new shares sometimes referred to as a “creation unit.” Similarly, shares of an ETF purchased on an exchange may be accumulated until they represent a creation unit, and the creation unit may be redeemed in kind for a portfolio of the underlying securities (based on the ETF's NAV) together with a cash payment generally equal to accumulated dividends as of the date of redemption. The Fund may redeem Creation Units for the underlying securities (and any applicable cash) and may assemble a portfolio of the underlying securities (and any required cash) to purchase Creation Units, if the Adviser believes it is in a Fund's interest to do so. A Fund's ability to redeem Creation Units may be limited by the 1940 Act, which provides that an ETF will not be obligated to redeem shares held by the Fund in an amount exceeding one percent of such ETF's total outstanding securities during any period of less than 30 days.

Termination Risk. There is a risk that ETFs in which the Fund invests may terminate due to extraordinary events. For example, any of the service providers to ETFs, such as the trustee or sponsor, may close or otherwise fail to perform their obligations to the ETF, and the ETF may not be able to find a substitute service provider. Also, the ETFs may be dependent upon licenses to use the various indices as a basis for determining their compositions and/or otherwise to use certain trade names. If these licenses are terminated, ETFs may also terminate or experience a disruption in its activities. In addition, an ETF may terminate if its net assets fall below a certain amount.

Although the Adviser believes that, in the event of the termination of an ETF, the Fund will be able to invest instead in shares of an alternate ETF tracking the same market index or another index covering the same general market, there can be no assurance that shares of an alternate ETF would be available for investment at that time.

FIXED INCOME SECURITIES WITH BUY-BACK FEATURES. Fixed income securities with buy-back features enable the Fund to recover principal upon tendering the securities to the issuer or a third party. Letters of credit issued by domestic or foreign banks often support these buy-back features. In evaluating a foreign bank's credit, the Adviser considers whether adequate public information about the bank is available and whether the bank may be subject to unfavorable political or economic developments, currency controls or other governmental restrictions that could adversely affect the bank's ability to honor its commitment under the letter of credit. Buy-back features include standby commitments, put bonds and demand features.

Standby Commitments. The Fund may acquire standby commitments from broker-dealers, banks or other financial intermediaries to enhance the liquidity of portfolio securities. A standby commitment entitles the Fund to same day settlement at amortized cost plus accrued interest, if any, at the time of exercise. The amount payable by the issuer of the standby commitment during the time that the commitment is exercisable generally approximates the market value of the securities underlying the commitment. Standby commitments are subject to the risk that the issuer of a commitment may not be in a position to pay for the securities at the time that the commitment is exercised.

Ordinarily, the Fund will not transfer a standby commitment to a third party, although the Fund may sell securities subject to a standby commitment at any time. The Fund may purchase standby commitments separate from or in conjunction with the purchase of the securities subject to the commitments. In the latter case, the Fund may pay a higher price for the securities acquired in consideration for the commitment.

Put Bonds. A put bond (also referred to as a tender option or third party bond) is a bond created by coupling an intermediate or long-term fixed rate bond with an agreement giving the holder the option of tendering the bond to receive its par value. As consideration for providing this tender option, the sponsor of the bond (usually a bank, broker-dealer or other financial intermediary) receives periodic fees that equal the difference between the bond's fixed coupon rate and the rate (determined by a remarketing or similar agent) that would cause the bond, coupled with the tender option, to trade at par. By paying the tender offer fees, the Fund in effect holds a demand obligation that bears interest at the prevailing short-term rate. Any investments in tender option bonds by the Fund will be accounted for subject to Financial Accounting Standards Board Statement No. 140 and amendments thereto.

In selecting put bonds for the Fund, the Adviser takes into consideration the creditworthiness of the issuers of the underlying bonds and the creditworthiness of the providers of the tender option features. A sponsor may withdraw the tender option feature if the issuer of the underlying bond defaults on interest or principal payments, the bond's rating is downgraded or, in the case of a municipal bond, the bond loses its tax-exempt status.

Demand Features. Many variable rate securities carry demand features that permit the holder to demand repayment of the principal amount of the underlying securities plus accrued interest, if any, upon a specified number of days' notice to the issuer or its agent. A demand feature may be exercisable at any time or at specified intervals. Variable rate securities with demand features are treated as having a maturity equal to the time remaining before the holder can next demand payment of principal. The issuer of a demand feature instrument may have a corresponding right to prepay the outstanding principal of the instrument plus accrued interest, if any, upon notice comparable to that required for the holder to demand payment.

FOREIGN CURRENCY AND RELATED TRANSACTIONS. The Fund may invest in foreign currency-denominated securities and may purchase and sell foreign currency options and foreign currency futures contracts and related options (see "Derivative Instruments") and may engage in foreign currency transactions either on a spot (cash) basis at the rate prevailing in the currency exchange market at the time or through forward currency contracts ("forwards") with terms generally of less than one year. The Fund may engage in these transactions in order to protect against uncertainty in the level of future foreign exchange rates in the purchase and sale of securities. The Fund may also use foreign currency options and foreign currency forward contracts to increase exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one country to another.

A forward involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts may be bought or sold to protect the Fund against a possible loss resulting from an adverse change in the relationship between foreign currencies and the U.S. dollar or to increase exposure to a particular foreign currency. Although forwards are intended to minimize the risk of loss due to a decline in the value of the hedged currencies, at the same time, they tend to limit any potential gain which might result should the value of such currencies increase.

Forwards will be used primarily to adjust the foreign exchange exposure of the Fund with a view to protecting the outlook, and the Fund might be expected to enter into such contracts under the following circumstances:

- (i) When the Adviser desires to lock in the U.S. dollar price on the purchase or sale of a security denominated in a foreign currency.
- (ii) If a particular currency is expected to decrease against another currency, the Fund may sell the currency expected to decrease and purchase a currency which is expected to increase against the currency sold in an amount approximately equal to some or all of the Fund's portfolio holdings denominated in the currency sold.
- (iii) If the Adviser wants to eliminate substantially all of the risk of owning a particular currency, and/or if the Adviser thinks that the Fund can benefit from price appreciation in a given country's bonds but does not want to hold the currency, it may employ a direct hedge back into the U.S. dollar. In either case, the Fund would enter into a forward contract to sell the currency in which a portfolio security is denominated and purchase U.S. dollars at an exchange rate established at the time it initiated the contract. The cost of the direct hedge transaction may offset most, if not all, of the yield advantage offered by the foreign security, but the Fund would hope to benefit from an increase (if any) in the value of the bond.
- (iv) The Adviser might choose to use a proxy hedge, which may be less costly than a direct hedge. In this case, the Fund, having purchased a security, will sell a currency whose value is believed to be closely linked to the currency in which the security is denominated. Interest rates prevailing in the country whose currency was sold would be expected to be closer to those in the U.S. and lower than those of securities denominated in the currency of the original holding. This type of hedging entails greater risk than a direct hedge because it is dependent on a stable relationship between the two currencies paired as proxies and the relationships can be very unstable at times.

Costs of Hedging. When the Fund purchases a foreign bond with a higher interest rate than is available on U.S. bonds of a similar maturity, the additional yield on the foreign bond could be substantially reduced or lost if the Fund were to enter into a direct hedge by selling the foreign currency and purchasing the U.S. dollar. This is what is known as the "cost" of hedging. Proxy hedging attempts to reduce this cost through an indirect hedge back to the U.S. dollar.

It is important to note that hedging costs are treated as capital transactions and are not, therefore, deducted from the Fund's dividend distribution and are not reflected in its yield. Instead such costs will, over time, be reflected in the Fund's NAV per share.

The forecasting of currency market movement is extremely difficult, and whether any hedging strategy will be successful is highly uncertain. Moreover, it is impossible to forecast with precision the market value of portfolio securities at the expiration of a foreign currency forward contract. Accordingly, the Fund may be required to buy or sell additional currency on the spot market (and bear the expense of such transaction) if the Adviser's predictions regarding the movement of foreign currency or securities markets prove inaccurate. In addition, the use of cross-hedging transactions may involve special risks and may leave the Fund in a less advantageous position than if such a hedge had not been established. Because foreign currency forward contracts are privately negotiated transactions, there can be no assurance that the Fund will have flexibility to roll-over a foreign currency forward contract upon its expiration if it desires to do so. Additionally, there can be no assurance that the other party to the contract will perform its services thereunder.

The Fund may hold a portion of its assets in bank deposits denominated in foreign currencies, so as to facilitate investment in foreign securities as well as protect against currency fluctuations and the need to convert such assets into U.S. dollars (thereby also reducing transaction costs). To the extent these monies are converted back into U.S. dollars, the value of the assets so maintained will be affected favorably or unfavorably by changes in foreign currency exchange rates and exchange control regulations.

Tax Consequences of Hedging. Under applicable tax law, the Fund may be required to limit its gains from hedging in foreign currency forwards, futures and options. The extent to which these limits apply is subject to tax regulations that, to date, have not been issued. Hedging may also result in the application of the mark-to-market and straddle provisions of the IRC. Those provisions could result in an increase (or decrease) in the amount of taxable dividends paid by the Fund and could affect whether dividends paid by the Fund are classified as capital gains or ordinary income. See “Certain Material U.S. Federal Income Tax Considerations” below for additional information related to these tax issues.

Foreign Currency Exchange-Related Securities.

Foreign Currency Warrants. Foreign currency warrants such as Currency Exchange Warrants (“CEWs”) are warrants which entitle the holder to receive from their issuer an amount of cash (generally, for warrants issued in the United States, in U.S. dollars) which is calculated pursuant to a predetermined formula and based on the exchange rate between a specified foreign currency and the U.S. dollar as of the exercise date of the warrant. Foreign currency warrants generally are exercisable upon their issuance and expire as of a specified date and time. Foreign currency warrants have been issued in connection with U.S. dollar-denominated debt offerings by major corporate issuers in an attempt to reduce the foreign currency exchange risk which, from the point of view of prospective purchasers of the securities, is inherent in the international fixed-income marketplace. Foreign currency warrants may attempt to reduce the foreign exchange risk assumed by purchasers of a security by, for example, providing for a supplemental payment in the event that the U.S. dollar depreciates against the value of a major foreign currency such as the Japanese yen or the euro. The formula used to determine the amount payable upon exercise of a foreign currency warrant may make the warrant worthless unless the applicable foreign currency exchange rate moves in a particular direction (e.g., unless the U.S. dollar appreciates or depreciates against the particular foreign currency to which the warrant is linked or indexed). Foreign currency warrants are severable from the debt obligations with which they may be offered and may be listed on exchanges. Foreign currency warrants may be exercisable only in certain minimum amounts, and an investor wishing to exercise warrants who possesses less than the minimum number required for exercise may be required either to sell the warrants or to purchase additional warrants, thereby incurring additional transaction costs. In the case of any exercise of warrants, there may be a time delay between the time a holder of warrants gives instructions to exercise and the time the exchange rate relating to exercise is determined, during which time the exchange rate could change significantly, thereby affecting both the market and cash settlement values of the warrants being exercised. The expiration date of the warrants may be accelerated if the warrants should be delisted from an exchange or if their trading should be suspended permanently, which would result in the loss of any remaining “time value” of the warrants (i.e., the difference between the current market value and the exercise value of the warrants), and, in the case the warrants were “out-of-the-money,” in a total loss of the purchase price of the warrants. Warrants are generally unsecured obligations of their issuers and are not standardized foreign currency options issued by the Options Clearing Corporation (“OCC”). Unlike foreign currency options issued by OCC, the terms of foreign exchange warrants generally will not be amended in the event of governmental or regulatory actions affecting exchange rates or in the event of the imposition of other regulatory controls affecting the international currency markets. The initial public offering price of foreign currency warrants is generally considerably in excess of the price that a commercial user of foreign currencies might pay in the interbank market for a comparable option involving significantly larger amounts of foreign currencies. Foreign currency warrants are subject to significant foreign exchange risk, including risks arising from complex political or economic factors.

Principal Exchange Rate Linked Securities. Principal exchange rate linked securities (“PERLs”) are debt obligations the principal on which is payable at maturity in an amount that may vary based on the exchange rate between the U.S. dollar and a particular foreign currency at or about that time. The return on “standard” PERLs is enhanced if the foreign currency to which the security is linked appreciates against the U.S. dollar and is adversely affected by increases in the foreign exchange value of the U.S. dollar; “reverse” PERLs are like the “standard” securities, except that their return is enhanced by increases in the value of the U.S. dollar and adversely impacted by increases in the value of foreign currency. Interest payments on the securities are generally made in U.S. dollars at rates that reflect the degree of foreign currency risk assumed or given up by the purchaser of the notes (i.e., at relatively higher interest rates if the purchaser has assumed some of the foreign exchange risk, or relatively lower interest rates if the issuer has assumed some of the foreign exchange risk, based on the expectations of the current market). PERLs may in limited cases be subject to acceleration of maturity (generally, not without the consent of the holders of the securities), which may have an adverse impact on the value of the principal payment to be made at maturity.

Performance Indexed Paper. Performance indexed paper (“PIPs”) is U.S. dollar-denominated commercial paper the yield of which is linked to certain foreign exchange rate movements. The yield to the investor on PIPs is established at maturity as a function of spot exchange rates between the U.S. dollar and a designated currency as of or about that time (generally, the index maturity two days prior to maturity). The yield to the investor will be within a range stipulated at the time of purchase of the obligation, generally with a guaranteed minimum rate of return that is below, and a potential maximum rate of return that is above, market yields on U.S. dollar-denominated commercial paper, with both the minimum and maximum rates of return on the investment corresponding to the minimum and maximum values of the spot exchange rate two business days prior to maturity.

FOREIGN SECURITIES. The Fund may invest in foreign securities either directly by purchasing foreign securities. Foreign securities include equity or debt securities issued by issuers outside the United States. Direct investments in foreign securities will be made in European currency denominated securities traded in over-the-counter-markets. Foreign investments may be affected favorably or unfavorably by changes in currency rates and exchange control regulations. There may be less information available about a foreign company than about a U.S. company, and foreign companies may not be subject to reporting standards and requirements comparable to those applicable to U.S. companies. Foreign securities may not be as liquid as U.S. securities. Securities of foreign companies may involve greater market risk than securities of U.S. companies. Investments in foreign securities may also be subject to local economic or political risks, political instability and possible nationalization of issuers.

Investments in securities of foreign issuers may involve risks that are not associated with domestic investments. Foreign issuers may lack uniform accounting, auditing and financial reporting standards, practices and requirements, and there is generally less publicly available information about foreign issuers than there is about domestic issuers. Securities of some foreign issuers are less liquid and their prices are more volatile than securities of comparable domestic issuers. Income from foreign securities may be reduced by a withholding tax at the source or other foreign taxes. In some countries, there may also be the possibility of nationalization, expropriation or confiscatory taxation (in which case the Fund could lose its entire investment in a certain market), limitations on the removal of monies or other assets of the Fund, higher rates of inflation, political or social instability or revolution, or diplomatic developments that could affect investments in those countries. In addition, it may be difficult to obtain and enforce a judgment in a court outside the United States.

Some of the risks described in the preceding paragraph may be more severe for investments in emerging or developing countries. By comparison with the United States and other developed countries, emerging or developing countries may have relatively unstable governments, economies based on a less diversified industrial base and securities markets that trade a smaller number of securities. Companies in emerging markets may generally be smaller, less experienced and more recently organized than many domestic companies, and prices of those companies’ securities tend to be more volatile.

The economies of individual emerging countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payment position and may be based on a substantially less diversified industrial base. Further, the economies of developing countries generally are heavily dependent upon international trade and, accordingly, have been, and may continue to be, adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been, and may continue to be, adversely affected by economic conditions in the countries with which they trade. U.S. securities and accounting regulatory agencies continue to express concern regarding information access and audit quality regarding issuers in emerging market countries, which could present heightened risks associated with investments in these markets.

GUARANTEED INVESTMENT CONTRACTS. The Fund may invest in guaranteed investment contracts (“GIC”). A GIC is a general obligation of an insurance company. A GIC is generally structured as a deferred annuity under which the purchaser agrees to pay a given amount of money to an insurer (either in a lump sum or in installments) and the insurer promises to pay interest at a guaranteed rate (either fixed or variable) for the life of the contract. Some GICs provide that the insurer may periodically pay discretionary excess interest over and above the guaranteed rate. At the GIC’s maturity, the purchaser generally is given the option of receiving payment or an annuity. Certain GICs may have features that permit redemption by the issuer at a discount from par value. Generally, GICs are not assignable or transferable without the permission of the issuer. As a result, the acquisition of GICs is subject to the limitations

applicable to the Fund's acquisition of illiquid and restricted securities. The holder of a GIC is dependent on the creditworthiness of the issuer as to whether the issuer is able to meet its obligations.

HYBRID INSTRUMENTS. A hybrid instrument is a type of potentially high-risk derivative that combines a traditional stock, bond or commodity with an option or forward contract. Generally, the principal amount, amount payable upon maturity or redemption or interest rate of a hybrid is tied (positively or negatively) to the price of some commodity, currency or securities index or another interest rate or some other economic factor (each a "benchmark"). The interest rate or (unlike most fixed income securities) the principal amount payable at maturity of a hybrid security may be increased or decreased, depending on changes in the value of the benchmark. An example of a hybrid could be a bond issued by an oil company that pays a small base level of interest with additional interest that accrues in correlation to the extent to which oil prices exceed a certain predetermined level. Such a hybrid instrument would be a combination of a bond and a call option on oil.

Hybrids can be used as an efficient means of pursuing a variety of investment goals, including currency hedging duration management and increased total return. Hybrids may not bear interest or pay dividends. The value of a hybrid or its interest rate may be a multiple of a benchmark and, as a result, may be leveraged and move (up or down) more steeply and rapidly than the benchmark. These benchmarks may be sensitive to economic and political events, such as commodity shortages and currency devaluations, which cannot be readily foreseen by the purchaser of a hybrid. Under certain conditions, the redemption value of a hybrid could be zero. Thus, an investment in a hybrid may entail significant market risks that are not associated with a similar investment in a traditional, U.S. dollar-denominated bond that has a fixed principal amount and pays a fixed rate or floating rate of interest. The purchase of hybrids also exposes the Fund to the credit risk of the issuer of the hybrids. These risks may cause significant fluctuations in the NAV of the Fund.

Certain hybrid instruments may provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options or similar instruments. Commodity-linked hybrid instruments may be either equity or debt securities, leveraged or unleveraged, and are considered hybrid instruments because they have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract, index or other economic variable. The Fund will only invest in commodity-linked hybrid instruments that qualify under applicable rules of the CFTC for an exemption from the provisions of the CEA.

Certain issuers of structured products such as hybrid instruments may be deemed to be investment companies as defined in the 1940 Act. As a result, the Fund's investments in these products may be subject to limits applicable to investments in investment companies and may be subject to restrictions contained in the 1940 Act.

ILLIQUID SECURITIES AND LIQUIDITY RISK MANAGEMENT PROGRAM. The Fund may not knowingly invest more than 15% of its net assets in illiquid securities. Illiquid securities are securities that cannot be disposed of within seven days at approximately the value at which they are being carried on the Fund's books. The Board of Trustees has the ultimate responsibility for determining whether specific securities are liquid or illiquid. The Board of Trustees has delegated the function of making day to day determinations of liquidity to the Adviser, pursuant to guidelines approved by the Board of Trustees. The Adviser will monitor the liquidity of securities held by the Fund and report periodically on such decisions to the Board of Trustees. If the limitations on illiquid securities are exceeded, other than by a change in market values, the condition will be reported by the Fund's Adviser to the Board of Trustees. Illiquid securities would generally include repurchase agreements with notice/termination dates in excess of seven days and certain securities which are subject to trading restrictions because they are not registered under the Securities Act of 1933, as amended (the "1933 Act"). External market conditions may impact the liquidity of portfolio securities and may cause the Fund to sell or divest certain illiquid securities in order to comply with its limitation on holding illiquid securities, which may result in realized losses to the Fund.

Rule 22e-4 under the 1940 Act requires, among other things, that the Fund establish a liquidity risk management program ("LRMP") that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines "liquidity risk" as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of the remaining investors' interests in the fund. The Fund has implemented a LRMP to meet the relevant requirements. Additionally, the Board of Trustees, including a majority of the Independent Trustees, approved the designation of a committee of individuals comprised of the Fund's President, Treasurer, and Chief Compliance Officer (the "LRMP

Administrator”) to administer the LRMP. The Board of Trustees will review no less frequently than annually a written report prepared by the LRMP Administrator that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a “highly liquid investment,” “moderately liquid investment,” “less liquid investment” or “illiquid investment.” The liquidity risk classifications of the Fund’s investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that a Fund investment is deemed to be an “illiquid investment” or a “less liquid investment,” the Fund can expect to be exposed to greater liquidity risk. There is no guarantee the LRMP will be effective in its operations, and complying with Rule 22e-4, including bearing related costs, could impact the Fund’s performance and its ability to achieve its investment objective.

INFLATION-PROTECTED DEBT SECURITIES. The Fund may invest in inflation-protected debt securities or inflation-indexed bonds, which are fixed income securities whose value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers utilize a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index (“CPI”) accruals as part of a semi-annual coupon.

Treasury Inflation Protected Securities (“TIPS”) have maturities of approximately five, ten or thirty years, although it is possible that securities with other maturities will be issued in the future. The U.S. Treasury securities pay interest on a semi-annual basis equal to a fixed percentage of the inflation-adjusted principal amount. For example, if the Fund purchased TIPS with a par value of \$1,000 and a 3% real rate of return coupon (payable 1.5% semi-annually), and the rate of inflation over the first six months was 1%, the mid-year par value of the bond would be \$1,010 and the first semi-annual interest payment would be \$15.15 (\$1,010 times 1.5%). If inflation during the second half of the year resulted in the whole year’s inflation equaling 3%, the end-of-year par value of the bond would be \$1,030 and the second semi-annual interest payment would be \$15.45 (\$1,030 times 1.5%).

If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of TIPS, even during a period of deflation. However, the current market value of the bonds is not guaranteed and will fluctuate. The Fund may also invest in other inflation-related bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rate of inflation rises at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond’s inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for Urban Consumers (“CPI-U”), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

INVESTMENTS IN COMMODITY/NATURAL RESOURCE-RELATED SECURITIES. As discussed under “Investment Limitations” below, the Fund does not invest directly in commodities. However, the Fund may from time to time invest in securities of companies whose business is related to commodities and natural resources, or in registered investment companies or other companies that invest directly or indirectly in commodities and natural resources. For example, the Fund may invest in companies whose business is related to mining of precious or other metals (e.g., gold, silver, etc.) or registered investment companies that invest in securities of mining companies and related instruments (including, without limitation, the underlying commodities). Investments in equity securities of companies involved in mining or related precious metals industries, and the value of the investment companies and other companies that invest in precious metals and other commodities are subject to a number of risks. For example, the prices of precious metals or other commodities can move sharply, up or down, in response to cyclical economic conditions, political events or the monetary policies of various countries, any of which may adversely affect the value of companies whose business is related to such commodities, or the value of investment companies and other companies investing in such business or commodities. Furthermore, such companies are subject to risks related to fluctuations of prices and perceptions of value in the commodity markets generally.

LIMITED HISTORY OF OPERATIONS. The Fund is recently organized with a limited operating history, and there can be no assurance that the Fund will grow to or maintain an economically viable size.

LOAN PARTICIPATIONS. The Fund may purchase participations in commercial loans. Such indebtedness may be secured or unsecured. Loan participations typically represent direct participation in a loan to a corporate borrower and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing loan participations, the Fund assumes the credit risk associated with the corporate borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which the Fund intends to invest may not be rated by any nationally recognized statistical ratings organization (“NRSRO”).

A loan is often administered by an agent bank acting as agent for all holders. The agent bank administers the terms of the loan, as specified in the loan agreement. In addition, the agent bank is normally responsible for the collection of principal and interest payments from the corporate borrower and the apportionment of these payments to the credit of all institutions which are parties to the loan agreement. Unless, under the terms of the loan or other indebtedness, the Fund has direct recourse against the corporate borrower, the Fund may have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies against a corporate borrower. A financial institution’s employment as agent bank might be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor agent bank would generally be appointed to replace the terminated agent bank, and assets held by the agent bank under the loan agreement should remain available to holders of such indebtedness. However, if assets held by the agent bank for the benefit of the Fund were determined to be subject to the claims of the agent bank’s general creditors, the Fund might incur certain costs and delays in realizing payment on a loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (e.g., an insurance company or governmental agency) similar risks may arise.

Purchasers of loans and other forms of direct indebtedness depend primarily upon the creditworthiness of the corporate borrower for payment of principal and interest. If the Fund does not receive scheduled interest or principal payments on such indebtedness, the Fund’s share price and yield could be adversely affected. Loans that are fully secured offer the Fund more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower’s obligation, or that the collateral can be liquidated.

The Fund may invest in loan participations with credit quality comparable to that of the issuers of the Fund’s securities investments. Indebtedness of companies whose creditworthiness is poor involves substantially greater risks and may be highly speculative. Some companies may never pay off their indebtedness or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, the Fund bears a substantial risk of losing the entire amount invested.

The Fund limits the amount of its total assets that it will invest in any one issuer or in issuers within the same industry (see “Investment Limitations”). For purposes of these limits, the Fund generally will treat the corporate borrower as the “issuer” of indebtedness held by the Fund. In the case of loan participations where a bank or other lending

institution serves as a financial intermediary between the Fund and the corporate borrower, if the participation does not shift to the Fund the direct debtor-creditor relationship with the corporate borrower, SEC interpretations require the Fund to treat both the lending bank or other lending institution and the corporate borrower as “issuers” for the purpose of determining whether the Fund has invested more than 5% of its assets in a single issuer. Treating a financial intermediary as an issuer of indebtedness may restrict the Fund’s ability to invest in indebtedness related to a single financial intermediary, or a group of intermediaries engaged in the same industry, even if the underlying borrowers represent many different companies and industries.

Loans and other types of direct indebtedness may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of indebtedness may require weeks to complete. Consequently, some indebtedness may be difficult or impossible to dispose of readily at what the Adviser believes to be a fair price. In addition, valuation of illiquid indebtedness involves a greater degree of judgment in determining the Fund’s NAV than if that value were based on available market quotations and could result in significant variations in the Fund’s daily share price. At the same time, some loan interests are traded among certain financial institutions and accordingly may be deemed liquid. As the market for different types of indebtedness develops, the liquidity of these instruments is expected to improve. In addition, the Fund currently intends to treat indebtedness for which there is no readily available market as illiquid for purposes of the Fund’s limitation on illiquid investments. Investments in loan participations are considered to be debt obligations for purposes of the Trust’s investment restriction relating to the lending of funds or assets by the Fund.

Investments in loans through a direct assignment of the financial institution’s interests with respect to the loan may involve additional risks to the Fund. For example, if a loan is foreclosed, the Fund could become part owner of any collateral and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, the Fund could be held liable as co-lender. It is unclear whether loans and other forms of direct indebtedness offer securities law protections against fraud and misrepresentation. In the absence of definitive regulatory guidance, the Fund relies on the Adviser’s research in an attempt to avoid situations where fraud or misrepresentation could adversely affect the Fund.

LARGE-CAP RISK. Large cap risk is the risk that securities issued by larger companies may underperform relative to those of small and mid-sized companies. Large cap companies may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes, and also may not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

MID-CAP RISK. Medium-sized companies are usually less stable in price and less liquid than larger, more established companies. Therefore, they generally involve greater risk.

MONEY MARKET FUNDS. The Fund may invest in the securities of money market mutual funds. Such investments are subject to limitations prescribed by the 1940 Act, the rules thereunder and applicable SEC staff interpretations thereof, or applicable exemptive relief granted by the SEC. (See “Investment Company Securities and Exchange-Traded Funds” above.)

MORTGAGE-RELATED SECURITIES AND ASSET-BACKED SECURITIES. Mortgage-related securities are interests in pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations. See “Mortgage Pass-Through Securities.” The Fund may also invest in debt securities which are secured with collateral consisting of mortgage-related securities (see “Collateralized Mortgage Obligations”).

The recent financial downturn—particularly the increase in delinquencies and defaults on residential mortgages, falling home prices, and unemployment—has adversely affected the market for mortgage-related securities. In addition, various market and governmental actions may impair the ability to foreclose on or exercise other remedies against underlying mortgage holders, or may reduce the amount received upon foreclosure. These factors have caused certain mortgage-related securities to experience lower valuations and reduced liquidity. There is also no assurance that the U.S. Government will take further action to support the mortgage-related securities industry, as it has in the past, should the economic downturn continue or the economy experience another downturn. Further, recent legislative action and any future government actions may significantly alter the manner in which the mortgage-related securities market functions. Each of these factors could ultimately increase the risk that the Fund could realize losses on mortgage-related securities.

Mortgage Pass-Through Securities. Interests in pools of mortgage-related securities differ from other forms of debt securities, which normally provide for periodic payment of interest in fixed amounts with principal payments at maturity or specified call dates. Instead, these securities provide a monthly payment which consists of both interest and principal payments. In effect, these payments are a “pass-through” of the monthly payments made by the individual borrowers on their residential or commercial mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Additional payments are caused by repayments of principal resulting from the sale of the underlying property, refinancing or foreclosure, net of fees or costs which may be incurred. Some mortgage-related securities (such as securities issued by the Government National Mortgage Association (“GNMA”)) are described as “modified pass-through.” These securities entitle the holder to receive all interest and principal payments owed on the mortgage pool, net of certain fees, at the scheduled payment dates regardless of whether or not the mortgagor actually makes the payment.

The rate of pre-payments on underlying mortgages will affect the price and volatility of a mortgage-related security, and may have the effect of shortening or extending the effective duration of the security relative to what was anticipated at the time of purchase. To the extent that unanticipated rates of pre-payment on underlying mortgages increase the effective duration of a mortgage-related security, the volatility of such security can be expected to increase.

The residential mortgage market in the United States recently has experienced difficulties that may adversely affect the performance and market value of certain of the Fund’s mortgage-related investments. Delinquencies and losses on residential mortgage loans (especially subprime and second-lien mortgage loans) generally have increased recently and may continue to increase, and a decline in or flattening of housing values (as has recently been experienced and may continue to be experienced in many housing markets) may exacerbate such delinquencies and losses. Borrowers with adjustable rate mortgage loans are more sensitive to changes in interest rates, which affect their monthly mortgage payments, and may be unable to secure replacement mortgages at comparably low interest rates. Also, a number of residential mortgage loan originators have experienced serious financial difficulties or bankruptcy. Owing largely to the foregoing, reduced investor demand for mortgage loans and mortgage-related securities and increased investor yield requirements have caused limited liquidity in the secondary market for certain mortgage-related securities, which can adversely affect the market value of mortgage-related securities. It is possible that such limited liquidity in such secondary markets could continue or worsen.

Agency Mortgage-Related Securities. The principal governmental guarantor of mortgage-related securities is GNMA. GNMA is a wholly owned U.S. Government corporation within the Department of Housing and Urban Development. GNMA is authorized to guarantee, with the full faith and credit of the U.S. Government, the timely payment of principal and interest on securities issued by institutions approved by GNMA (such as savings and loan institutions, commercial banks and mortgage bankers) and backed by pools of mortgages insured by the Federal Housing Administration (the “FHA”), or guaranteed by the Department of Veterans Affairs (the “VA”).

Government-related guarantors (i.e., not backed by the full faith and credit of the U.S. Government) include Federal National Mortgage Association (“FNMA”) and Federal Home Loan Mortgage Corporation (“FHLMC”). FNMA is a government-sponsored corporation. FNMA purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation that issues Participation Certificates (“PCs”), which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government.

Privately Issued Mortgage-Related Securities. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such non-governmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools.

However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit, which may be issued by governmental entities or private insurers. Such insurance and guarantees and the creditworthiness of the issuers thereof will be considered in determining whether a mortgage-related security meets the Trust's investment quality standards. There can be no assurance that the private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. The Fund may buy mortgage-related securities without insurance or guarantees if, through an examination of the loan experience and practices of the originators/servicers and poolers, the Adviser determines that the securities meet the Trust's quality standards. Securities issued by certain private organizations may not be readily marketable. The Fund will not purchase mortgage-related securities or any other assets which in the opinion of the Adviser are illiquid if, as a result, more than 15% of the value of the Fund's net assets will be illiquid.

Privately issued mortgage-related securities are not subject to the same underwriting requirements for the underlying mortgages that are applicable to those mortgage-related securities that have a government or government-sponsored entity guarantee. As a result, the mortgage loans underlying privately issued mortgage-related securities may, and frequently do, have less favorable collateral, credit risk or other underwriting characteristics than government or government-sponsored mortgage-related securities and have wider variances in a number of terms including interest rate, term, size, purpose and borrower characteristics. Mortgage pools underlying privately issued mortgage-related securities more frequently include second mortgages, high loan-to-value ratio mortgages and manufactured housing loans, in addition to commercial mortgages and other types of mortgages where a government or government sponsored entity guarantee is not available. The coupon rates and maturities of the underlying mortgage loans in a privately-issued mortgage-related securities pool may vary to a greater extent than those included in a government guaranteed pool, and the pool may include subprime mortgage loans. Subprime loans are loans made to borrowers with weakened credit histories or with a lower capacity to make timely payments on their loans. For these reasons, the loans underlying these securities have had in many cases higher default rates than those loans that meet government underwriting requirements.

The risk of non-payment is greater for mortgage-related securities that are backed by loans that were originated under weak underwriting standards, including loans made to borrowers with limited means to make repayment. A level of risk exists for all loans, although, historically, the poorest performing loans have been those classified as subprime. Other types of privately issued mortgage-related securities, such as those classified as pay-option adjustable rate or Alt-A have also performed poorly. Even loans classified as prime have experienced higher levels of delinquencies and defaults. The substantial decline in real property values across the U.S. has exacerbated the level of losses that investors in privately issued mortgage-related securities have experienced. It is not certain when these trends may reverse. Market factors that may adversely affect mortgage loan repayment include adverse economic conditions, unemployment, a decline in the value of real property, or an increase in interest rates.

Privately issued mortgage-related securities are not traded on an exchange and there may be a limited market for the securities, especially when there is a perceived weakness in the mortgage and real estate market sectors. Without an active trading market, mortgage-related securities held in the Fund's portfolio may be particularly difficult to value because of the complexities involved in assessing the value of the underlying mortgage loans.

The Fund may purchase privately issued mortgage-related securities that are originated, packaged and serviced by third party entities. It is possible these third parties could have interests that are in conflict with the holders of mortgage-related securities, and such holders (such as the Fund) could have rights against the third parties or their affiliates. For example, if a loan originator, servicer or its affiliates engaged in negligence or willful misconduct in carrying out its duties, then a holder of the mortgage-related security could seek recourse against the originator/servicer or its affiliates, as applicable. Also, as a loan originator/servicer, the originator/servicer or its affiliates may make certain representations and warranties regarding the quality of the mortgages and properties underlying a mortgage-related security. If one or more of those representations or warranties is false, then the holders of the mortgage-related securities (such as the Fund) could trigger an obligation of the originator/servicer or its affiliates, as applicable, to repurchase the mortgages from the issuing trust. Notwithstanding the foregoing, many of the third parties that are legally bound by trust and other documents have failed to perform their respective duties, as stipulated in such trust and other documents, and investors have had limited success in enforcing terms.

Mortgage-related securities that are issued or guaranteed by the U.S. Government, its agencies or instrumentalities, are not subject to the Fund's industry concentration restrictions, set forth below under "Investment Limitations," by virtue of the exclusion from that test available to all U.S. Government securities. In the case of privately issued mortgage-related securities, the Fund takes the position that mortgage-related securities do not represent interests in any particular "industry" or group of industries. Therefore, the Fund may invest more or less than 25% of its total assets in privately issued mortgage-related securities. The assets underlying such securities may be represented by a portfolio of residential or commercial mortgages (including both whole mortgage loans and mortgage participation interests that may be senior or junior in terms of priority of repayment) or portfolios of mortgage pass-through securities issued or guaranteed by GNMA, FNMA or FHLMC. Mortgage loans underlying a mortgage-related security may in turn be insured or guaranteed by the FHA or the VA. In the case of privately issued mortgage-related securities whose underlying assets are neither U.S. Government securities nor U.S. Government-insured mortgages, to the extent that real properties securing such assets may be located in the same geographical region, the security may be subject to a greater risk of default than other comparable securities in the event of adverse economic, political or business developments that may affect such region and, ultimately, the ability of residential homeowners to make payments of principal and interest on the underlying mortgages.

Collateralized Mortgage Obligations ("CMOs"). A CMO is a debt obligation of a legal entity that is collateralized by mortgages and divided into classes. Similar to a bond, interest and prepaid principal is paid, in most cases, on a monthly basis. CMOs may be collateralized by whole mortgage loans or private mortgage bonds, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by GNMA, FHLMC, or FNMA, and their income streams.

CMOs are structured into multiple classes, often referred to as "tranches," with each class bearing a different stated maturity and entitled to a different schedule for payments of principal and interest, including pre-payments. Actual maturity and average life will depend upon the pre-payment experience of the collateral. In the case of certain CMOs (known as "sequential pay" CMOs), payments of principal received from the pool of underlying mortgages, including pre-payments, are applied to the classes of CMOs in the order of their respective final distribution dates. Thus, no payment of principal will be made to any class of sequential pay CMOs until all other classes having an earlier final distribution date have been paid in full.

In a typical CMO transaction, a corporation ("issuer") issues multiple series (*e.g.*, A, B, C, Z) of CMO bonds ("Bonds"). Proceeds of the Bond offering are used to purchase mortgages or mortgage pass-through certificates ("Collateral"). The Collateral is pledged to a third party trustee as security for the Bonds. Principal and interest payments from the Collateral are used to pay principal on the Bonds in the order A, B, C, Z. The Series A, B, and C Bonds all bear current interest. Interest on the Series Z Bond is accrued and added to principal and a like amount is paid as principal on the Series A, B, or C Bond currently being paid off. When the Series A, B, and C Bonds are paid in full, interest and principal on the Series Z Bond begins to be paid currently. CMOs may be less liquid and may exhibit greater price volatility than other types of mortgage-backed or asset-backed securities.

As CMOs have evolved, some classes of CMO bonds have become more common. For example, the Fund may invest in parallel-pay and planned amortization class ("PAC") CMOs and multi-class pass through certificates. Parallel-pay CMOs and multi-class pass-through certificates are structured to provide payments of principal on each payment date to more than one class. These simultaneous payments are taken into account in calculating the stated maturity date or final distribution date of each class, which, as with other CMO and multi-class pass-through structures, must be retired by its stated maturity date or final distribution date but may be retired earlier. PACs generally require payments of a specified amount of principal on each payment date. PACs are parallel-pay CMOs with the required principal amount on such securities having the highest priority after interest has been paid to all classes. Any CMO or multi-class pass through structure that includes PAC securities must also have support tranches—known as support bonds, companion bonds or non-PAC bonds—which lend or absorb principal cash flows to allow the PAC securities to maintain their stated maturities and final distribution dates within a range of actual prepayment experience. These support tranches are subject to a higher level of maturity risk compared to other mortgage-related securities, and usually provide a higher yield to compensate investors. If principal cash flows are received in amounts outside a pre-determined range such that the support bonds cannot lend or absorb sufficient cash flows to the PAC securities as intended, the PAC securities are subject to heightened maturity risk.

Commercial Mortgage-Backed Securities. Commercial mortgage-backed securities include securities that reflect an interest in, and are secured by, mortgage loans on commercial real property. Many of the risks of investing in commercial mortgage-backed securities reflect the risks of investing in the real estate securing the underlying mortgage loans. These risks reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make loan payments, and the ability of a property to attract and retain tenants. Commercial mortgage-backed securities may be less liquid and exhibit greater price volatility than other types of mortgage- or asset-backed securities.

Other Mortgage-Related Securities. Other mortgage-related securities include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including mortgage dollar rolls, CMO residuals or stripped mortgage-backed securities (“SMBS”). Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

CMO Residuals. CMO residuals are mortgage securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks and special purpose entities of the foregoing.

The cash flow generated by the mortgage assets underlying a series of CMOs is applied first to make required payments of principal and interest on the CMOs and second to pay the related administrative expenses and any management fee of the issuer. The residual in a CMO structure generally represents the interest in any excess cash flow remaining after making the foregoing payments. Each payment of such excess cash flow to a holder of the related CMO residual represents income and/or a return of capital. The amount of residual cash flow resulting from a CMO will depend on, among other things, the characteristics of the mortgage assets, the coupon rate of each class of CMO, prevailing interest rates, the amount of administrative expenses and the pre-payment experience on the mortgage assets. In particular, the yield to maturity on CMO residuals is extremely sensitive to pre-payments on the related underlying mortgage assets, in the same manner as an interest-only (“IO”) class of stripped mortgage-backed securities. See “Other Mortgage-Related Securities—Stripped Mortgage-Backed Securities.” In addition, if a series of a CMO includes a class that bears interest at an adjustable rate, the yield to maturity on the related CMO residual will also be extremely sensitive to changes in the level of the index upon which interest rate adjustments are based.

As described below with respect to stripped mortgage-backed securities, in certain circumstances the Fund may fail to recoup fully its initial investment in a CMO residual.

CMO residuals are generally purchased and sold by institutional investors through several investment banking firms acting as brokers or dealers. Transactions in CMO residuals are generally completed only after careful review of the characteristics of the securities in question. In addition, CMO residuals may, or pursuant to an exemption therefrom, may not have been registered under the 1933 Act. CMO residuals, whether or not registered under the 1933 Act, may be subject to certain restrictions on transferability, and may be deemed “illiquid” and subject to the Fund’s limitations on investment in illiquid securities.

Adjustable Rate Mortgage-Backed Securities. Adjustable rate mortgage-backed securities (“ARMBSs”) have interest rates that reset at periodic intervals. Acquiring ARMBSs permits the Fund to participate in increases in prevailing current interest rates through periodic adjustments in the coupons of mortgages underlying the pool on which ARMBSs are based. Such ARMBSs generally have higher current yield and lower price fluctuations than is the case with more traditional fixed income debt securities of comparable rating and maturity. In addition, when prepayments of principal are made on the underlying mortgages during periods of rising interest rates, the Fund can reinvest the proceeds of such prepayments at rates higher than those at which they were previously invested. Mortgages underlying most ARMBSs, however, have limits on the allowable annual or lifetime increases that can be made in the interest rate that the mortgagor pays. Therefore, if current interest rates rise above such limits over the period of the limitation, the Fund, when holding an ARMBS, does not benefit from further increases in interest rates. Moreover, when interest rates are in excess of coupon rates (*i.e.*, the rates being paid by mortgagors) of the mortgages, ARMBSs behave more like fixed income securities and less like adjustable rate securities and are subject to the risks associated with fixed income securities. In addition, during periods of rising interest rates, increases in the coupon rate of adjustable rate mortgages generally lag current market interest rates slightly, thereby creating the potential for capital depreciation on such securities.

Stripped Mortgage-Backed Securities. SMBS are derivative multi-class mortgage securities. SMBS may be issued by agencies or instrumentalities of the U.S. Government, or by private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose entities of the foregoing. SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. A common type of SMBS will have one class receiving some of the interest and most of the principal from the mortgage assets, while the other class will receive most of the interest and the remainder of the principal. In the most extreme case, one class will receive all of the interest (the “IO” class), while the other class will receive all of the principal (the principal-only or “PO” class). The yield to maturity on an IO class is extremely sensitive to the rate of principal payments (including pre-payments) on the related underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on the Fund’s yield to maturity from these securities. If the underlying mortgage assets experience greater than anticipated pre-payments of principal, the Fund may fail to recoup some or all of its initial investment in these securities even if the security is in one of the highest rating categories.

Collateralized Debt Obligations. The Fund may invest in collateralized debt obligations (“CDOs”), which include collateralized bond obligations (“CBOs”), collateralized loan obligations (“CLOs”) and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is often backed by a diversified pool of high risk, below investment grade fixed income securities. The collateral can be from many different types of fixed income securities such as high yield debt, residential privately issued mortgage-related securities, commercial privately issued mortgage-related securities, trust preferred securities and emerging market debt. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. CDOs may charge management fees and administrative expenses.

For both CBOs and CLOs, the cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the “equity” tranche which bears the bulk of defaults from the bonds or loans in the trust and serves to protect the other, more senior tranches from default in all but the most severe circumstances. Since they are partially protected from defaults, senior tranches from a CBO trust or CLO trust typically have higher ratings and lower yields than their underlying securities, and can be rated investment grade.

Despite the protection from the equity tranche, CBO or CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to CBO or CLO securities as a class.

The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. Normally, CBOs, CLOs and other CDOs are privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid securities, however an active dealer market may exist for CDOs allowing a CDO to qualify for Rule 144A transactions. In addition to the normal risks associated with fixed income securities discussed elsewhere in this SAI and the Fund’s Prospectus (e.g., interest rate risk and default risk), CDOs carry additional risks including, but are not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Fund may invest in CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Asset-Backed Securities. Asset-backed securities (“ABS”) are bonds backed by pools of loans or other receivables. ABS are created from many types of assets, including auto loans, credit card receivables, home equity loans, and student loans. ABS are issued through special purpose vehicles that are bankruptcy remote from the issuer of the collateral. The credit quality of an ABS transaction depends on the performance of the underlying assets. To protect ABS investors from the possibility that some borrowers could miss payments or even default on their loans, ABS include various forms of credit enhancement. Some ABS, particularly home equity loan transactions, are subject to interest-rate risk and prepayment risk. A change in interest rates can affect the pace of payments on the underlying loans, which in turn, affects total return on the securities. ABS also carry credit or default risk. If many borrowers on the underlying loans default, losses could exceed the credit enhancement level and result in losses to investors in an ABS transaction. Finally, ABS have structure risk due to a unique characteristic known as early amortization, or early payout, risk. Built into the structure of most ABS are triggers for early payout, designed to protect investors from

losses. These triggers are unique to each transaction and can include: a big rise in defaults on the underlying loans, a sharp drop in the credit enhancement level, or even the bankruptcy of the originator. Once early amortization begins, all incoming loan payments (after expenses are paid) are used to pay investors as quickly as possible based upon a predetermined priority of payment.

Consistent with its investment objectives and policies, the Fund also may invest in other types of asset-backed securities.

PARTICIPATION INTERESTS. The Fund may invest in participation interests in fixed income securities. A participation interest provides the certificate holder with a specified interest in an issue of fixed income securities.

Some participation interests give the holders differing interests in the underlying securities, depending upon the type or class of certificate purchased. For example, coupon strip certificates give the holder the right to receive a specific portion of interest payments on the underlying securities; principal strip certificates give the holder the right to receive principal payments and the portion of interest not payable to coupon strip certificate holders. Holders of certificates of participation in interest payments may be entitled to receive a fixed rate of interest, a variable rate that is periodically reset to reflect the current market rate or an auction rate that is periodically reset at auction. Asset-backed residuals represent interests in any excess cash flow remaining after required payments of principal and interest have been made.

More complex participation interests involve special risk considerations. Since these instruments have only recently been developed, there can be no assurance that any market will develop or be maintained for the instruments. Generally, the fixed income securities that are deposited in trust for the holders of these interests are the sole source of payments on the interests; holders cannot look to the sponsor or trustee of the trust or to the issuers of the securities held in trust or to any of their affiliates for payment.

Participation interests purchased at a discount may experience price volatility. Certain types of interests are sensitive to fluctuations in market interest rates and to prepayments on the underlying securities. A rapid rate of prepayment can result in the failure to recover the holder's initial investment.

The extent to which the yield to maturity of a participation interest is sensitive to prepayments depends, in part, upon whether the interest was purchased at a discount or premium, and if so, the size of that discount or premium. Generally, if a participation interest is purchased at a premium and principal distributions occur at a rate faster than that anticipated at the time of purchase, the holder's actual yield to maturity will be lower than that assumed at the time of purchase. Conversely, if a participation interest is purchased at a discount and principal distributions occur at a rate faster than that assumed at the time of purchase, the investor's actual yield to maturity will be higher than that assumed at the time of purchase.

Participation interests in pools of fixed income securities backed by certain types of debt obligations involve special risk considerations. The issuers of securities backed by automobile and truck receivables typically file financing statements evidencing security interests in the receivables, and the servicers of those obligations take and retain custody of the obligations. If the servicers, in contravention of their duty to the holders of the securities backed by the receivables, were to sell the obligations, the third party purchasers could acquire an interest superior to the interest of the security holders. Also, most states require that a security interest in a vehicle must be noted on the certificate of title and the certificate of title may not be amended to reflect the assignment of the lender's security interest. Therefore, the recovery of the collateral in some cases may not be available to support payments on the securities. Securities backed by credit card receivables are generally unsecured, and both Federal and state consumer protection laws may allow set-offs against certain amounts owed.

REAL ESTATE SECURITIES AND RELATED DERIVATIVES. The Fund may gain exposure to the real estate sector by investing in real estate-linked derivatives, real estate investment trusts ("REITs") and securities of issuers in real estate-related industries. Each of these types of investments are subject to risks similar to those associated with direct ownership of real estate, including loss to casualty or condemnation, increases in property taxes and operating expenses, zoning law amendments, changes in interest rates, overbuilding and increased competition, variations in market value and possible environmental liabilities. The Fund may also invest in rights or warrants to purchase income-producing common and preferred shares of issuers in real estate-related industries. It is anticipated that substantially all of the equity securities of issuers in real estate-related industries in which the Fund intends to invest will be traded on a national securities exchange or in the over-the-counter market.

REITs are pooled investment vehicles that own, and typically operate, income-producing real estate. If a REIT meets certain requirements, including distributing to shareholders substantially all of its taxable income (other than net capital gains), then it is not taxed on the income distributed to shareholders. REITs are subject to management fees and other expenses, and so the Fund, when investing in REITs, will bear its proportionate share of the costs of the REITs' operations.

There are three general categories of REITs: Equity REITs, Mortgage REITs and Hybrid REITs. Equity REITs invest primarily in direct fee ownership or leasehold ownership of real property; they derive most of their income from rents. Mortgage REITs invest mostly in mortgages on real estate, which may secure construction, development or long-term loans, and the main source of their income is mortgage interest payments. Hybrid REITs hold both ownership and mortgage interests in real estate.

Along with the risks common to different types of real estate-related securities, REITs, no matter the type, involve additional risk factors. These include poor performance by the REIT's manager, changes to the tax laws, and failure by the REIT to qualify for tax-free distribution of income or exemption under the 1940 Act. Furthermore, REITs are not diversified and are heavily dependent on cash flow. REITs can be listed and traded on national securities exchanges or can be traded privately between individual owners.

REPURCHASE AGREEMENTS. The Fund may invest in repurchase agreements. A repurchase agreement is a transaction in which the Fund purchases a security from a bank or recognized securities dealer and simultaneously commits to resell that security to a bank or dealer at an agreed upon date and price reflecting a market rate of interest, unrelated to the coupon rate or the maturity of the purchased security. While it is not possible to eliminate all risks from these transactions (particularly the possibility of a decline in the market value of the underlying securities, as well as delays and costs to the Fund if the other party to the repurchase agreement defaults), it is the policy of the Fund to limit repurchase transactions to primary dealers and banks whose creditworthiness has been reviewed and found satisfactory by the Adviser. Repurchase agreements maturing in more than seven days are considered illiquid for purposes of the Fund's investment limitations.

RESTRICTED SECURITIES. Restricted securities are securities that may not be sold to the public without registration under the 1933 Act or an exemption from registration. The Fund is subject to an investment limitation on the purchase of illiquid securities. Restricted securities, including securities eligible for resale pursuant to Rule 144A under the 1933 Act, that are determined to be liquid are not subject to this limitation. This determination is to be made by the Adviser pursuant to guidelines adopted by the Board of Trustees. Under these guidelines, the Adviser will consider the frequency of trades and quotes for the security, the number of dealers in, and potential purchasers for, the securities, dealer undertakings to make a market in the security and the nature of the security and of the marketplace trades. In purchasing such restricted securities, the Adviser intends to purchase securities that are exempt from registration under Rule 144A.

REVERSE REPURCHASE AGREEMENTS. The Fund may enter into reverse repurchase agreements in accordance with its investment restrictions. Pursuant to such agreements, the Fund would sell portfolio securities to financial institutions such as banks and broker-dealers, and agree to repurchase them at a mutually agreed-upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will place in a segregated custodial account assets such as U.S. Government securities or other liquid, high grade debt securities, generally rated in one of the three highest ratings categories, consistent with the Fund's investment restrictions having a value at least equal to the repurchase price (including accrued interest) and will subsequently monitor the account to ensure that such equivalent value is maintained. Reverse repurchase agreements involve the risk that the market value of the securities sold by the Fund may decline below the price at which it is obligated to repurchase the securities. Reverse repurchase agreements are considered to be borrowings by the Fund under the 1940 Act. The Fund will not engage in reverse repurchase transactions if such transactions, combined with any other borrowings, exceed 33-1/3% of the Fund's assets.

SECTOR RISK. Although the Fund may not "concentrate" (invest 25% or more of its net assets) in any industry, it may focus its investments from time to time on one or more economic sectors. To the extent that it does so, developments affecting companies in that sector or sectors will likely have a magnified effect on the Fund's NAV and total returns and may subject the Fund to greater risk of loss. Accordingly, the Fund could be considerably more volatile than a broad-based market index or other mutual funds that are diversified across a greater number of securities and sectors.

SMALL-CAP RISK. The risk that securities of small-capitalization companies may be subject to more abrupt or erratic market movements than securities of larger, more established companies. Generally, the smaller the company size, the greater the risk. Small-capitalization companies may have limited product lines or financial resources, or may be dependent upon a small or inexperienced management group and their securities may trade less frequently and in lower volume than the securities of larger companies, which could lead to higher transaction costs.

U.S. GOVERNMENT OBLIGATIONS. The Fund may invest in debt securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. Although all obligations of such agencies and instrumentalities are not direct obligations of the U.S. Treasury, the U.S. Government generally directly or indirectly backs payment of the interest and principal on these obligations. This support can range from securities supported by the full faith and credit of the United States (for example, GNMA securities) to securities that are supported solely or primarily by the creditworthiness of the issuer, such as securities of FNMA, FHLMC, the Tennessee Valley Authority, Federal Farm Credit Banks and Federal Home Loan Banks. In the case of obligations not backed by the full faith and credit of the United States, the Fund must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment and may not be able to assert a claim against the United States itself in the event the agency or instrumentality does not meet its commitments. Whether backed by full faith and credit of the U.S. Treasury or not, U.S. Government obligations are not guaranteed against price movements due to fluctuating interest rates.

VARIABLE AND FLOATING RATE SECURITIES. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

The Fund may invest in floating and variable rate debt instruments (“floaters”) and engage in credit spread trades. The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. The interest rate on a floater resets periodically, typically every six months. While, because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, the Fund will participate in any declines in interest rates as well. A credit spread trade is an investment position relating to a difference in the prices or interest rates of two securities or currencies, where the value of the investment position is determined by movements in the difference between the prices or interest rates, as the case may be, of the respective securities or currencies.

The Fund may also invest in inverse floating rate debt instruments (“inverse floaters”). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality. See “Mortgage-Related and Other Asset-Backed Securities” for a discussion of IOs and POs.

WHEN-ISSUED, DELAYED DELIVERY AND FORWARD COMMITMENT TRANSACTIONS. The Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis. Typically, no income accrues on securities the Fund has committed to purchase prior to the time delivery of the securities is made.

When purchasing a security on a when-issued, delayed delivery or forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations and takes such fluctuations into account when determining its NAV. Because the Fund is not required to pay for the security until the delivery date, these risks are in addition to the risks associated with the Fund’s other investments. If the Fund remains substantially fully invested at a time when when-issued, delayed delivery or forward commitment purchases are outstanding, the purchases may result in a form of leverage.

When the Fund has sold a security on a when-issued, delayed delivery, or forward commitment basis, the Fund does not participate in future gains or losses with respect to the security. If the other party to a transaction fails to deliver or pay for the securities, the Fund could miss a favorable price or yield opportunity or could suffer a loss. The Fund may dispose of or renegotiate a transaction after it is entered into and may sell when-issued, delayed delivery or forward commitment securities before they are delivered, which may result in a capital gain or loss. There is no percentage limitation on the extent to which the Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis.

ZERO COUPON BONDS. The Fund may invest in zero coupon bonds of governmental or private issuers that generally pay no interest to their holders prior to maturity. Since zero coupon bonds do not make regular interest payments, they allow an issuer to avoid the need to generate cash to meet current interest payments and may involve greater credit risks than bonds paying interest currently. The IRC requires that the Fund accrue income on zero coupon bonds for each taxable year, even though no cash has been paid on the bonds, and generally requires the Fund to distribute such income (net of deductible expenses, if any) to avoid being subject to tax and to continue to maintain its status as a RIC under the IRC. Because no cash is generally received at the time of accrual, the Fund may be required to sell investments (even if such sales are not advantageous) to obtain sufficient cash to satisfy the federal tax distribution requirements applicable to the Fund under the IRC. See “Certain Material U.S. Federal Income Tax Considerations” below for additional information.

TEMPORARY DEFENSIVE POSITIONS. The Fund may, without limit, invest in U.S. Government securities, commercial paper and other money market instruments, money market funds, cash or cash equivalents in response to adverse market conditions, as a temporary defensive position. The result of this action may be that the Fund will be unable to achieve its investment objective.

PORTFOLIO TURNOVER. The Fund expects to engage in short-term trading to try and achieve its investment objective. As such, the Fund may have portfolio turnover rates in excess of 100%. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once during the course of a year. How long the Fund holds a security in their portfolio is generally not a factor in making buy and sell decisions. Increased portfolio turnover may cause the Fund to incur higher brokerage costs, which may adversely affect the Fund’s performance, and may produce increased taxable distributions. Distributions resulting from short-term trading may be taxed at less favorable rates. A Fund’s portfolio turnover rate is only shown once the Fund has completed its first fiscal period of operations.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Board of Trustees has adopted policies and procedures regarding the disclosure of information about the Fund’s security holdings. The Fund’s entire portfolio holdings are publicly disseminated each day the Fund is open for business and through financial reporting and news services including publicly available internet websites. In addition, the composition of the Deposit Securities (defined below) is publicly disseminated daily prior to the opening of a national securities exchange via the National Securities Clearing Corporation.

As required by the federal or state securities laws, including the 1940 Act, the Fund discloses portfolio holdings in applicable regulatory filings, including shareholder reports, reports on Form N-CSR and Form N-PORT or such other filings, reports or disclosure documents as the applicable regulatory authorities may require. The Fund’s complete list of portfolio holdings is available sixty days after each fiscal quarter end in the Fund’s Form N-CSR (semiannually) and Form N-PORT (quarterly).

The Board of Trustees provides ongoing oversight of the Trust’s policies and procedures and compliance with such policies and procedures. As part of this oversight function, the Trustees receive from the Trust’s Chief Compliance Officer (“CCO”) as necessary, reports on compliance with these policies and procedures. In addition, the Trustees receive an annual assessment of the adequacy and effectiveness of the policies and procedures with respect to the Fund, and any changes thereto, and an annual review of the operation and effectiveness of the policies and procedures. Any deviation to this policy as well as any corrective action undertaken to address such deviations must be reported to the Trust’s Board of Trustees, at its next quarterly Board meeting or sooner, as determined by the Trust’s CCO.

The Fund may, but is not required to, post its schedule of investments on its website at regular intervals or from time to time at the discretion of the Adviser. This information may be as of the most recent practicable date available and need not be subject to a lag period prior to posting on its website. In addition to its schedule of investments, the Fund may post portfolio holdings information and other information on its website including, but not limited to, information about the number of securities the Fund holds, a summary schedule of investments, the Fund’s top holdings, and a percentage breakdown of the Fund’s investments by geographic region, sector, industry and market capitalization. After any portfolio holdings information becomes publicly available (by posting on its website or otherwise); it may be mailed, e-mailed or otherwise transmitted to any person.

The following disclosures of aggregate, composite or descriptive information about the Fund or its portfolio holdings are not subject to the Trust's policy on selective disclosure of portfolio information: (i) descriptions of allocations among classes, geographic regions, countries, industries or sectors; (ii) aggregated data such as average or median ratios or market capitalization; (iii) performance attribution by class, geographic region, country, industry or sector; (iv) aggregated risk statistics; (v) listing of top holdings without any reference to the amount of the Fund's holdings; and (vi) such other information that, in the opinion of the CCO or designee, does not present material risks of dilution, arbitrage, market timing, insider trading or other inappropriate trading of the Fund. The Fund's portfolio holdings may also be disclosed, upon authorization by a designated officer of the Adviser, to financial consultants or other entities that have a legitimate business purpose in receiving such information, including to assist them in determining the suitability of the Fund as an investment for their clients. In each case, such disclosure will be made in accordance with the anti-fraud provisions of the federal securities laws, the Adviser's fiduciary duties to the Fund's shareholders and subject to a confidentiality agreement and/or trading restrictions.

The Board of Trustees of the Trust, a committee thereof, or an officer designated by the Board of Trustees, may, in limited circumstances, permit other selective disclosure of portfolio holdings subject to a confidentiality agreement and/or trading restrictions.

The Fund may distribute or authorize the distribution of information about its holdings that is not publicly available (on a website or otherwise) to the Fund's, or its Adviser's, employees and affiliates that provide services to the Fund. The Fund may also distribute or authorize the distribution of information about the Fund's holdings that is not publicly available (on a website or otherwise) to the Fund's service providers who require access to the information (i) in order to fulfill their contractual duties relating to the Fund; (ii) to facilitate the transition of a newly hired investment adviser prior to the commencement of its duties; (iii) to facilitate the review of the Fund by a ranking or ratings agency; (iv) for the purpose of due diligence regarding a merger or acquisition; or (v) for the purpose of effecting in-kind redemption of securities to facilitate orderly redemption of the Fund's assets and minimize impact on remaining shareholders of the Fund.

Each of the following third parties has been approved to receive portfolio holdings information: (i) the Fund's administrator and accounting agent; (ii) the Fund's independent registered public accounting firm, for use in providing audit opinions; (iii) financial printers, solely for the purpose of preparing the Fund's reports or regulatory filings; (iv) the Fund's custodian in connection with its custody of the Fund's assets; (v) if applicable, a proxy voting service; or (vi) disclosure to a ranking or rating agency, such as Lipper, Inc., Morningstar, Inc., Moody's, S&P and Fitch. Information may be provided to these parties at any time so long as each of these parties is contractually and ethically prohibited from sharing the Fund's portfolio holding information without specific authorization. The Fund's Adviser and service providers have also established procedures to ensure that the Fund's portfolio holdings information is only disclosed in accordance with these policies.

Under no circumstances may the Fund, the Adviser or their affiliates receive any consideration or compensation for disclosing portfolio holdings information.

The Adviser manages other accounts such as separate accounts and other registered or unregistered pooled investment vehicles. These other accounts may be managed in a similar fashion to the Fund and thus may have similar portfolio holdings. Such accounts may have disclosures at different times than the Fund's portfolio holdings are disclosed. Additionally, such accounts may have access to their portfolio holdings and may not be subject to the foregoing restrictions.

INVESTMENT LIMITATIONS

The Fund has adopted the investment limitations set forth below. Except with respect to the asset coverage requirement under Section 18(f)(1) of the 1940 Act with respect to borrowing, if any percentage restriction on investment or utilization of assets set forth in the Prospectus or this SAI is adhered to at the time an investment is made, a later change in percentage resulting from a change in the market values of the Fund or the Fund's assets or redemptions of shares will not be considered a violation of the limitation. The asset coverage requirement under Section 18(f)(1) of the 1940 Act with respect to borrowings is an ongoing requirement. The following fundamental policies apply to the

Fund and the Board of Trustees may not change them without shareholder approval as required by the 1940 Act or the rules and regulations thereunder. The Fund will not:

1. Issue senior securities or borrow money, except as permitted under the 1940 Act and the rules and regulations thereunder, and then not in excess of 33-1/3% of the Fund's total assets (including the amount of the senior securities issued but reduced by any liabilities not constituting senior securities) at the time of the issuance or borrowing, except that the Fund may borrow up to an additional 5% of its total assets (not including the amount borrowed) for temporary purposes such as clearance of portfolio transactions and share redemptions. For purposes of these restrictions, the purchase or sale of securities on a when-issued, delayed delivery or forward commitment basis, the purchase and sale of options and futures contracts and collateral arrangements with respect thereto are not deemed to be the issuance of a senior security, a borrowing or a pledge of assets;
2. Underwrite any issue of securities, except to the extent that the Fund may be considered to be acting as underwriter in connection with the disposition of any portfolio security;
3. Purchase or sell real estate or interests therein, although the Fund may purchase securities of issuers which engage in real estate operations and securities secured by real estate or interests therein, including real estate investment trusts;
4. Purchase or sell physical commodities, unless acquired as a result of owning securities or other instruments, but the Fund may purchase, sell or enter into financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments;
5. Make loans, except loans of portfolio securities or through repurchase agreements, provided that for purposes of this restriction, the acquisition of bonds, debentures, bank loans, other debt securities or instruments, or participations or other interests therein and investments in government obligations, commercial paper, certificates of deposit, bankers' acceptances or similar instruments will not be considered the making of a loan; or
6. Invest 25% or more of the value of the Fund's assets in securities of issuers in any one industry. This restriction does not apply to obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities or to securities issued by other investment companies. For purposes of this limitation, states, municipalities and their political subdivisions are not considered to be part of any industry;

Limitations (1) and (5) above shall be interpreted based upon no-action letters and other pronouncements of the staff of the U.S. Securities and Exchange Commission ("SEC"). Under current pronouncements, certain Fund positions may be excluded from the definition of "senior security" so long as the Fund maintains adequate cover, segregation of assets or otherwise.

For the purposes of limitation (6) above, industry classifications are determined for the Fund in accordance with the industry or sub-industry classifications as defined by Level 4 of the ICE BofA Index industry classification system. The Fund may use other classification titles, standards and systems from time to time, as it determines. The use of any particular classification system is not a fundamental policy.

The following non-fundamental policies apply to the Fund and the Board of Trustees may change it without shareholder approval unless shareholder approval is required by the 1940 Act or the rules and regulations thereunder. The Fund will not:

1. Pledge, mortgage or hypothecate its assets except to secure indebtedness permitted to be incurred by the Fund. (For the purpose of this restriction, the deposit in escrow of securities in connection with the writing of put and call options, collateralized loans of securities by and collateral arrangements with respect to margin for future contracts by the Fund are not deemed to be pledges or hypothecations);
2. Engage in short sales of securities or maintain a short position, except that the Fund may (a) sell short "against the box" and (b) maintain short positions in connection with its use of financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments; or

3. Purchase securities on margin except for the use of short-term credit necessary for the clearance of purchases and sales of portfolio securities, provided that the Fund may make initial and variation margin deposits in connection with permitted transactions in options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments.

TRUSTEES AND OFFICERS

The following tables present certain information regarding the Board of Trustees and officers of the Trust. None of the Trustees are an “interested person” of the Trust, the Adviser, another investment adviser of a series of the Trust, or Foreside Funds Distributors LLC, the principal underwriter of the Trust (“Underwriter”), within the meaning of the 1940 Act and each Trustee is referred to as an “Independent Trustee” and is listed under such heading below. Employees of certain service providers to the Trust serve as officers of the Trust; such persons are not compensated by the Fund. The address of each Trustee and officer as it relates to the Trust’s business is 103 Bellevue Parkway, 2nd Floor, Wilmington, DE 19809.

<u>Name and Date of Birth</u>	<u>Position(s) Held with Trust</u>	<u>Term of Office and Length of Time Served</u>	<u>Principal Occupation(s) During Past Five Years</u>	<u>Number of Funds in Trust Complex Overseen by Trustee</u>	<u>Other Directorships Held by Trustee</u>
INDEPENDENT TRUSTEES					
Robert J. Christian Date of Birth: 2/49	Trustee	Shall serve until death, resignation or removal. Trustee since 2007. Chairman from 2007 until September 30, 2019. LEADERSHIP STRUCTURE AND RESPONSIBILITIES OF THE BOARD AND ITS COMMITTEES. The basic responsibilities of the Trustees are to monitor the Trust and its funds' financial operations and performance, oversee the activities and legal compliance of the Adviser and other major service providers, keep themselves informed, and exercise their business judgment in making decisions important to the Trust's proper functioning based on what the Trustees reasonably believe to be in the best interests of the shareholders. The Board of Trustees is comprised of five individuals, each of whom is an Independent Trustee. The Board of Trustees meets multiple times during the year (but at least quarterly) to review the investment performance of the funds and other operational matters, including policies and procedures with respect to compliance with regulatory and other requirements.

The Board of Trustees has appointed an Independent Trustee to serve in the role of Chairman. The Chairman's primary role is to participate in the preparation of the agenda for meetings of the Board of Trustees and the identification of information to be presented to the Board of Trustees with respect to matters to be acted upon by the Board of Trustees. The Chairman also presides at all meetings of the Board of Trustees and acts as a liaison with service providers, officers, attorneys and other Trustees generally between meetings. The Chairman may perform such other functions as may be requested by the Board of Trustees from time to time. Except for any duties specified herein or pursuant to the Trust's Declaration of Trust or By-Laws, the designation of Chairman does not impose on such Independent Trustee any duties, obligations or liability that is greater than the duties, obligations or liability imposed on such person as a member of the Board of Trustees, generally.

Each Trustee was appointed to serve on the Board of Trustees because of his or her experience, qualifications, attributes and/or skills as set forth in the subsection "Trustee Qualifications," below. Based on a review of the Board of Trustees and its function, the Trustees have determined that the leadership structure of the Board of Trustees is appropriate and that the Board of Trustees' role in the risk oversight of the Trust, as discussed below, allows the Board of Trustees to effectively administer its oversight function.

The Board of Trustees has an Audit Committee and a Nominating and Governance Committee. The responsibilities of each committee and its members are described below.

AUDIT COMMITTEE. The Audit Committee is comprised of Messrs. Christian, Mansur, Marsini, Jr. and Wynne and Ms. Wolcott each of whom is an Independent Trustee. Mr. Wynne currently serves as the chairman of the Audit Committee. The Board of Trustees has adopted a written charter (the "Audit Committee Charter") for the Audit Committee. Pursuant to the Audit Committee Charter, the Audit Committee has the responsibility, among others, to (1) select the Trust's independent registered public accountants; (2) review and approve the scope of the independent registered public accountants' audit activity; (3) oversee the audit process of the financial statements which are the subject of the independent registered public accountants' certifications; and (4) review with such independent registered public accountants the adequacy of the Trust's basic accounting system and the effectiveness of the Trust's internal accounting controls. The Audit Committee meets at least two times per year. The Audit Committee met four times during the Fund's fiscal year ended April 30, 2025.

NOMINATING AND GOVERNANCE COMMITTEE. The Nominating and Governance Committee is comprised of Messrs. Christian, Mansur, Marsini, Jr. and Wynne and Ms. Wolcott. Mr. Mansur serves as the chairman of the Nominating and Governance Committee. The Board of Trustees has adopted a written charter for the Nominating and Governance Committee. The Nominating and Governance Committee is responsible for formulating a statement of corporate governance; assessing the size, structure and composition of the Board of Trustees; determining trustee qualification guidelines as well as compensation, insurance and indemnification of Trustees; identifying Trustee candidates; oversight of Board of Trustees self-evaluations; reviewing certain regulatory and corporate matters of the Trust; and identifying, from time to time, qualified candidates to serve as the CCO for the Trust. The Nominating and Governance Committee meets at least once a year. The Nominating and Governance Committee met two times during the Fund's fiscal year ended April 30, 2025. The Nominating and Governance Committee identifies potential nominees in accordance with its Statement of Policy on Qualifications for Board of Trustees Membership. The Nominating and Governance Committee will consider nominee candidates recommended by shareholders. Shareholders who wish to recommend individuals for consideration by the Nominating and Governance Committee as nominee candidates may do so by submitting a written recommendation to the Secretary of the Trust at: 103 Bellevue Parkway, 2nd Floor, Wilmington, DE 19809. Submissions must include sufficient biographical information concerning the recommended individual, including age, at least ten years of employment history with employer names and a description of the employer's business, and a list of board memberships (if any). The submission must be accompanied by a written consent of the individual to stand for election if nominated by the Board of Trustees and to serve if elected. Recommendations must be received in a sufficient time, as determined by the Nominating and Governance Committee in its sole discretion, prior to the date proposed for the consideration of nominee candidates by the Board of Trustees. Upon the written request of shareholders holding at least a 5% interest in the Trust's shares in the aggregate, the Secretary shall present to any special meeting of shareholders such nominees for election as trustees as specified in such written request.

TRUSTEE QUALIFICATIONS. The following is a brief discussion of the experience, qualifications, attributes and/or skills that led to the Board of Trustees' conclusion that each individual identified below is qualified to serve as a Trustee of the Trust.

The Board of Trustees believes that the Trustees' ability to review critically, evaluate, question and discuss information provided to them, to interact effectively with the Adviser, other service providers, counsel and independent auditors, and to exercise effective business judgment in the performance of their duties, support the conclusion that each Trustee is qualified to serve as a Trustee of the Trust. In addition, the following specific experience, qualifications, attributes and/or skills apply as to each Trustee: Mr. Marsini is the former President of PNC Bank Delaware, former Executive Vice President of Finance of BNY Mellon, former Chief Financial Officer of PNC Global Investment Servicing and currently serves as a Trustee to other mutual fund complexes. Mr. Wynne is the former Chief Executive Officer of US Funds Services, BNY Mellon Asset Servicing, former Chief Executive Officer of PNC Global Investment Servicing and currently serves as a Trustee to other mutual fund complexes. Ms. Wolcott is the former Executive Vice President of US Fund Services, BNY Mellon Asset Servicing, former President of PNC Global Investment Servicing and currently serves as a Trustee to other mutual fund complexes. Mr. Christian served as the Executive Vice President of Wilmington Trust and currently serves as a Trustee to other mutual fund complexes; and Mr. Mansur is a Professor Emeritus at Widener University. He previously served as a Professor of Finance, School of Business Administration, at Widener University and currently serves as a Trustee to other mutual fund complexes.

In its periodic self-assessment of the effectiveness of the Board of Trustees, the Board of Trustees considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board of Trustees' overall composition so that the Board of Trustees, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Trust and its funds. The summaries set forth above as to the experience, qualifications, attributes and/or skills of the Trustees do not constitute holding out the Board of Trustees or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board of Trustees as a whole than would otherwise be the case.

RISK OVERSIGHT. Through its direct oversight role, and indirectly through its Committees, of officers and service providers, the Board of Trustees performs a risk oversight function for the Trust and its funds consisting, among other things, of the following activities: (1) at regular and special Board of Trustees meetings, and on an ad hoc basis as needed, receiving and reviewing reports related to the performance and operations of the Trust and its funds; (2) reviewing and approving, as applicable, the compliance policies and procedures of the Trust; (3) meeting with the portfolio management team to review investment strategies, techniques and the processes used to manage related risks; (4) meeting with representatives of key service providers, including the investment advisers, administrator, the distributor, the transfer agent, the custodian and the independent registered public accounting firms of the funds, to review and discuss the activities of the Trust and its funds and to provide direction with respect thereto; and (5) engaging the services of the Chief Compliance Officer of the Trust to test the compliance procedures of the Trust and its service providers.

SECURITY AND OTHER INTERESTS. The following table sets forth the equity securities in the Fund and in all registered investment companies overseen by the Trustees within the Trust Complex that the Trustees beneficially owned as of December 31, 2024.

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee within the Family of Investment Companies
Independent Trustees		
Robert J. Christian	None	Over \$100,000
Iqbal Mansur	None	Over \$100,000
Nicholas M. Marsini, Jr.	None	None
Nancy B. Wolcott	None	None
Stephen M. Wynne	None	\$50,001 – \$100,000

As of December 31, 2024, none of the Independent Trustees, or any of their immediate family members (i.e., spouse or dependent children) served as an officer, director or was an employee of the Trust, the Adviser or the Underwriter, or of any of their respective affiliates. Nor do any of such persons serve as an officer or director or is an employee of any company controlled by or under common control with such entities. Additionally, as of the same date, none of the Independent Trustees or any of their immediate family members (i.e., spouse or dependent children) owned beneficially or of record any interest in the Adviser or the Underwriter, or in any person directly or indirectly controlling, controlled by, or under common control with such entities.

COMPENSATION. In addition to the fees below, the Trust reimburses the Trustees for their related business expenses. The following table sets forth the aggregate compensation paid to each of the Trustees for the fiscal year ended April 30, 2025.

Name of Trustee	Aggregate Compensation from the Trust	Pension or Retirement Benefits Accrued as Part of the Trust's Expenses	Estimated Annual Benefits upon Retirement	Total Compensation from the Trust Complex
Robert J. Christian	\$ 120,639	\$ 0	\$ 0	\$ 120,639
Iqbal Mansur	\$ 135,586	\$ 0	\$ 0	\$ 135,586
Nicholas M. Marsini, Jr.	\$ 145,492	\$ 0	\$ 0	\$ 145,492
Nancy B. Wolcott	\$ 120,579	\$ 0	\$ 0	\$ 120,579
Stephen M. Wynne	\$ 140,509	\$ 0	\$ 0	\$ 140,509

CODE OF ETHICS

In accordance with Rule 17j-1 of the 1940 Act, each of the Trust and the Adviser have adopted a code of ethics (each, a "Code" and together, the "Codes").

The Codes are intended to prohibit or restrict transactions that may be deemed to create a conflict of interest among the Adviser or the Trust. Each Code identifies the specific employees, officers or other persons who are subject thereto and all are required to abide by the provisions thereunder. Persons covered under the Codes may engage in personal trading for their own accounts, including securities that may also be purchased or held or traded by the Fund under certain circumstances.

Under the Code adopted by the Trust, personal trading is subject to specific restrictions, limitations, guidelines and other conditions. Under the Code adopted by the Adviser, personal trading is subject to pre-clearance and other conditions set forth in its Code.

On an annual basis or whenever deemed necessary, the Board of Trustees reviews reports regarding all of the Codes including information about any material violations of the Codes. The Codes are on public file as exhibits to the Trust's registration statement with the SEC.

PROXY VOTING

The Board of Trustees has adopted the Adviser's proxy voting procedures and has delegated the responsibility for exercising the voting rights associated with the securities purchased and/or held by the Fund to the Adviser, subject to the Board of Trustees' continuing oversight. In exercising its voting obligations, the Adviser is guided by general fiduciary principles. It must act prudently, solely in the interest of the Fund, and for the purpose of providing benefits to the Fund. The Adviser will consider the factors that could affect the value of the Fund's investment in its determination on a vote.

The Adviser has identified certain significant contributors to shareholder value with respect to a number of common or routine matters that are often the subject of proxy solicitations for shareholder meetings. The proxy voting procedures address these considerations and establish a framework for consideration of a vote that would be appropriate for the Fund. In particular, the proxy voting procedures outline principles and factors to be considered in the exercise of voting authority for proposals addressing such common or routine matters.

The Adviser's proxy voting procedures establish a protocol for voting of proxies in cases in which the Adviser or an affiliated entity has an interest that is reasonably likely to be affected by a proxy to be voted on behalf of the Fund or that could compromise the Adviser's independence of judgment and action in voting the proxy in the best interest of the Fund's shareholders. The Adviser believes that consistently voting in accordance with its stated guidelines will address most conflicts of interest, and to the extent any deviation of such guidelines occurs it will be carefully assessed by a securities review committee to determine if a conflict of interest exists, and if a material conflict of interest exists, the committee will determine an appropriate resolution, which may include consultation with management or Trustees of the Trust, analyses by independent third parties, or other means necessary to ensure and demonstrate the proxy was voted in the best interests of shareholders. The Adviser's proxy voting policies and procedures are attached herewith as Appendix B. The Fund is required to file annually its proxy voting record on Form N-PX with the SEC. Form N-PX is required to be filed by August 31 of each year and when filed will be available without charge by request by calling the Fund at (888) 426-7515 or on the SEC's website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of the Fund. Any person who directly or indirectly owns 5% or more of the outstanding voting securities of the Fund, may be deemed an "affiliated person" of the Fund, as such term is defined in the 1940 Act. A control person is one who owns, either directly or indirectly, more than 25% of the voting securities of a company or acknowledges the existence of control. As of the date of this SAI, the Fund could be deemed under control of the Adviser or affiliates of the Adviser, who had voting authority with respect to approximately 100% of the value of the outstanding interest in the Fund on such date. However, the Trust believes that once the Fund commences investment operations and the Fund's shares are sold to the public, the Adviser's or its affiliates' control will be diluted over time. Additionally, as of the same date, none of the Trustees and officers of the Trust owned individually and together in excess of 1% of the outstanding shares of the Fund.

See also, "Book Entry Only System" regarding the DTC which acts as securities depository for the shares.

INVESTMENT ADVISORY SERVICES

Polen Capital Credit, LLC (“Polen Credit” or the “Adviser”) is a registered investment adviser headquartered at 1075 Main Street, Suite 320, Waltham, Massachusetts 02451. Polen Credit was founded in 1996 as DDJ Capital Management, LLC and, in addition to serving as the investment adviser to the Fund, provides portfolio management services to pension and profit sharing plans, other pooled investment vehicles, charitable organizations, state or municipal government agencies and other institutional investors. As of June 30, 2025, Polen Credit had approximately \$6.6 billion in assets under management. Polen Credit is wholly-owned by Polen Capital Management, LLC, 1825 NW Corporate Blvd., Suite 300, Boca Raton, FL 33431, an investment adviser registered with the SEC.

Pursuant to an investment advisory agreement between the Trust and the Adviser, the Adviser manages the assets of the Fund (the “Investment Advisory Agreement”). The Investment Advisory Agreement has an initial term of two years and continues in effect from year to year thereafter if such continuance is specifically approved at least annually by the Board of Trustees including a majority of the Independent Trustees casting votes in person at a meeting called for such purpose, or by vote of a majority of the outstanding voting securities of the Fund. The Investment Advisory Agreement may be terminated by the Fund on 60 days’ written notice or the Adviser on 90 days’ written notice without penalty. The Investment Advisory Agreement will also terminate automatically in the event of its assignment as defined in the 1940 Act. Polen Credit, subject to the general oversight of the Trust’s Board of Trustees, has overall responsibility for directing the investments of the Fund in accordance with its investment objectives, policies and limitations.

Pursuant to the Investment Advisory Agreement, Polen Credit is entitled to receive a unified management fee, which is calculated daily and paid monthly, at an annual rate as a percentage of the average daily net assets of the Fund of 0.75%.

The management fee is structured as a “unified fee.” Polen Credit has agreed to pay all expenses incurred by the Fund except for the following expenses, each of which is paid by the Fund: interest and other costs of borrowing; taxes and other governmental fees; brokerage expenses, trading expenses and other expenses in connection with the execution of portfolio transactions or in connection with creation and redemption transactions; acquired fund fees and expenses; accrued deferred tax liability; extraordinary expenses and other non-routine expenses of the Fund; payments under the Fund’s 12b-1 Plan (if activated); and the management fee payable to the Adviser. With respect to the Fund, the Adviser has contractually agreed to waive 0.20% (20 basis points) of its investment advisory fee (the “Fee Waiver”). The Fee Waiver will remain in place for one year after the commencement of the Fund’s investment operations, unless the Board of Trustees approves its earlier termination.

In rendering investment advisory services, the Adviser may use the portfolio management, research and other resources of Polen Capital UK LLP, an affiliate of the Adviser. Polen Capital UK LLP is not registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended. Polen Capital UK LLP is considered a “*participating affiliate*” of the Adviser as that term is used in relief granted by the staff of the SEC allowing U.S. registered investment advisers to use portfolio management or research resources of advisory affiliates subject to the supervision of a registered adviser. Investment professionals from Polen Capital UK LLP may render portfolio management, research and other services to the Fund.

Under the terms of the Investment Advisory Agreement, subject to the supervision of the Board of Trustees of the Trust, the Adviser will provide for the management of the Fund including (i) the provision of a continuous investment program for the Fund, including investment research and management with respect to all securities, investments, cash and cash equivalents in the Fund, (ii) the determination from time to time of what securities and other investments will be purchased, retained, or sold for the Fund, (iii) the placement from time to time of orders for all purchases and sales made for the Fund, (iv) the entering into, execution and delivery of all agreements, certificates, and documents for the purchase, sale and other dealings related to investments of the Fund (including, without limitation, assignment agreements with respect to bank loan transactions), in its capacity as investment adviser on behalf of the Fund; (v) in connection with its management of the Fund, monitoring and assistance with anticipated purchases and redemptions of Creation Units (as defined in the Fund’s Prospectus and SAI) by shareholders and new investors, (vi) the determination of the amount of the cash component, the identity and number of shares of the securities to be accepted in exchange for “Creation Units” for the Fund and the securities that will be applicable that day to redemption requests received for the Fund (and may give directions to the Fund’s custodian with respect to such designations), (vii) the coordination of the Fund’s compliance with rules of the applicable securities exchange on which the Fund’s shares

are listed, and (viii) the establishment, monitoring and maintaining the Fund's website to comply with applicable law. Additionally, the Adviser agrees to create and maintain all necessary records in accordance with all applicable laws, rules and regulations pertaining to the various functions performed by it and not otherwise created and maintained by another party pursuant to contract with the Fund. The Trust and/or the Adviser may at any time or times, upon approval by the Board of Trustees, enter into one or more sub-advisory agreements with a sub-adviser pursuant to which the Adviser delegates any or all of its duties as listed.

The Investment Advisory Agreement provides that the Adviser shall not be liable for any loss suffered by a Fund in connection with the matters to which the agreement relates, except resulting from a breach of fiduciary duty with respect to the receipt of compensation for services, or to the extent of a loss resulting from willful misfeasance, bad faith or gross negligence on its part in the performance of its obligations and duties under the agreement.

The salaries of personnel of the Adviser performing services for the Fund relating to research, statistical and investment activities are paid by the Adviser.

Polen Credit is wholly owned and controlled by Polen Capital. Polen Capital is controlled by its Management Committee. The Management Committee comprises Stan C. Moss, CEO, Daniel Davidowitz, Portfolio Manager and Analyst, and Damon Ficklin, Head of Team, Portfolio Manager and Analyst, and the Management Committee is controlled by Messrs. Moss and Davidowitz.

PORTFOLIO MANAGERS

The management of the Fund is the responsibility of investment professionals employed by the Adviser. The information provided below supplements the information provided in the Prospectus under the heading "Portfolio Manager" with respect to the investment professionals responsible, either individually or jointly, for the day-to-day management of the Fund, including information regarding:

- (i) "Other Accounts Managed." Other accounts managed by Mr. Ben Pakenham and Adam Tabor who are the Portfolio Managers responsible for the day-to-day management of the Fund as the date of this SAI.
- (ii) "Material Conflicts of Interest." Material conflicts of interest identified by the Adviser that may arise in connection with the Portfolio Manager's management of the Fund's investments and investments of other accounts managed. These potential conflicts of interest include material conflicts between the investment strategy of the Fund and the investment strategy of the other accounts managed by the Portfolio Manager and conflicts associated with the allocation of investment opportunities between the Fund and other accounts managed by the Portfolio Manager. Additional conflicts of interest may potentially exist or arise that are not discussed below;
- (iii) "Compensation." A description of the structure of and method used to determine the compensation received by the Fund's Portfolio Manager or management team members from the Fund, the Adviser or any other source with respect to managing the Fund and any other accounts; and
- (iv) "Ownership of Securities." Information regarding the Portfolio Manager's dollar range of equity securities beneficially owned in the Fund as of the date of this SAI.

Other Accounts Managed. The table below includes details regarding the number of other registered investment companies, other pooled investment vehicles and other accounts managed by Ben Pakenham and Adam Tabor, total assets under management for each type of account and total assets in each type of account with performance-based advisory fees as of November 30, 2025:

Type of Accounts	Total Number of Accounts Managed	Total Assets (millions)	Number of Accounts Managed subject to a Performance Based Advisory Fee	Total Assets Managed subject to a Performance Based Advisory Fee (millions)
Ben Pakenham				
Other Registered Investment Companies:	-	\$ -	-	\$ -
Other Pooled Investment Vehicles:	1	\$ 21.89	-	\$ -
Other Accounts:	-	\$ -	-	\$ -
Adam Tabor				
Other Registered Investment Companies:	-	\$ -	-	\$ -
Other Pooled Investment Vehicles:	1	\$ 21.89	-	\$ -
Other Accounts:	-	\$ -	-	\$ -

Material Conflicts of Interest. Polen Credit provides advisory services to other clients which invest in securities of the same type in which the Fund invests. The Adviser is aware of its obligation to ensure that when orders for the same securities are entered on behalf of the Fund and other accounts, the Fund receives fair and equitable allocation of these orders, particularly where affiliated accounts may participate. The Adviser attempts to mitigate potential conflicts of interest by adopting policies and procedures regarding trade execution, brokerage allocation and order aggregation which provide a methodology for ensuring fair treatment for all clients in situations where orders cannot be completely filled or filled at different prices.

Compensation. The Adviser compensates the Fund’s portfolio managers for management of the Fund. Each portfolio manager’s compensation consists of (i) a base salary, (ii) a year-end bonus and (iii) awards of equity-like (“phantom”) interests in the Adviser, entitling each portfolio manager to an additional distribution based on the revenue and/or profits of the Adviser and/or its parent company. The Adviser’s compensation strategy is to provide each portfolio manager with a reasonable base salary commensurate with their responsibility together with a performance bonus award. Total compensation of the Fund’s portfolio managers is not directly related to the Fund’s performance. Ownership of Shares of the Fund. The Fund is required to show the dollar range of a portfolio manager’s “beneficial ownership” of Shares as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934. As of the date of this SAI, the Fund had not yet commenced investment operations or issued shares.

ADMINISTRATION AND ACCOUNTING SERVICES

Pursuant to an Administration and Accounting Services Agreement dated July 19, 2007, The Bank of New York Mellon performs certain administrative services for the Trust including, among other things, assisting in the preparation of the annual post-effective amendments to the Trust’s registration statement, assisting in obtaining the fidelity bond and trustees’ and officers’/errors and omissions insurance policies, preparing notices, agendas, and resolutions for quarterly Board of Trustees meetings, maintaining the Trust’s corporate calendar, maintaining Trust contract files and providing executive and administrative services to support the Independent Trustees. The Bank of New York Mellon also performs certain administrative and accounting services for the Trust such as preparing shareholder reports, providing statistical and research data, assisting the Adviser in compliance monitoring activities, and preparing and filing federal and state tax returns on behalf of the Trust. In addition, The Bank of New York Mellon prepares and files certain reports with the appropriate regulatory agencies and prepares certain materials required by the SEC or any state securities commission having jurisdiction over the Trust. The accounting services performed by The Bank of New York Mellon include determining the NAV per share of the Fund and maintaining records relating to the securities transactions of the Fund.

ADDITIONAL SERVICE PROVIDERS

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM. Cohen & Company, Ltd., 1835 Market St., Suite 310, Philadelphia, PA 19103, serves as the independent registered public accounting firm to the Fund.

LEGAL COUNSEL. Troutman Pepper Locke LLP, 3000 Two Logan Square, 18th and Arch Streets, Philadelphia, PA 19103, serves as counsel to the Trust.

CUSTODIAN. The Bank of New York Mellon (the “Custodian”), 240 Greenwich Street, New York, NY 10286, serves as the Fund’s custodian. The Custodian’s services include, in addition to the custody of all cash and securities owned by the Trust, the maintenance of custody accounts in the Custodian’s trust department, the segregation of all certificated securities owned by the Trust, the appointment of authorized agents as sub-custodians, disbursement of funds from the custody accounts of the Trust, releasing and delivering securities from the custody accounts of the Trust, maintaining records with respect to such custody accounts, delivering to the Trust a daily and monthly statement with respect to such custody accounts and causing proxies to be executed. The Fund has made arrangements with BNY Mellon Investment Servicing Trust Company to serve as custodian for Individual Retirement Accounts (“IRAs”).

TRANSFER AGENT. BNY Mellon Investment Servicing (US) Inc. (“BNY Mellon Investment Servicing”), 500 Ross Street, 154-0520, Pittsburgh, PA 15262, serves as the Trust’s Transfer Agent and Dividend Paying Agent.

OTHER SERVICE PROVIDERS. The Trust has engaged Tidal ETF Services LLC, 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204 to provide persons to serve as Principal Executive Officer and Principal Financial Officer and provide various other services for the Trust. The Trust has engaged Chenery Compliance Group, LLC to provide on-going compliance services, including providing an individual to serve as the Chief Compliance Officer and Anti-Money Laundering Officer for the Trust.

OFFERING PRICE

The Fund offers and issues its shares at its NAV only in aggregations of a specified number of shares (each, a “Creation Unit”). The Fund generally offers and issues shares either in exchange for (i) specified cash payment equal to the aggregate NAV of a Creation Unit, (ii) a basket of securities designated by the Fund (“Deposit Securities”) together with the deposit of a specified cash payment (“Cash Component”) (or a cash payment equal in value to the Deposit Securities (“Deposit Cash”) together with the Cash Component). The primary consideration accepted by the Fund (*i.e.*, Cash Payment, Deposit Securities or Deposit Cash) is set forth under “Purchase and Redemption of Creation Units” later in this SAI. The Trust reserves the right to permit or require the substitution of Deposit Cash to replace any Deposit Security, which shall be added to the Cash Component. The Trust also reserves the right to: permit or require the substitution of Deposit Securities in lieu of Deposit Cash (subject to applicable legal requirements). The Trust also reserves the right to deviate from a representative selection of the Fund’s portfolio holdings as part of the Deposit Securities if such deviation is in the best interests of the Fund and its shareholders. The shares have been approved for listing and secondary trading on a national securities exchange. The shares will trade on the exchange at market prices. These prices may differ from the shares’ NAVs. The shares are also redeemable only in Creation Unit aggregations, and generally in exchange either for (i) cash (subject to applicable legal requirements), or (ii) portfolio securities and a specified cash payment. For the preceding, the Trust reserves the right to deviate from a representative selection of the Fund’s portfolio holdings if such deviation is in the best interests of the Fund and its shareholders.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions including a requirement to maintain on deposit with the Trust cash at least equal to a specified percentage of the market value of the missing Deposit Securities as set forth in the applicable participant agreement. See “Purchase and Redemption of Creation Units” below. The Trust may impose a transaction fee for each creation or redemption. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities. In addition to the fixed creation or redemption transaction fee, an additional transaction fee of up to three times the fixed creation or redemption transaction fee and/or an additional variable charge may apply as discussed in the section “Purchase and Redemptions of Creation Units” below.

CONTINUOUS OFFERING

The method by which Creation Units of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by the Trust on an ongoing basis, at any point a “distribution,” as such term is used in the 1933 Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the 1933 Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the 1933 Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the 1933 Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus-delivery obligation with respect to shares of the Fund are reminded that under 1933 Act Rule 153, a prospectus-delivery obligation under Section 5(b)(2) of the 1933 Act owed to an exchange member in connection with a sale on an exchange is satisfied by the fact that the Fund’s prospectus is available at the exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

The Adviser or its affiliates (the “Selling Shareholder”) may purchase Creation Units through a broker-dealer to “seed” (in whole or in part) funds as they are launched, or may purchase shares from broker-dealers or other investors that have previously provided “seed” for funds when they were launched or otherwise in secondary market transactions, and because the Selling Shareholder may be deemed an affiliate of such funds, the Fund’s shares are being registered to permit the resale of these shares from time to time after purchase. The Fund will not receive any of the proceeds from the resale by the Selling Shareholders of these Fund shares.

The Selling Shareholder intends to sell all or a portion of the Fund shares owned by it and offered hereby from time to time directly or through one or more broker-dealers and may also hedge such positions. The Fund shares may be sold on any national securities exchange on which the Fund shares may be listed or quoted at the time of sale, in the over-the-counter market or in transactions other than on these exchanges or systems at fixed prices, at prevailing market prices at the time of the sale, at varying prices determined at the time of sale, or at negotiated prices. These sales may be effected in transactions, which may involve cross or block transactions.

The Selling Shareholder may also loan or pledge Fund shares to broker-dealers that in turn may sell such Fund shares, to the extent permitted by applicable law. The Selling Shareholder may also enter into options or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of Fund shares, which Fund shares such broker-dealer or other financial institution may resell.

The Selling Shareholder and any broker-dealer or agents participating in the distribution of Fund shares may be deemed to be “underwriters” within the meaning of Section 2(a)(11) of the 1933 Act in connection with such sales. In such event, any commissions paid to any such broker-dealer or agent and any profit on the resale of the Fund shares purchased by them may be deemed to be underwriting commissions or discounts under the 1933 Act. The Selling Shareholder who may be deemed an “underwriter” within the meaning of Section 2(a)(11) of the 1933 Act will be subject to the applicable prospectus delivery requirements of the 1933 Act.

EXCHANGE LISTING AND TRADING

Shares are listed for trading and trade throughout the day on the Fund's Principal U.S. Listing Exchange: NYSE Arca, Inc. (the "Exchange").

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Fund's prospectus under "Purchase and Sale of Fund Shares" and "Additional Purchase and Sale Information." The discussion below supplements, and should be read in conjunction with, such sections of the Fund's Prospectus.

Shares are approved for listing and trading on the Exchange, subject to notice of issuance. Shares trade on the Exchange at prices that may differ to some degree from their NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares of the Fund will continue to be met.

The Exchange may consider the suspension of trading in, and may initiate delisting proceedings of, the shares of the Fund under any of the following circumstances: (i) if the Exchange becomes aware that the Fund is no longer eligible to operate in reliance on Rule 6c-11 under the 1940 Act; (ii) if the Fund no longer complies with the applicable listing requirements set forth in the Exchange's rules; (iii) if, following the initial twelve-month period after commencement of trading on the Exchange of the Fund, there are fewer than 50 beneficial holders of the Fund; or (iv) if such other event shall occur or condition exists which, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares from listing and trading upon termination of the Fund. The Trust reserves the right to adjust the share price of the Fund in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

As in the case of other publicly traded securities, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

The base and trading currencies of the fund is the U.S. dollar. The base currency is the currency in which the Fund's NAV per share is calculated and the trading currency is the currency in which shares of the Fund are listed and traded on the Exchange.

BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the prospectus entitled "Additional Purchase and Sale Information."

The DTC acts as securities depository for the shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC. Except in the limited circumstance provided below, certificates will not be issued for shares. DTC, a limited-purpose trust company, was created to hold securities of its participants (the "DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the depositary agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of the Fund held by each DTC Participant. The Trust, either directly or through a third-party service, shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust, either directly or through a third-party service, shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant and/or third-party service a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

BROKERAGE ALLOCATION AND OTHER PRACTICES

Subject to policies established by the Board of Trustees, the Adviser is primarily responsible for the execution of the Fund's portfolio transactions and the allocation of brokerage. The Adviser has no obligation to deal with any dealer or group of dealers in the execution of transactions in portfolio securities of the Fund. The Adviser often deals directly with the dealers who make a market in the securities involved except in those circumstances where better prices and execution are available elsewhere. It is the objective of the Adviser to seek to obtain the best results in conducting portfolio transactions for the Fund, taking into account such factors as price (including the applicable dealer-spread or commission), the size, type and difficulty of the transaction involved, the firm's general execution and operations facilities and the firm's risk in positioning the securities involved. The cost of portfolio securities transactions of the Fund primarily consists of dealer or underwriter spreads and brokerage commissions.

While reasonable competitive spreads or commissions are sought, the Fund will not necessarily be paying the lowest spread or commission available. Subject to obtaining the best net results, dealers who provide supplemental investment research (such as quantitative and modeling information assessments and statistical data and provide other similar services) to the Adviser may receive orders for transactions by the Fund. Information so received will be in addition to and not in lieu of the services required to be performed by the Adviser under the Investment Advisory Agreement and the expense of the Adviser will not necessarily be reduced as a result of the receipt of such supplemental information. Supplemental investment research obtained from such dealers may be used by the Adviser in servicing all of its accounts and such research may or may not be useful to the Adviser in connection with the Fund. In all cases, the Adviser understands its on-going obligation to seek "best execution" of its clients' transactions. The Adviser considers the range of services provided by brokers in selecting those with whom to place trades including, but not limited to, commission rate, execution capability, responsiveness, and financial responsibility. In general, the Adviser receives a limited amount of research and/ or brokerage services paid for by brokers. Polen Capital, the parent

company of the Adviser, maintains a Best Execution Committee, which is comprised of representatives from trading, operations, portfolio management, investment research, and compliance teams (including certain representatives of the Adviser). The Best Execution Committee meets quarterly and is responsible for overseeing the Adviser's trading activities in accordance with the Adviser's Best Execution Policies and Procedures. The Best Execution Committee evaluates brokerage relationships annually.

Under the 1940 Act, except as permitted by exemptive order or rule, persons affiliated with the Fund are prohibited from dealing with the Fund as principal in the purchase and sale of securities. However, affiliated persons of the Fund may serve as its brokers in certain over-the-counter transactions conducted on an agency basis.

Because the Fund has not yet commenced operations, it has not, as of the date of this SAI, engaged in any brokerage transactions directed pursuant to the Adviser's internal allocation procedures.

Securities held by the Fund may also be held by, or be appropriate investments for, other funds or investment advisory clients for which the Adviser or its affiliates act as an adviser. Because of different investment objectives or other factors, a particular security may be bought for an advisory client when other clients are selling the same security. If purchases or sales of securities by the Adviser for the Fund or other funds for which it acts as investment adviser or for other advisory clients arise for consideration at or about the same time, transactions in such securities may be made, insofar as are feasible, for the respective funds and clients in a manner deemed by the Adviser to be on a fair and equitable basis. Transactions effected by the Adviser (or its affiliates) on behalf of more than one of its clients during the same period may increase the demand for securities being purchased or the supply of securities being sold, causing an adverse effect on price.

Because the Fund has not yet commenced operations, it has not paid any brokerage commissions as of the date of this SAI.

Neither the Fund nor the Adviser has an agreement or understanding with a broker-dealer, or other arrangements to direct the Fund's brokerage transactions to a broker-dealer because of the research services such broker provides to the Fund or the Adviser.

The Fund may at times invest in securities of its regular broker-dealers or a parent of its regular broker-dealers. Because the Fund has not yet commenced operations, it has not acquired any securities of its regular broker dealers, or any parent thereof, as of the date of this SAI.

ADDITIONAL COMPENSATION TO FINANCIAL INTERMEDIARIES

The additional compensation to financial intermediaries described in the Prospectus may be calculated based on factors determined by the Adviser and its affiliates from time to time, including: the value of the Fund's shares sold to, or held by, a financial intermediary's customers; gross sales of the Fund's shares by a financial intermediary; or a negotiated lump sum payment.

In addition to the additional cash payments to financial intermediaries described in the Prospectus, subject to applicable FINRA rules and regulations, the Adviser and its affiliates may provide compensation to financial intermediaries that may enable the Adviser and its affiliates to sponsor or participate in educational or training programs, sales contests and other promotions involving the sales representatives and other employees of financial intermediaries in order to promote the sale of the Fund's shares. The Adviser and its affiliates may also pay for the travel expenses, meals, lodging and entertainment of financial intermediaries and their sales representatives and other employees in connection with such educational or training programs, sales contests and other promotions. These payments may vary with each such event.

DISTRIBUTION OF SHARES AND RULE 12B-1 PLAN

Foreside Funds Distributors LLC, a wholly owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group) (the "Underwriter"), located at 190 Middle Street, Suite 301, Portland, ME 04101, serves as a principal underwriter of the Fund's shares pursuant to an Underwriting Agreement with the Trust. Pursuant to the terms of the Underwriting Agreement, the Underwriter continuously distributes shares of the Fund on a best efforts basis. The Underwriter has

no obligation to sell any specific quantity of shares of the Fund. The Underwriter and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Fund. Shares will be continuously offered for sale by series of the Trust through the Underwriter only in Creation Units, as described in the prospectus and in this SAI under "Purchase and Redemption of Creation Units." Shares in less than Creation Units are not distributed by the Underwriter, nor does the Underwriter maintain a secondary market in fund shares. The Underwriter will deliver the prospectus to persons purchasing Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Underwriter is a broker-dealer registered under the Securities Exchange Act of 1934 and a member of FINRA. An affiliate of the Underwriter may assist Authorized Participants (defined below) in assembling shares to purchase Creation Units or upon redemption, for which it may receive commissions or other fees from such Authorized Participants (defined below). The Underwriter also serves as distributor for other affiliated registered funds.

To the extent that the Underwriter receives fees under the Fund's Plan of Distribution adopted pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan"), the Underwriter will furnish or enter into arrangements with broker-dealers, financial intermediaries, or other financial institutions for the furnishing of marketing or sales services with respect to the Fund's shares as may be required pursuant to such plan.

Moreover, to the extent that the Underwriter receives shareholder service fees under any shareholder services plan adopted by the Fund, the Underwriter will furnish or enter into arrangements with broker-dealers, financial intermediaries, or other financial institutions for the furnishing of personal or account maintenance services with respect to the relevant shareholders of the Fund as may be required pursuant to such plan. The Underwriter receives no underwriting commissions or Rule 12b-1 fees in connection with the sale of the Fund's Institutional Class shares. The Trustees of the Trust, including a majority of Independent Trustees, have determined that there is a reasonable likelihood that the 12b-1 Plan will benefit the Trust, the Fund and the shareholders of the Fund's shares.

The Underwriter may furnish or enter into agreements with selected broker-dealers, banks or other financial institutions for the sale of Creation Units of Fund shares. With respect to certain financial institutions and related fund "supermarket" platform arrangements, the Fund and/or the Adviser, rather than the Underwriter, typically enter into such agreements. These financial institutions may charge a fee for their services and may receive shareholder service or other fees from the Adviser and/or the Fund. These financial institutions may otherwise act as processing agents and are responsible for transmitting purchase, redemption and other requests to the Fund.

The Underwriting Agreement continues in effect for successive annual periods provided such continuance is approved at least annually by a majority of the Trustees, including a majority of the Independent Trustees. The Underwriting Agreement provides that the Underwriter, in the absence of willful misfeasance, bad faith or negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the agreement, will not be liable to the Fund or its shareholders for losses arising in connection with the sale of Fund shares.

The Underwriting Agreement terminates automatically in the event of an assignment. The Underwriting Agreement is also terminable without payment of any penalty with respect to the Fund (i) by vote of a majority of the Trustees of the Trust who are not interested persons of the Trust or the Fund and who have no direct or indirect financial interest in the operation of the 12b-1 Plan of the Fund or any agreements related to the 12b-1 Plan or by vote of a majority of the outstanding voting securities of the Fund on sixty (60) days written notice to the Underwriter; or (ii) by the Underwriter on sixty (60) days written notice to the Fund. The Underwriter will be compensated for distribution services according to the 12b-1 Plan regardless of the Underwriter's expenses. The Underwriter uses the entire 12b-1 for distribution expenses and does not retain any amounts for profit. The Underwriter does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a 12b-1 Plan is effective. The Adviser pays the Underwriter a fee for certain distribution-related services.

The 12b-1 Plan provides that the Underwriter will be paid for distribution activities such as public relations services, telephone services, sales presentations, media charges, preparation, printing and mailing advertising and sales literature, data processing necessary to support a distribution effort and printing and mailing of prospectuses to prospective shareholders. Additionally, the Underwriter may pay certain financial institutions such as banks or broker-dealers who have entered into servicing agreements with the Underwriter and other financial institutions for distribution and shareholder servicing activities.

The 12b-1 Plan further provides that payment shall be made for any month only to the extent that such payment does not exceed 0.25% on an annualized basis of the Fund's shares average net assets, except with respect to limitations set from time to time by the Board of Trustees.

Under the 12b-1 Plan, if any payments made by the Adviser out of its advisory fee, not to exceed the amount of that fee, to any third parties (including banks), including payments for shareholder servicing and transfer agent functions, were deemed to be indirect financing by a Fund of the distribution of its shares, such payments are authorized. The Fund may execute portfolio transactions with and purchase securities issued by depository institutions that receive payments under the 12b-1 Plan. No preference for instruments issued by such depository institutions is shown in the selection of investments.

CAPITAL STOCK AND OTHER SECURITIES

The Trust issues and offers one class of shares of the Fund. The shares of the Fund, when issued and paid for in accordance with the Prospectus, will be fully paid and non-assessable shares, with equal voting rights and no preferences as to conversion, exchange, dividends, redemption or any other feature.

The net income attributable to the shares and the dividends payable on such shares will be reduced by the amount of any applicable shareholder service or Rule 12b-1 distribution fees. Accordingly, the NAV of the shares will be reduced by such amount to the extent the Fund has undistributed net income.

Shares of the Fund entitle holders to one vote per share and fractional votes for fractional shares held. Shares have non-cumulative voting rights, do not have preemptive or subscription rights and are transferable. The Fund takes separate votes on matters affecting only that Fund's shares.

The Fund does not hold an annual meeting of shareholders. The Trustees are required to call a meeting of shareholders for the purpose of voting upon the question of removal of any Trustee when requested in writing to do so by the shareholders of record owning not less than 10% of the Fund's outstanding shares.

PURCHASE AND REDEMPTION OF CREATION UNITS

The Trust issues and redeems shares of the Fund on any Business Day (as defined below) only in Creation Units on a continuous basis through the Underwriter, without a sales load but subject to the transaction fees described below, at the NAV next determined after receipt of an order in proper form. The number of shares of the Fund that constitute a Creation Unit is 10,000. The Creation Unit size of the Fund may change, and an Authorized Participant (defined below) will be notified of such change.

The Fund is open on every "Business Day," which is any day the Exchange is open. The Exchange is generally open for trading Monday through Friday and are generally closed on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. On days when the Exchange or the bond markets close earlier than normal, the Fund may require orders to create or redeem Creation Units to be placed earlier in the day.

See "Purchase of Creation Units" and "Acceptance of Orders for and Redemption of Creation Units" below for more information about transacting in the shares of the Fund. The Board reserves the right to declare a split or a consolidation in the number of shares outstanding of the Fund, and may make a corresponding change in the number of shares constituting a Creation Unit, in the event that the per shares price in the secondary market rises (or declines) to an amount that falls outside the range deemed desirable by the Adviser or the Board or for any other reason.

Purchase of Creation Units. Creation Units may be purchased and redeemed only by or through a member or participant of a clearing agency registered with the SEC, which has entered into an Authorized Participant Agreement with the Underwriter that allows such member or participant to place orders for the purchase and redemption of Creation Units (an "Authorized Participant"). Such Authorized Participant will agree to certain conditions, pursuant to the terms of such Authorized Participant Agreement and on behalf of itself or any investor on whose behalf it will act. Investors who are not Authorized Participants must make appropriate arrangements with an Authorized Participant to purchase or redeem Creation Units. Investors should be aware that their particular broker may not be an Authorized

Participant and that Creation Unit orders may have to be placed by the investor's broker through an Authorized Participant, which may result in additional charges to such investor. A list of current Authorized Participants may be obtained from the Underwriter.

Investors who are not Authorized Participants may purchase and sell shares of the Fund in any amount on the secondary market.

Because the portfolio securities of the Fund may trade on days that the Exchanges are closed or are otherwise not Business Days for the Fund, investors may not be able to purchase or redeem Creation Units of the Fund, or buy or sell shares of the Fund on days when the NAV of the Fund could be significantly affected by events in the relevant non-U.S. markets.

The consideration for the purchase of a Creation Unit of the Fund consists of either (i) for cash purchase, the specified cash payment equal to the aggregate NAV of a Creation Unit (the "Cash Payment") or (ii) for in-kind purchases, an in-kind deposit of a designated portfolio of securities (the "Deposit Securities") (or cash for all or any portion of such Deposit Securities ("Deposit Cash")), and the Cash Component, which is an amount equal to the difference between the aggregate NAV of a Creation Unit and the Deposit Securities. The term "Fund Deposit" as used herein means, (i) for cash purchase, the Cash Payment; or (ii) for in-kind purchases, collectively, the Deposit Securities and/or Deposit Cash, as applicable, and the Cash Component. Currently, the Trust anticipates that Creation Units will be purchased in cash.

The Custodian or the Administrator expects to make available through the National Securities Clearing Corporation ("NSCC") on each Business Day, prior to the opening of regular trading on the Exchanges, the required Cash Payment (for cash purchases) or the list of names and the required number of shares of each Deposit Security and the required amount of Deposit Cash (for in-kind purchases), as applicable, and the estimated amount of the Cash Component to be included in the current Fund Deposit for that Business Day.

The identity and number of shares of the Deposit Securities may change pursuant to, among other matters, changes in the composition of the Fund's portfolio and as rebalancing adjustments and corporate action events are reflected from time to time and when Custom Baskets (defined below) are used. Cash purchases of Creation Units will be effected in essentially the same manner as in-kind purchases. The Authorized Participant will pay the required Deposit Cash plus or minus the same Cash Component. The means by which the Fund Deposit are to be delivered by the Authorized Participant to the Fund are set forth in the Authorized Participant Agreement, except to the extent the Underwriter and the Authorized Participant otherwise agree. Fund shares will be settled through the DTC system.

To the extent the Fund permits or requires in-kind purchase of Creation Units, the Trust reserves the right to permit or require the substitution of Deposit Cash to replace any Deposit Security, which shall be added to the Cash Component, including, without limitation, situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery, (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant (as discussed below) or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws, or (v) in certain other situations (collectively, "non-standard orders"). The Trust also reserves the right to: permit or require the substitution of Deposit Securities in lieu of Deposit Cash. The adjustments described above will reflect changes, known to the Adviser on the date of announcement to be in effect by the time of delivery of a Fund Deposit, resulting from certain corporate actions.

To the extent that the Adviser, on behalf of the Fund, may need to convert subscriptions that are made in whole or in part in cash into a foreign currency prior to purchasing investments denominated in foreign currencies at the applicable exchange rate and subject to the applicable spread, Creation Unit purchasers bear the risk associated with changes in the currency exchange rate and security value between the time they place their order and the time that the Fund converts any cash received into foreign investments.

Placement of Purchase Orders. To initiate an order for a Creation Unit, an Authorized Participant must submit to the Underwriter an irrevocable order in proper form to purchase shares of the Fund on a Business Day generally before the time as of which that day's NAV is calculated. The NAV of the Fund is calculated and determined once daily as

of the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time, or at the time as of which the Exchange establishes official closing prices) on each day that the Exchange is open. For a purchase order to be processed based on the NAV calculated on a particular Business Day, the purchase order must be received in proper form and accepted by the Trust prior to the time the applicable NAV is calculated and the order window, as established for the Fund, is closed (“Cutoff Time”). Investors who are not Authorized Participants and seek to place a purchase order for a Creation Unit through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Underwriter by the Cutoff Time on such Business Day. On days when the applicable Exchange or the bond markets close earlier than normal, the Fund may require orders to create Creation Units to be placed earlier in the day. Orders requesting a change in the Deposit Securities as disseminated through NSCC for that Business Day, non-standard orders (e.g., “Custom Baskets” (defined below)), or all-cash orders generally must be received in proper form and accepted by the Trust at least three hours prior to Cutoff Time (1:00 p.m. Eastern Time), for orders seeking the same Business Day’s NAV. Notwithstanding the foregoing, the Trust may, but is not required to, permit non-standard orders and/or all-cash payments until 4:00 p.m., Eastern Time, or until the market close (in the event an Exchange closes early).

Purchase orders requesting settlement on a T+0 basis must be received in proper form between 6:00 a.m. and 9:30 a.m. Eastern Time, to be calculated using the same Business Day’s NAV. Purchase orders requesting settlement on a T+0 basis may also be received in proper form between 4:01 p.m. and 5:30 p.m. Eastern Time to be calculated using the next Business Day’s NAV.

The Authorized Participant Agreement sets forth the different methods whereby Authorized Participants can submit purchase orders. A purchase order is considered to be in “proper form” if a request in a form satisfactory to the Fund is (1) received by the Underwriter from an Authorized Participant on behalf of itself or another person before the Cutoff Time, and (2) all the procedures and other requirements applicable to the method used by the Authorized Participant to submit the purchase order, such as, in the case of purchase orders submitted through the applicable order portal, the completion of all required fields, and otherwise set forth in the Authorized Participant Agreement are properly followed.

Creation Unit orders must be transmitted by an Authorized Participant through the applicable order portal, by telephone or other transmission method acceptable to the Underwriter. Economic or market disruptions or changes, or telephone or other communication failure, may impede transmissions between the Underwriter and an Authorized Participant. Orders to create shares of the Fund that are submitted on the Business Day immediately preceding a holiday or a day (other than a weekend) when the securities markets in a foreign market in which the Fund may invest are closed may not be accepted or may be charged the maximum transaction fee. A purchase order, if accepted by the Fund, will be processed based on the NAV as of the next Cutoff Time.

Acceptance of Orders for and Issuance of Creation Units. All questions as to whether an order has been submitted in proper form and the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Fund and the Fund’s determination shall be final and binding.

The Fund reserves the right to reject or revoke acceptance of a creation order for any reason, provided that such action does not result in a suspension of sales of Creation Units in contravention of Rule 6c-11 and the SEC’s positions thereunder. For example, the Fund may reject or revoke acceptance of a creation order, including, but not limited to, when (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (iii) the Deposit Securities delivered do not conform to the identity and number of shares specified; (iv) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (v) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; (vi) the Deposit Securities or Deposit Cash, as applicable, delivered by the Authorized Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; or (vii) circumstances outside the control of the Fund, the Underwriter and the Adviser make it impracticable to process purchase orders. The Underwriter shall notify a prospective purchaser of a Creation Unit and/or the Authorized Participant acting on behalf of such purchaser of the rejection or revocation of acceptance of such order. The Fund, the Custodian, any subcustodian and the Underwriter are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for failure to give such notification.

Except as provided in the following paragraph, a Creation Unit will not be issued until the transfer of good title to the Fund of the Deposit Securities and the payment of the Cash Component, Deposit Cash and creation transaction fees have been completed. In this regard, the Custodian will require, prior to the issuance of a Creation Unit, that any sub-custodian confirm to the Custodian that the Deposit Securities have been delivered to the account of the Fund at the sub-custodian(s). If the Fund does not receive the foregoing by the time specified the Creation Unit may not be delivered or the purchase order may ultimately be rejected.

The Fund may issue Creation Units to an Authorized Participant, notwithstanding the fact that all Deposit Securities have not been received, in reliance on the undertaking of the Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking shall be secured by such Authorized Participant's delivery and maintenance of collateral having a value of up to 105% of the value of the missing Deposit Securities. The only collateral that is acceptable is cash in U.S. dollars. Such cash collateral must be delivered no later than 2:00 p.m., Eastern Time on the contractual settlement date of the Creation Unit(s). The Fund may buy the missing Deposit Securities at any time, and the Authorized Participant will be liable for any shortfall between the cost to the Fund of purchasing such securities and the cash collateral. In addition, the cash collateral may be invested at the risk of the Authorized Participant, and any income on invested cash collateral will be paid to that Authorized Participant.

In certain cases, an Authorized Participant may create and redeem Creation Units on the same trade date. In these instances, the Fund reserves the right to settle these transactions on a net basis or require a representation from the Authorized Participant that the creation and redemption transactions are for separate Beneficial Owners.

Once the Fund has accepted a purchase order, upon the next determination of the NAV of the shares, the Fund may confirm the issuance of a Creation Unit, against receipt of payment, at such NAV. The Fund will then transmit a confirmation of acceptance to the Authorized Participant that placed the order. Creation Units typically are settled on a "T+1 basis" (i.e., one Business Day after trade date), subject to certain exceptions. However, the Fund reserves the right to settle Creation Unit transactions on a basis other than T+1, including in order to accommodate non-U.S. market holiday schedules, closures and settlement cycles, and to account for different treatment among non-U.S. and U.S. markets of dividend record dates and ex-dividend dates.

Orders for Creation Units received in proper form that request a T+0 settlement will be settled on a "T+0 basis" (i.e., on trade date).

Creation Transaction Fees. A standard creation transaction fee, as set forth in the table below, is imposed to offset transfer and other costs associated with the issuance of Creation Units, as applicable. The Fund may adjust the transaction fee from time to time. The standard creation transaction fee is charged to the Authorized Participant on the day such Authorized Participant creates a Creation Unit and is the same regardless of the number of Creation Units purchased by the Authorized Participant on the applicable Business Day

The Authorized Participant may also be required to pay a variable transaction fee (up to the maximum amount shown in the table below) to cover certain non-standard orders, whole or partial cash purchases or redemptions, brokerage, tax, foreign exchange, execution, market impact and other costs and expenses. Authorized Participants will also bear the costs of transferring the Deposit Securities, including any stamp duty or other similar fees and expenses. With respect to creation orders, Authorized Participants are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Fund and with respect to redemption orders, Authorized Participants are responsible for the costs of transferring the Redemption Securities from the Fund to their account or on their order. Investors who use the services of a broker or other financial intermediary may be charged a fee for such services.

The standard creation transaction fee for a Creation Unit of the Fund is set forth below:

Fund	Standard Transaction Fee
Polen Euro High Yield Bond ETF	\$170

The Adviser may adjust the transactions fees from time to time based on actual experience.

Redemptions of Creation Units. The consideration paid by the Fund for the redemption of Creation Units consists of either (i) for cash redemptions, cash equal to the aggregate NAV of a Creation Unit (the “Cash Redemption Proceeds”), or (ii) for in-kind redemptions, an in-kind basket of a designated portfolio of securities (the “Fund Securities”) (or cash for all or any portion of such Fund Securities (“Redemption Cash”)) and the Cash Component, which is an amount equal to the difference between the aggregate NAV of a Creation Unit and the Fund Securities. The term “Fund Redemption” as used herein means, (i) for cash redemptions, the Cash Redemption Proceeds; or (ii) for in-kind redemptions, collectively, the Fund Securities and/or Redemption Cash, as applicable, and the Cash Component. Currently, the Trust anticipates that Creation Units will be cash redemptions.

Redemptions of shares for Fund Securities will be subject to compliance with applicable U.S. federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserve the right to redeem Creation Units for cash to the extent that the Fund cannot lawfully deliver specific Fund Securities upon redemptions or cannot do so without first registering the Fund Security under such laws.

The composition of the Fund Securities may not be the same as the Deposit Securities. In addition, the identity and number of shares of the Fund Securities may change pursuant to, among other matters, changes in the composition of the Fund’s portfolio and as rebalancing adjustments and corporate action events are reflected from time to time and when Custom Baskets (defined below) are used. Cash redemptions of Creation Units will be effected in essentially the same manner as in-kind redemptions. The Authorized Participant will receive cash equal to the aggregate NAV of the Creation Units redeemed.

The means by which the Fund Securities and Cash Component are to be delivered to the Authorized Participant by the Fund are set forth in the Authorized Participant Agreement, except to the extent the Underwriter and the Authorized Participant otherwise agree. The delivery of Fund Shares will be settled through the DTC system.

To the extent that the Adviser may need to sell investments denominated in foreign currencies prior to converting such proceeds into U.S. dollars at the applicable exchange rate and subject to the applicable spread for redemptions that are made in whole or in part for cash, those redeeming Creation Units will bear the risk associated with changes in the currency exchange rate and securities value between the time they place their redemption order and the time that the Fund converts any foreign currency-denominated investments into U.S. dollars.

Placement of Redemption Orders. To initiate a redemption order for a Creation Unit, an Authorized Participant must submit to the Underwriter an irrevocable order in proper form to redeem shares of the Fund on a Business Day generally before the time as of which that day’s NAV is calculated. The NAV of the Fund is calculated and determined once daily as of the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time, or at the time as of which the Exchange establishes official closing prices) on each day that the Exchange is open. For a redemption order to be processed based on the NAV calculated on a particular Business Day, the order must be received in proper form and accepted by the Trust prior to the Cutoff Time. Investors who are not Authorized Participants and seek to place a redemption order for a Creation Unit through an Authorized Participant should allow sufficient time to permit proper submission of the redemption order to the Underwriter by the Cutoff Time on such Business Day. On days when the applicable Exchange or the bond markets close earlier than normal, the Fund may require orders to redeem Creation Units to be placed earlier in the day. Orders requesting a change in the Fund Redemption as disseminated through NSCC for that Business Day, non-standard orders (e.g., “Custom Baskets”), or all-cash redemption orders generally must be received in proper form and accepted by the Trust at least three hours prior to Cutoff Time (1:00 p.m. Eastern Time), for orders seeking the same Business Day’s NAV. Notwithstanding the foregoing, the Trust may, but is not required to, permit non-standard orders and/or all-cash redemptions until 4:00 p.m., Eastern Time, or until the market close (in the event an Exchange closes early).

The Authorized Participant Agreement sets forth the different methods whereby Authorized Participants can submit redemption orders. A redemption request is considered to be in “proper form” if a request in a form satisfactory to the Fund is (1) received by the Underwriter from an Authorized Participant on behalf of itself or another person within the time period set above, and (2) all the procedure and other requirements applicable to the method used by the Authorized Participant to submit the redemption order, such as, in the case of redemption orders submitted through the applicable order portal, the completion of all required fields, and otherwise set forth in the Authorized Participant Agreement are properly followed.

Creation Unit orders must be transmitted by an Authorized Participant through the applicable order portal, by telephone or other transmission method acceptable to the Underwriter. Economic or market disruptions or changes, or telephone or other communication failure, may impede transmissions between the Underwriter and an Authorized Participant. Orders to redeem shares of the Fund that are submitted on the Business Day immediately preceding a holiday or a day (other than a weekend) when the securities markets in a foreign market in which the Fund may invest are closed may be charged the maximum transaction fee. A redemption request, if accepted by the Trust, will be processed based on the NAV as of the next Cutoff Time.

Acceptance of Orders for and Redemption of Creation Units. All questions as to whether an order has been submitted in proper form and the requisite number of Fund Shares and transaction fees have been delivered shall be determined by the Fund and the Fund's determination shall be final and binding.

The Fund reserves the right to reject or revoke acceptance of a creation order for any reason, provided that such action does not result in a suspension of sales of Creation Units in contravention of Rule 6c-11 and the SEC's positions thereunder. For example, the Fund may reject or revoke acceptance of a creation order, including, but not limited to, when (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (iii) the Deposit Securities delivered do not conform to the identity and number of shares specified; (iv) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (v) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; (vi) the Deposit Securities or Deposit Cash, as applicable, delivered by the Authorized Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; or (vii) circumstances outside the control of the Fund, the Underwriter and the Adviser make it impracticable to process purchase orders. The Underwriter shall notify a prospective purchaser of a Creation Unit and/or the Authorized Participant acting on behalf of such purchaser of the rejection or revocation of acceptance of such order. The Fund, the Custodian, any subcustodian and the Underwriter are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for failure to give such notification.

Except as provided in the following paragraph, the payment by the Fund of Cash Redemption Proceeds or the Fund Securities, including Redemption Cash, and Cash Component will not be issued until the transfer of the Creation Unit(s) and the applicable redemption transaction fees have been completed. If the Transfer Agent does not receive the redeeming investor's shares through DTC's facilities and the applicable redemption transaction fees by the required time, the redemption request may be rejected. Further, a redeeming Beneficial Owner or Authorized Participant acting on behalf of such Beneficial Owner must maintain appropriate security arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction where Fund Securities are customarily traded and will be delivered. If neither the redeeming Beneficial Owner nor the Authorized Participant acting on behalf of such redeeming Beneficial Owner has appropriate arrangements to take delivery of Fund Securities in the applicable non-U.S. jurisdiction, and it is not possible to make such arrangements, or if it is not possible to effect deliveries of Fund Securities in such jurisdiction, the Trust in its sole discretion may determine to redeem Shares in Redemption Cash, and the redeeming Beneficial Owner will be required to receive its redemption proceeds as Redemption Cash.

To the extent contemplated by the Authorized Participant Agreement, in the event the Authorized Participant has submitted a redemption request in proper form but is unable to transfer all or part of the Creation Unit to be redeemed to the Fund's Transfer Agent, the Transfer Agent will nonetheless accept the redemption request in reliance on the undertaking by the Authorized Participant to deliver the missing shares as soon as possible. Such undertaking shall be secured by the Authorized Participant's delivery and maintenance of collateral consisting of cash having a value (marked to market daily) of up to 105%, which the Trust may change from time to time, of the value of the missing shares. The current procedures for collateralization of missing shares require, among other things, that any cash collateral shall be in the form of U.S. dollars in immediately available funds and shall be held by the Custodian and marked to market daily, and that the fees of the Custodian and any sub-custodians in respect of the delivery, maintenance and redelivery of the cash collateral shall be payable by the Authorized Participant. The Authorized Participant Agreement will permit the Trust, on behalf of the Fund, to purchase the missing shares and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such shares and the value of the collateral.

Once the Fund has accepted a redemption order, upon the next determination of the NAV of the shares, the Fund may confirm the redemption of a Creation Unit, against receipt of Shares, at such NAV. The Fund will then transmit a confirmation of acceptance to the Authorized Participant that placed the order. Deliveries of redemption proceeds by the Fund typically are settled on a “T+1 basis” (i.e., one Business Day after trade date), but may be made up to seven days later, particularly in stressed market conditions. Further, the Fund reserves the right to settle redemption transactions on another basis to accommodate non-U.S. market holiday schedules (see below for further information), closures and settlement cycles, to account for different treatment among non-U.S. and U.S. markets of dividend record dates and dividend ex-dates (i.e., the last date the holder of a security can sell the security and still receive dividends payable on the security sold), and in certain other circumstances.

In certain cases, an Authorized Participant may create and redeem Creation Units on the same trade date. In these instances, the Fund reserves the right to settle these transactions on a net basis or require a representation from the Authorized Participant that the creation and redemption transactions are for separate Beneficial Owners.

Redemption Transaction Fees. A standard redemption transaction fee, as set forth in the table below, is imposed to offset transfer and other costs associated with the redemption of Creation Units, as applicable. The Fund may adjust the transaction fee from time to time. The standard redemption transaction fee is charged to the Authorized Participant on the day such Authorized Participant redeems a Creation Unit and is the same regardless of the number of Creation Units redeemed by an Authorized Participant on the applicable Business Day.

The Authorized Participant may also be required to pay a variable transaction fee (up to the maximum amount shown in the table below) to cover certain non-standard orders, whole or partial cash purchases or redemptions, brokerage, tax, foreign exchange, execution, market impact and other costs and expenses. Authorized Participants will also bear the costs of transferring the Fund Securities, including any stamp duty or other similar fees and expenses. Investors who use the services of a broker or other financial intermediary may be charged a fee for such services.

The standard redemption transaction fee for a Creation Unit is set forth below:

Fund	Standard Transaction Fee
Polen Euro High Yield Bond ETF	\$170

The Adviser may adjust the transactions fees from time to time based on actual experience.

Custom Baskets. The baskets of securities comprising a Fund Deposit and a Fund Redemption may be representative of the Fund’s portfolio holdings, or the Fund may utilize Custom Baskets provided that certain conditions are met.

A “Custom Basket” is (i) a basket that is composed of a non-representative selection of the Fund’s portfolio holdings, or (ii) a representative basket that is different from the initial basket used in transactions on the same business day, and (iii) a basket that contains bespoke cash and/or security substitutions, including for a single Authorized Participant. The Trust has adopted policies and procedures that govern the construction and acceptance of baskets, including heightened requirements for Custom Baskets. Such policies and procedures provide detailed parameters for the construction and acceptance of Custom Baskets that are deemed to be in the best interests of the Fund and its shareholders, establish processes for revisions to, or deviations from, such parameters, and specify the titles and roles of the employees of the Adviser who are required to review each Custom Basket for compliance with those parameters.

In connection with the construction and acceptance of Custom Baskets, the Adviser may consider various factors, including, but not limited to: (1) whether the securities, assets and other positions comprising a basket are consistent with the Fund’s investment objective, policies and disclosure; (2) whether the securities, assets and other positions can legally and readily be acquired, transferred and held by the Fund and/or Authorized Participant(s), as applicable; (3) whether to utilize cash, either in lieu of securities or other instruments or as a cash balancing amount; and (4) whether the use of Custom Baskets may reduce costs, increase (tax) efficiency and improve trading. Although the policies and procedures are designed to mitigate against potential overreaching by an Authorized Participant, there is no guarantee that such policies and procedures will be effective.

PRICING OF FUND SHARES

For the Fund, the NAV per share of the Fund is determined by dividing the value of the Fund's net assets by the total number of the Fund's shares outstanding. This determination is made by The Bank of New York Mellon, as of the close of regular trading on the Exchange (typically 4:00 p.m., Eastern Time) each day the Fund is open for business. The Fund is open for business on days when the Exchange is open for business.

The Fund's equity securities listed on any national or foreign exchange market system will be valued at the last sale price. Equity securities traded in the over-the-counter market are valued at their closing sale or official closing price. If there were no transactions on that day, securities traded principally on an exchange will be valued at the mean of the last bid and ask prices prior to the market close. Prices for equity securities normally are supplied by an independent pricing service approved by the Board of Trustees. The valuations of securities that trade principally on a foreign market that closes before the time as of which a Fund calculates its NAV will generally be based on an adjusted fair value price furnished by an independent pricing service as of the time NAV is calculated. Fixed income securities are valued based on market quotations, which are furnished by an independent pricing service. Certain fixed income securities may be valued based upon appraisals received from a pricing service using a computerized matrix system or based upon appraisals derived from information concerning the security or similar securities received from a recognized dealer or dealers in those securities. The amortized cost method of valuation may be used to value fixed income securities with 60 days or less remaining until maturity, so long as such amortized cost method approximates fair value. Any assets held by the Fund that are denominated in foreign currencies are valued daily in U.S. dollars at the foreign currency exchange rates that are prevailing at the time that the Fund determines the daily NAV per share. Foreign securities may trade on weekends or other days when the Fund does not calculate NAV. As a result, the market value of these investments may change on days when you cannot buy or sell shares of the Fund. Investments in any mutual fund are valued at their respective NAVs as determined by those mutual funds each business day (which may use fair value pricing as disclosed in their prospectuses).

Securities that do not have a readily available current market value are valued in good faith by the Adviser as "valuation designee" under the oversight of the Trust's Board of Trustees. The Adviser has adopted written policies and procedures for valuing securities and other assets in circumstances where market quotes are not readily available. In the event that market quotes are not readily available, and the security or asset cannot be valued pursuant to one of the aforementioned valuation methods, the value of the security or asset will be determined in good faith by the Adviser pursuant to its policies and procedures. On a quarterly basis, the Adviser's fair valuation determinations will be reviewed by the Trust's Board of Trustees. The Adviser's policy is intended to result in a calculation of the Fund's NAV that fairly reflects security or asset values as of the time of pricing. However, fair values for a security or asset determined pursuant to the Adviser's policies and procedures may not accurately reflect the price that the Fund could obtain if it were to dispose of that security or asset as of the time of pricing.

Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/asked information, broker quotes), including where events occur after the close of the relevant market, but prior to the close of the Exchange, that materially affect the values of the Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, an exchange or market on which a security trades does not open for trading for the entire day and no other market prices are available. The Adviser as valuation designee will monitor for significant events that may materially affect the values of the Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events.

DIVIDENDS

The Fund intends to distribute substantially all of its net investment income, if any. Dividends from the Fund's net investment income are declared and paid monthly to the shareholders. Distributions, if any, of net short-term capital gain and net capital gain (the excess of net long-term capital gain over the short-term capital loss) realized by the Fund, after deducting any available capital loss carryovers are declared and paid to its shareholders annually.

The Fund's dividends and distributions are taxable to shareholders (other than retirement plans and other tax-exempt investors) whether received in cash or reinvested in additional shares of the Fund. A dividend or distribution paid by the Fund has the effect of reducing the NAV per share on the ex-dividend date by the amount of the dividend

distribution. A dividend or distribution declared shortly after a purchase of shares by an investor would, therefore, represent, in substance, a return of capital to the shareholder with respect to such shares even though it would be subject to federal income tax. This is called “buying a dividend.” To avoid “buying a dividend,” check the Fund’s distribution dates before you invest.

A statement will be sent to you after the end of each year detailing the tax status of your distributions. Please see “Certain Material U.S. Federal Income Tax Considerations” below for more information on the federal income tax consequences of dividends and other distributions made by the Fund.

CERTAIN MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion summarizes certain material U.S. federal income tax considerations affecting the Fund and its shareholders. This discussion is for general information only and does not purport to consider all aspects of U.S. federal income taxation that might be relevant to beneficial owners of shares of the Fund. The summary discussion that follows may not be considered to be individual tax advice and may not be relied upon by any shareholder. The summary is based upon provisions of the IRC, applicable U.S. Treasury Regulations (whether temporary, proposed or final) promulgated thereunder (the “Regulations”), and administrative and judicial interpretations thereof, as are in effect as of the date hereof, all of which are subject to change, which change could be retroactive and may affect the conclusions expressed herein. The summary applies only to beneficial owners of shares of the Fund in whose hands such shares are capital assets within the meaning of Section 1221 of the IRC, and may not apply to certain types of beneficial owners of shares of the Fund, including, but not limited to insurance companies, tax-exempt organizations, shareholders holding the Fund’s shares through tax-advantaged accounts (such as an individual retirement account (an “IRA”), a 401(k) plan account, or other qualified retirement account), financial institutions, pass-through entities, broker-dealers, entities that are not organized under the laws of the United States or a political subdivision thereof, persons who are neither a citizen nor resident of the United States, shareholders holding the Fund’s shares as part of a hedge, straddle or conversion transaction and shareholders who are subject to the alternative minimum tax. Persons who may be subject to tax in more than one country should consult the provisions of any applicable tax treaty to determine the potential tax consequences to them.

If an entity or arrangement treated as a partnership for U.S. federal income tax purposes holds the Fund’s common stock, the U.S. federal income tax treatment of a partner in such partnership generally will depend upon the status of the partner and the activities of such partnership. A partner of a partnership holding the Fund’s common stock should consult its own tax adviser regarding the U.S. federal income tax consequences to the partner of the acquisition, ownership and disposition of the Fund’s common stock by the partnership.

The summary assumes that shareholders will hold the Fund’s common stock as capital assets, which generally means as property held for investment. This discussion addresses only the U.S. income tax consequences of an investment by U.S. shareholders, and, therefore, does not address U.S. estate and gift tax rules, U.S. state or local taxation, the alternative minimum tax, excise taxes, transfer taxes or foreign taxes.

For purposes of the following discussion, “U.S. shareholder” is a shareholder that is (i) a citizen or resident of the United States, (ii) a corporation (or other entity taxable as a corporation) created or organized under the laws of the United States or any state thereof or the District of Columbia, (iii) an estate, the income of which is subject to U.S. federal income taxation regardless of its source or (iv) a trust if (a) a U.S. court can exercise primary supervision over the trust’s administration and one or more U.S. persons are authorized to control all substantial decisions of the trust or (b) it has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person. A “Non-U.S. shareholder” is a person that is neither a U.S. shareholder nor an entity treated as a partnership for U.S. federal income tax purposes.

The Fund has not requested and will not request an advance ruling from the Internal Revenue Service (the “IRS”) as to the federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. In addition, the following discussion applicable to shareholders of the Fund addresses only some of the federal income tax considerations generally affecting investments in the Fund.

Shareholders are urged and advised to consult their own tax adviser with respect to the tax consequences of the ownership, purchase and disposition of an investment in the Fund including, but not limited to, the applicability of state, local, foreign and other tax laws affecting the particular shareholder and to possible effects of changes in federal or other tax laws.

GENERAL. The Fund has elected, and intends to continue to qualify each year for, taxation as a RIC under Subchapter M of the IRC. By qualifying as a RIC, the Fund (but not the shareholders) will not be subject to federal income tax on that portion of its investment company taxable income and net realized capital gains that it distributes to its shareholders.

Shareholders should be aware that investments made by the Fund, some of which are described below, may involve complex tax rules some of which may result in income or gain recognition by a shareholder without the concurrent receipt of cash. Although the Fund seeks to avoid significant noncash income, such noncash income could be recognized by the Fund, in which case it may distribute cash derived from other sources in order to meet the minimum distribution requirements described below. Cash to make the required minimum distributions may be obtained from sales proceeds of securities held by the Fund (even if such sales are not advantageous) or, if permitted by its governing documents and other regulatory restrictions, through borrowing the amounts required to be distributed.

QUALIFICATION AS A REGULATED INVESTMENT COMPANY. Qualification as a RIC under the IRC requires, among other things, that the Fund: (a) derive at least 90% of its gross income for each taxable year from (i) dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income from certain qualified publicly traded partnerships (together with (i), the “Qualifying Income Requirement”); and (b) diversify its holdings so that, at the close of each quarter of the taxable year: (i) at least 50% of the value of its assets is comprised of cash, cash items (including receivables), U.S. government securities, securities of other RICs and other securities, with those other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of the Fund’s total assets and that does not represent more than 10% of the outstanding voting securities of such issuer; and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer or the securities (other than the securities of other RICs) of two or more issuers controlled by it and engaged in the same, similar or related trades or businesses, or one or more “qualified publicly traded partnerships” (together with (i) the “Diversification Requirement”).

The Treasury Department is authorized to promulgate regulations under which gains from foreign currencies (and options, futures, and forward contracts on foreign currency) would not constitute qualifying income for purposes of the Qualifying Income Requirement only if such gains are not directly related to the principal business of the Fund in investing in stock or securities or options and futures with respect to stock or securities. To date, no such regulations have been issued.

As a RIC, the Fund generally will not be subject to U.S. federal income tax on the portion of its income and capital gains that it distributes to its shareholders in any taxable year for which it distributes, in compliance with the IRC’s timing and other requirements the sum of (i) at least 90% of its investment company taxable income (which includes dividends, taxable interest, taxable original issue discount income, market discount income, income from securities lending, net short-term capital gain in excess of net long-term capital loss, certain net realized foreign currency exchange gains, and any other taxable income other than “net capital gain” as defined below and is reduced by deductible expenses all determined without regard to any deduction for dividends paid); and (ii) 90% of its tax-exempt interest, if any, net of certain expenses allocable thereto (“net tax-exempt interest”). The Fund may retain for investment all or a portion of its “net capital gain” (i.e., the excess of its net long-term capital gain over its net short-term capital loss). If the Fund retains any investment company taxable income or net capital gain, it will be subject to tax at regular corporate rates on the amount retained. If the Fund retains any net capital gain, it may designate the retained amount as undistributed net capital gain in a notice to its shareholders, who will be (i) required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount; and (ii) entitled to credit their proportionate shares of tax paid by the Fund against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of the shares owned by a shareholder of the Fund will be increased by the amount of undistributed net capital gain included in the shareholder’s gross income and decreased by the federal income tax paid by the Fund on that amount of capital gain.

The qualifying income and asset requirements that must be met under the IRC in order for the Fund to qualify as a RIC, as described above, may limit the extent to which it will be able to engage in derivative transactions. Rules governing the federal income tax aspects of derivatives, including swap agreements, are not entirely clear in

certain respects, particularly in light of two IRS revenue rulings issued in 2006. Revenue Ruling 2006-1 held that income from a derivative contract with respect to a commodity index is not qualifying income for a RIC. Subsequently, the IRS issued Revenue Ruling 2006-31 in which it stated that the holding in Revenue Ruling 2006-1 “was not intended to preclude a conclusion that the income from certain instruments (such as certain structured notes) that create a commodity exposure for the holder is qualifying income.” In 2016, the IRS issued a notice and stated they would not address what constitutes a “security” for purposes of Qualifying Income. In addition, the IRS requested comments as to whether the 2006 Revenue Rulings should be withdrawn. In 2019, the IRS concluded that it would not withdraw the 2006 Revenue Rulings at that time. Accordingly, the Fund’s ability to invest in commodity related derivative transactions and other derivative transactions may be limited by the Qualifying Income Requirement. The Fund will account for any investments in commodity derivative transactions in a manner it deems to be appropriate; the IRS, however, might not accept such treatment. If the IRS did not accept such treatment, the status of the Fund as a RIC might be jeopardized.

For purposes of the Qualifying Income Requirement described above, all of the net income of a RIC derived from an interest in a qualified publicly traded partnership (generally, defined as a partnership (x) the interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, and (y) that derives less than 90% of its income from the qualifying income described in clause (i) of the Qualifying Income Requirement described above) will be treated as qualifying income. Income derived from a partnership (other than a qualified publicly traded partnership) will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership which would be qualifying income if realized directly by the RIC. In addition, although in general the passive loss rules of the IRC do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership. The transferee of a partnership interest generally is required to withhold 10% of the amount realized on the sale or exchange of a partnership interest after December 31, 2017 if any portion of the gain on the disposition would be treated as effectively connected with the conduct of a trade or business within the United States, unless the transferor certifies it is not a foreign person.

For purposes of the Diversification Requirement described above, the term “outstanding voting securities of such issuer” will include the equity securities of a qualified publicly traded partnership.

If the Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures to satisfy the Diversification Requirements where the Fund corrects the failure within a specified period of time. If the applicable relief provisions are not available or cannot be met, the Fund will fail to qualify as a RIC and will be subject to tax in the same manner as an ordinary corporation subject to tax on a flat tax rate of 21% and all distributions from earnings and profits (as determined under U.S. federal income tax principles) to its shareholders will be taxable as ordinary dividend income eligible for the dividends-received deduction for corporate shareholders, and a maximum long-term capital gains rate of 20% for non-corporate shareholders (15% or 0% for non-corporate shareholders in lower income tax brackets). If the Fund fails to qualify as a RIC for a period of greater than two taxable years, the Fund generally would be required to recognize any built-in gains with respect to certain of its assets upon a sale of such assets within ten years of qualifying as a RIC in a subsequent year.

EXCISE TAX. If the Fund fails to distribute by December 31 of each calendar year an amount equal to the sum of (1) at least 98% of its taxable ordinary income (excluding capital gains and losses) for such year, (2) at least 98.2% of the excess of its capital gains over its capital losses (as adjusted for certain ordinary losses) for the twelve month period ending on October 31 of such year), and (3) all taxable ordinary income and the excess of capital gains over capital losses for the prior year that were not distributed during such year and on which it did not pay federal income tax, the Fund will be subject to a nondeductible 4% excise tax (the “Excise Tax”) on the undistributed amounts. A distribution will be treated as paid on December 31 of the calendar year if it is declared by the Fund in October, November, or December of that year to shareholders of record on a date in such month and paid by it during January of the following year. Such distributions will be taxable to shareholders (other than those not subject to federal income tax) in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received. The Fund intends to actually distribute or be deemed to have distributed substantially all of its net income and gain, if any, by the end of each calendar year in compliance with these requirements so that it will generally not be required to pay the Excise Tax. The Fund may, in certain circumstances, be required to liquidate its investments in

order to make sufficient distributions to avoid Excise Tax liability at a time when its Adviser might not otherwise have chosen to do so. Liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirements for qualification as a RIC.

CAPITAL LOSS CARRYFORWARDS. The Fund is permitted to carry forward a net capital loss from any year to offset its capital gains, if any, realized indefinitely in years following the year of the loss. The excess of the Fund's net short-term capital losses over its net long-term capital gain is treated as short-term capital losses arising on the first day of the Fund's next taxable year and the excess of the Fund's net long-term capital losses over its net short-term capital gain is treated as long-term capital losses arising on the first day of the Fund's next taxable year. If future capital gains are offset by carried forward capital losses, such future capital gains are not subject to Fund-level federal income taxation, regardless of whether they are distributed to shareholders. Accordingly, the Fund does not expect to distribute any such offsetting capital gains. The Fund cannot carry back or carry forward any net operating losses.

CREATION UNITS. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" (for an Authorized Participant that does not mark-to-market its holdings) or on the basis that there has been no significant change in economic position.

Any gain or loss realized upon a creation of Creation Units will be treated as capital gain or loss if the Authorized Participant holds the securities exchanged therefor as capital assets, and otherwise will be ordinary income or loss. Similarly, any gain or loss realized upon a redemption of Creation Units will be treated as capital gain or loss if the Authorized Participant holds the shares comprising the Creation Units as capital assets, and otherwise will be ordinary income or loss. Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year, and otherwise will be short-term capital gain or loss. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held for more than one year, and otherwise, will generally be short-term capital gain or loss. Any capital loss realized upon a redemption of Creation Units held for six months or less will be disallowed to the extent of exempt-interest dividends paid with respect to the Creation Units, and to the extent not disallowed will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gains with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Code, the Fund would have a basis in any deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or a group of purchasers) may not recognize gain or loss upon the exchange of securities for Creation Units.

A person subject to U.S. federal income tax with the U.S. dollar as its functional currency for U.S. federal income tax purposes who receives non-U.S. currency upon a redemption of Creation Units and does not immediately convert the non-U.S. currency into U.S. dollars may, upon a later conversion of the non-U.S. currency into U.S. dollars, or upon the use of the non-U.S. currency to pay expenses or acquire assets, recognize as ordinary gains or losses any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption. Authorized Participants purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss might be deductible.

MLPs. The Fund may invest in master limited partnerships which may be treated as qualified publicly traded partnerships. Income from qualified publicly traded partnerships is qualifying income for purposes of the Qualifying Income Requirement, but the Fund's investment in one or more of such qualified publicly traded partnerships is limited to no more than 25% of the value of the Fund's assets and must otherwise satisfy the Diversification Requirement. In addition, a 10% withholding tax is imposed on the sale or exchange of a partnership interest for transfers if any portion of the gain on the disposition would be treated as effectively connected with the conduct of a trade or business within the United States, unless the transferor certifies it is not a foreign person or another exception applies.

ORIGINAL ISSUE DISCOUNT AND MARKET DISCOUNT. The Fund may acquire debt securities that are treated as having original issue discount ("OID") (generally a debt obligation with a purchase price less than its principal amount, such as a zero coupon bond). Generally, the Fund will be required to include the OID, in income over the term of the debt security, even though it will not receive cash payments for such OID until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having OID which could affect the character and timing of recognition of income. Inflation-protected bonds generally can be expected to produce OID income as their principal amounts are adjusted upward for inflation. A portion of the OID includible in income with respect to certain high-yield corporate debt securities may be treated as a dividend for federal income tax purposes if the securities are characterized as equity for federal income tax purposes.

A debt security acquired in the secondary market by the Fund may be treated as having market discount if acquired at a price below redemption value or adjusted issue price if issued with original issue discount. Market discount generally is accrued ratably, on a daily basis, over the period from the date of acquisition to the date of maturity even though no cash will be received. Absent an election by the Fund to include the market discount in income as it accrues, gain on its disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

The Fund may be required to include in income certain fees that are treated as OID and required to be included in income for financial statement purposes when received (rather than when accrued into income).

In addition, pay-in-kind securities will give rise to income which is required to be distributed and is taxable even though the Fund receives no interest payments in cash on such securities during the year.

The Fund generally will be required to make distributions to shareholders representing the income accruing on the debt securities, described above, that is currently includable in income, even though cash representing such income may not have been received by the Fund. Cash to pay these distributions may be obtained from sales proceeds of securities held by the Fund (even if such sales are not advantageous) or, if permitted by the Fund's governing documents, through borrowing the amounts required to be distributed. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would have in the absence of such transactions.

OPTIONS, FUTURES AND FORWARD CONTRACTS. The writing (selling) and purchasing of options and futures contracts and entering into forward currency contracts, involves complex rules that will determine for income tax purposes the amount, character and timing of recognition of the gains and losses the Fund realizes in connection with such transactions.

Gains and losses on the sale, lapse, or other termination of options and futures contracts, options thereon and certain forward contracts (except certain foreign currency options, forward contracts and futures contracts) will generally be treated as capital gains and losses. Some regulated futures contracts, certain foreign currency contracts, and certain non-equity options (such as certain listed options or options on broad-based securities indexes) held by the Fund ("Section 1256 contracts"), other than contracts on which it has made a "mixed-straddle election," will be required to be "marked-to-market" for federal income tax purposes, that is, treated as having been sold at their market value on the last day of the Fund's taxable year. These provisions may require the Fund to recognize income or gains without a concurrent receipt of cash. Any gain or loss recognized on actual or deemed sales of Section 1256 contracts will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss, although certain foreign currency gains and losses from such contracts may be treated as ordinary income or loss as described below. Transactions that qualify as designated hedges are exempt from the mark-to-market rule, but may require the Fund to defer the recognition of losses on futures contracts, foreign currency contracts and certain options to the extent of any unrecognized gains on related positions held by it.

The tax provisions described above applicable to options, futures and forward contracts may affect the amount, timing, and character of the Fund's distributions to its shareholders. For example, the Section 1256 rules described above may operate to increase the amount the Fund must distribute to satisfy the minimum distribution requirement for the portion treated as short-term capital gain which will be taxable to its shareholders as ordinary income, and to increase the net capital gain it recognizes, without, in either case, increasing the cash available to it. The Fund may elect to exclude certain transactions from the operation of Section 1256, although doing so may have the effect of increasing the relative proportion of net short-term capital gain (taxable as ordinary income) and, thus, increasing the amount of dividends it must distribute. Section 1256 contracts also may be marked-to-market for purposes of the Excise Tax.

When a covered call or put option written (sold) by the Fund expires the Fund will realize a short-term capital gain equal to the amount of the premium it received for writing the option. When the Fund terminates its obligations under such an option by entering into a closing transaction, it will realize a short-term capital gain (or loss), depending on whether the cost of the closing transaction is less than (or exceeds) the premium received when it wrote the option. When a covered call option written by the Fund is exercised, the Fund will be treated as having sold the underlying security, producing long-term or short-term capital gain or loss, depending upon the holding period of the underlying security and whether the sum of the option price received upon the exercise plus the premium received when it wrote the option is more or less than the basis of the underlying security.

STRADDLES. Section 1092 deals with the taxation of straddles which also may affect the taxation of options in which the Fund may invest. Offsetting positions held by the Fund involving certain derivative instruments, such as options, futures and forward currency contracts, may be considered, for federal income tax purposes, to constitute "straddles." Straddles are defined to include offsetting positions in actively traded personal property. In certain circumstances, the rules governing straddles override or modify the provisions of Section 1256, described above. If the Fund is treated as entering into a straddle and at least one (but not all) of its positions in derivative contracts comprising a part of such straddle is governed by Section 1256, then such straddle could be characterized as a "mixed straddle." The Fund may make one or more elections with respect to mixed straddles. Depending on which election is made, if any, the results with respect to the Fund may differ. Generally, to the extent the straddle rules apply to positions established by the Fund, losses realized by it may be deferred to the extent of unrealized gain in any offsetting positions. Moreover, as a result of the straddle rules, short-term capital loss on straddle positions may be characterized as long-term capital loss, and long-term capital gain may be characterized as short-term capital gain. In addition, the existence of a straddle may affect the holding period of the offsetting positions and cause such sales to be subject to the "wash sale" and "short sale" rules. As a result, the straddle rules could cause distributions that would otherwise constitute "qualified dividend income" to fail to satisfy the applicable holding period requirements, described below, and therefore to be taxed as ordinary income. Further, the Fund may be required to capitalize, rather than deduct currently, any interest expense and carrying charges applicable to a position that is part of a straddle. Because the application of the straddle rules may affect the character and timing of gains and losses from affected straddle positions, the amount which must be distributed to shareholders, and which will be taxed to shareholders as ordinary income or long-term capital gain, may be increased or decreased substantially as compared to the situation where the Fund had not engaged in such transactions.

In circumstances where the Fund has invested in certain pass-through entities, the amount of long-term capital gain that it may recognize from certain derivative transactions with respect to interests in such pass-through entities is limited under the IRC's constructive ownership rules. The amount of long-term capital gain is limited to the amount of such gain the Fund would have had if it directly invested in the pass-through entity during the term of the derivative contract. Any gain in excess of this amount is treated as ordinary income. An interest charge is imposed on the amount of gain that is treated as ordinary income.

SWAPS AND DERIVATIVES. As a result of entering into swap or derivative agreements, the Fund may make or receive periodic net payments. The Fund may also make or receive a payment when a swap or derivative is terminated prior to maturity through an assignment of the swap, derivative or other closing transaction. Periodic net payments will generally constitute ordinary income or deductions, while termination of a swap or derivative will generally result in capital gain or loss (which will be a long-term capital gain or loss if the Fund has been a party to a swap or derivative for more than one year). With respect to certain types of swaps or derivatives, the Fund may be required to currently recognize income or loss with respect to future payments on such swaps or derivatives or may elect under certain circumstances to mark such swaps or derivatives to market annually for tax purposes as ordinary income or loss. The Fund's transactions in swaps or other derivatives may be subject to one or more special tax rules (e.g., notional

principal contracts, straddles, constructive sales, wash sales and short sale rules). These rules may affect whether gains or losses recognized by the Fund are treated as ordinary or capital or as short-term or long-term, accelerate the recognition of income or gains to the Fund, defer losses to the Fund, and cause adjustments in the holding periods of the Fund's securities. These rules could therefore affect the amount, timing and/or character of distributions to shareholders.

Rules governing the tax aspects of swap or derivative agreements are not entirely clear in certain respects, in particular whether income generated is Qualifying Income. Accordingly, while the Fund intends to account for such transactions in a manner it deems appropriate, the IRS might not accept such treatment. If the IRS did not accept such treatment, the status of the Fund as a RIC might be adversely affected. The Fund intends to monitor developments in this area. Certain requirements that must be met under the IRC in order for the Fund to qualify as a RIC may limit the extent to which the Fund will be able to engage in swap agreements and certain derivatives.

CONSTRUCTIVE SALES. Certain rules may affect the timing and character of gain if the Fund engages in transactions that reduce or eliminate its risk of loss with respect to appreciated financial positions. If the Fund enters into certain transactions (including a short sale, an offsetting notional principal contract, a futures or forward contract, or other transactions identified in Treasury regulations) in property while holding an appreciated financial position in substantially identical property, it will be treated as if it had sold and immediately repurchased the appreciated financial position and will be taxed on any gain (but not loss) from the constructive sale. The character of gain from a constructive sale will depend upon the Fund's holding period in the appreciated financial position. Loss from a constructive sale would be recognized when the position was subsequently disposed of, and its character would depend on the Fund's holding period and the application of various loss deferral provisions of the IRC.

In addition, if the appreciated financial position is itself a short sale or other such contract, acquisition of the underlying property or substantially identical property by the Fund will be deemed a constructive sale. The foregoing will not apply, however, to the Fund's transaction during any taxable year that otherwise would be treated as a constructive sale if the transaction is closed within 30 days after the end of that year and the Fund holds the appreciated financial position unhedged for 60 days after that closing (i.e., at no time during that 60-day period is the Fund's risk of loss regarding the position reduced by reason of certain specified transactions with respect to substantially identical or related property, such as having an option to sell, being contractually obligated to sell, making a short sale or granting an option to buy substantially identical stock or securities).

WASH SALES. The Fund may be impacted in certain circumstances by special rules relating to "wash sales." In general, the wash sale rules prevent the recognition of a loss by the Fund from the disposition of stock or securities at a loss in a case in which identical or substantially identical stock or securities (or an option to acquire such property) is or has been acquired by it within 30 days before or 30 days after the sale.

SHORT SALES. The Fund may make short sales of securities. Short sales may increase the amount of short-term capital gain realized by the Fund, which is taxed as ordinary income when distributed to its shareholders. Short sales also may be subject to the "Constructive Sales" rules, discussed above.

PASSIVE FOREIGN INVESTMENT COMPANIES. The Fund may invest in a non-U.S. corporation, which could be treated as a passive foreign investment company (a "PFIC") or become a PFIC under the IRC. A PFIC is generally defined as a foreign corporation that meets either of the following tests: (1) at least 75% of its gross income for its taxable year is income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains); or (2) an average of at least 50% of its assets produce, or are held for the production of, such passive income. If the Fund acquires any equity interest in a PFIC, the Fund could be subject to federal income tax and interest charges on "excess distributions" received with respect to such PFIC stock or on any gain from the sale of such PFIC stock (collectively "PFIC income"), plus interest thereon even if the Fund distributes the PFIC income as a taxable dividend to its shareholders. The balance of the PFIC income will be included in the Fund's investment company taxable income and, accordingly, will not be taxable to it to the extent it distributes that income to its shareholders. The Fund's distributions of PFIC income, if any, will be taxable as ordinary income even though, absent the application of the PFIC rules, some portion of the distributions may have been classified as capital gain.

The Fund will not be permitted to pass through to its shareholders any credit or deduction for taxes and interest charges incurred with respect to a PFIC. Payment of this tax would therefore reduce the Fund's economic return from its investment in PFIC shares. To the extent the Fund invests in a PFIC, it may elect to treat the PFIC as a "qualified electing fund" ("QEF"), then instead of the tax and interest obligation described above on excess distributions, the Fund would be required to include in income each taxable year its pro rata share of the QEF's annual ordinary earnings and net capital gain. As a result of a QEF election, the Fund would likely have to distribute to its shareholders an amount equal to the QEF's annual ordinary earnings and net capital gain to satisfy the IRC's minimum distribution requirement described herein and avoid imposition of the Excise Tax even if the QEF did not distribute those earnings and gain to the Fund. In most instances it will be very difficult, if not impossible, to make this election because of certain requirements in making the election.

The Fund may elect to "mark-to-market" its stock in any PFIC. "Marking-to-market," in this context, means including in ordinary income each taxable year the excess, if any, of the fair market value of the PFIC stock over the Fund's adjusted basis therein as of the end of that year. Pursuant to the election, the Fund also may deduct (as an ordinary, not capital, loss) the excess, if any, of its adjusted basis in the PFIC stock over the fair market value thereof as of the taxable year-end, but only to the extent of any net mark-to-market gains with respect to that stock it included in income for prior taxable years under the election. The Fund's adjusted basis in its PFIC stock subject to the election would be adjusted to reflect the amounts of income included and deductions taken thereunder. In either case, the Fund may be required to recognize taxable income or gain without the concurrent receipt of cash.

FOREIGN CURRENCY TRANSACTIONS. Foreign currency gains and losses realized by the Fund in connection with certain transactions involving foreign currency-denominated debt instruments, certain options, futures contracts, forward contracts, and similar instruments relating to foreign currency, foreign currencies, and foreign currency-denominated payables and receivables are subject to Section 988 of the IRC, which causes such gains and losses to be treated as ordinary income or loss and may affect the amount and timing of recognition of the Fund's income. In some cases elections may be available that would alter this treatment, but such elections could be detrimental to the Fund by creating current recognition of income without the concurrent recognition of cash. If a foreign currency loss treated as an ordinary loss under Section 988 were to exceed the Fund's investment company taxable income (computed without regard to such loss) for a taxable year the resulting loss would not be deductible by it or its shareholders in future years. The foreign currency income or loss will also increase or decrease the Fund's investment company income distributable to its shareholders.

FOREIGN TAXATION. Income received by the Fund from sources within foreign countries may be subject to foreign withholding and other taxes. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If more than 50% of the Fund's total assets at the close of any taxable year consist of stock or securities of foreign corporations and it meets the distribution requirements described above, the Fund may file an election (the "pass-through election") with the IRS pursuant to which shareholders of the Fund would be required to (i) include in gross income (in addition to taxable dividends actually received) their pro rata shares of foreign income taxes paid by the Fund even though not actually received by such shareholders; and (ii) treat such respective pro rata portions as foreign income taxes paid by them. The Fund will furnish its shareholders with a written statement providing the amount of foreign taxes paid by the Fund that will "pass-through" for the year, if any.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to the Fund's shareholders. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. Shareholders may be unable to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Various limitations, including a minimum holding period requirement, apply to limit the credit and deduction for foreign taxes for purposes of regular federal tax and alternative minimum tax. In addition, a shareholder of the Fund may lose the ability to use foreign tax credits passed through by the Fund if the Fund's shares are loaned pursuant to a securities lending agreement.

REITs. The Fund may invest in REITs. Investments in REIT equity securities may require the Fund to accrue and distribute taxable income without the concurrent receipt of cash. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. The Fund's investments in REIT equity securities may at other

times result in its receipt of cash in excess of the REIT's earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to its shareholders for federal income tax purposes. Dividends received by the Fund from a REIT generally will not constitute qualified dividend income.

The Fund may invest in REITs that hold residual interests in real estate mortgage investment conduits ("REMICs") or taxable mortgage pools ("TMPs"), or such REITs may themselves constitute TMPs. Under an IRS notice, and Treasury regulations that have yet to be issued but may apply retroactively, a portion of the Fund's income from a REIT that is attributable to the REIT's residual interest in a REMIC or a TMP (referred to in the IRC as an "excess inclusion") will be subject to federal income tax in all events. This notice also provides, and the regulations are expected to provide, that excess inclusion income of a RIC, such as the Fund, will be allocated to shareholders of the RIC in proportion to the dividends received by such shareholders, with the same consequences as if the shareholders held the related REMIC residual interest or invested in the TMP directly. As a result, the Fund may not be a suitable investment for certain tax-exempt shareholders, including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan and other tax-exempt entities. See "Tax-Exempt Shareholders."

Distributions by the Fund to its shareholders that the Fund properly reports as "section 199A dividends," as defined and subject to certain conditions described below, are treated as qualified REIT dividends in the hands of non-corporate shareholders. Non-corporate shareholders are permitted a federal income tax deduction equal to 20% of qualified REIT dividends received by them, subject to certain limitations. Generally, a "section 199A dividend" is any dividend or portion thereof that is attributable to certain dividends received by a RIC from the REITs it holds, to the extent such dividends are properly reported as such by the RIC in a written notice to its shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. The Fund is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

DISTRIBUTIONS. Distributions paid out of the Fund's current and accumulated earnings and profits (as determined at the end of the year), whether reinvested in additional shares or paid in cash, are generally taxable and must be reported by each shareholder who is required to file a federal income tax return except in the case of certain tax-exempt shareholders. Distributions in excess of the Fund's current and accumulated earnings and profits, as computed for federal income tax purposes, will first be treated as a return of capital up to the amount of a shareholder's tax basis in his or her Fund shares and then as capital gain, assuming the shareholder holds his or her shares as a capital asset. A return of capital is not taxable, but reduces a shareholder's tax basis in the shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by a shareholder of the Fund's shares. Distributions are taxable whether shareholders receive them in cash or receive them in additional shares.

For federal income tax purposes, distributions of investment company taxable income are generally taxable as ordinary income, and distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income. Distributions designated by the Fund as "capital gain dividends" (distributions from the excess of net long-term capital gain over short-term capital losses) will be taxable to shareholders as long-term capital gain regardless of the length of time they have held their shares of the Fund. Such dividends do not qualify as dividends for purposes of the dividends received deduction described below.

Non-corporate shareholders of the Fund may be eligible for the long-term capital gain tax rate applicable to distributions of "qualified dividend income" received by such non-corporate shareholders. The maximum long-term capital gains tax rate is 20% for non-corporate shareholders (15% or 0% for non-corporate shareholders in lower income tax brackets). The Fund's distribution will be treated as qualified dividend income and therefore eligible for the long-term capital gains tax rate to the extent that it receives dividend income from taxable domestic corporations and certain qualified foreign corporations, provided that certain holding periods and other requirements are met. A corporate shareholder of the Fund may be eligible for the dividends received deduction with respect to the Fund's distributions attributable to dividends received by the Fund from domestic corporations, which, if received directly by the corporate shareholder, would qualify for such a deduction. For eligible corporate shareholders, the dividends received deduction may be subject to certain reductions, and a distribution by the Fund attributable to dividends of a domestic corporation will be eligible for the deduction only if certain holding period and other requirements are met.

If the Fund's shares are loaned pursuant to a securities lending agreement, dividends paid while the shares are held by the borrower may not be qualified dividend income and may not qualify for the dividends received deduction.

A 3.8% Medicare contribution tax applies to net investment income including interest (excluding, tax-exempt interest), dividends, and capital gains of U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) and of estates and trusts.

The Fund will furnish a statement to shareholders providing the federal income tax status of its dividends and distributions including the portion of such dividends, if any, that qualifies as long-term capital gain.

Different tax treatment, including penalties on certain excess contributions and deferrals, certain pre-retirement and post-retirement distributions and certain prohibited transactions, is accorded to accounts maintained as qualified retirement plans. **Shareholders are urged and advised to consult their own tax advisers for more information.**

PURCHASES OF FUND SHARES. Prior to purchasing shares in the Fund, the impact of dividends or distributions which are expected to be or have been declared, but not paid, should be carefully considered. Any dividend or distribution declared shortly after a purchase of such shares of the Fund prior to the record date will have the effect of reducing the per share net asset value by the per share amount of the dividend or distribution, and to the extent the distribution consists of the Fund's taxable income, the purchasing shareholder will be taxed on the taxable portion of the dividend or distribution received even though some or all of the amount distributed is effectively a return of capital. This is called "buying a dividend." To avoid "buying a dividend," check the Fund's distribution dates before you invest.

SALES, EXCHANGES OR REDEMPTIONS. Upon the disposition of shares of the Fund (whether by redemption, sale or exchange), a shareholder may realize a capital gain or loss. Such capital gain or loss will be long-term or short-term depending upon the shareholder's holding period for the shares. The capital gain will be long-term if the shares were held for more than 12 months and short-term if held for 12 months or less. If a shareholder sells or exchanges shares of the Fund within 90 days of having acquired such shares and if, before January 31 of the calendar year following the calendar year of the sale or exchange, as a result of having initially acquired those shares, the shareholder subsequently pays a reduced sales charge on a new purchase of shares of the Fund, the sales charge previously incurred in acquiring the Fund's shares generally shall not be taken into account (to the extent the previous sales charges do not exceed the reduction in sales charges on the new purchase) for the purpose of determining the amount of gain or loss on the disposition, but generally will be treated as having been incurred in the new purchase. Any loss realized on a disposition will be disallowed under the "wash sale" rules to the extent that the shares disposed of by the shareholder are replaced by the shareholder within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of capital gain dividends received by the shareholder and disallowed to the extent of any distributions of tax-exempt interest dividends received by the shareholder with respect to such shares. Capital losses are generally deductible only against capital gains except that individuals may deduct up to \$3,000 of capital losses against ordinary income.

The 3.8% Medicare contribution tax (applied as described above) will apply to gains from the sale or exchange of shares of the Fund.

BACKUP WITHHOLDING. The Fund generally is required to withhold, and remit to the U.S. Treasury, subject to certain exemptions, an amount equal to 24% of all distributions and redemption proceeds paid or credited to a shareholder of the Fund if (i) the shareholder fails to furnish the Fund with the correct taxpayer identification number ("TIN") certified under penalties of perjury, (ii) the shareholder fails to provide a certified statement that the shareholder is not subject to "backup withholding," or (iii) the IRS or a broker has notified the Fund that the number furnished by the shareholder is incorrect or that the shareholder is subject to backup withholding as a result of failure to report interest or dividend income. If the backup withholding provisions are applicable, any such distributions or proceeds, whether taken in cash or reinvested in shares, will be reduced by the amounts required to be withheld. Backup withholding is not an additional tax. Any amounts withheld may be credited against a shareholder's U.S. federal income tax liability.

STATE AND LOCAL TAXES. State and local laws often differ from federal income tax laws with respect to the treatment of specific items of income, gain, loss, deduction and credit. This summary discussion does not address the state and local income taxes applicable to a shareholder.

Shareholders are urged and advised to consult their own tax advisers as to the state and local tax rules affecting investments in the Fund.

NON-U.S. SHAREHOLDERS. Distributions made to non-U.S. shareholders attributable to net investment income generally are subject to U.S. federal income tax withholding at a 30% rate (or such lower rate provided under an applicable income tax treaty). Notwithstanding the foregoing, if a distribution described above is effectively connected with the conduct of a trade or business carried on by a non-U.S. shareholder within the United States (or, if an income tax treaty applies, is attributable to a permanent establishment in the United States), federal income tax withholding and exemptions attributable to foreign persons will not apply. Instead, the distribution will be subject to withholding at the highest applicable U.S. tax rate (currently 37% in the case of individuals and 21% in the case of corporations) and the non-U.S. shareholders will be subject to the federal income tax reporting requirements generally applicable to U.S. persons described above.

Under U.S. federal tax law, a non-U.S. shareholder is not, in general, subject to federal income tax or withholding tax on capital gains (and is not allowed a deduction for losses) realized on the sale of shares of the Fund, or on capital gains dividends, provided that the Fund obtains a properly completed and signed certificate of foreign status, unless (i) such gains or distributions are effectively connected with the conduct of a trade or business carried on by the non-U.S. shareholder within the United States (or, if an income tax treaty applies, are attributable to a permanent establishment in the United States of the non-U.S. shareholder); (ii) in the case of an individual non-U.S. shareholder, the shareholder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale and certain other conditions are met; or (iii) the shares of the Fund constitute U.S. real property interests (“USRPIs”), as described below.

Under current law, if the Fund is considered to be a “United States Real Property Holding Corporation” (as defined in the IRC and Treasury Regulations), then the distributions attributable to certain underlying REIT investments and redemption proceeds paid to a non-U.S. shareholder that owns at least 5% of the Fund, generally will cause the non-U.S. shareholder to treat such gain or distribution as income effectively connected with a trade or business in the United States, subject such gain or distribution to withholding tax, and cause the non-U.S. shareholder to be required to file a federal income tax return. In addition, in any year where at least 50% of the Fund’s assets are USRPIs (as defined in the IRC and Treasury Regulations), distributions of the Fund that are attributable to gains from the sale or exchange of shares in USRPIs may be subject to U.S. withholding tax (regardless of such shareholder’s percentage interest in the Fund) and may require the non-U.S. shareholder to file a U.S. federal income tax return in order to receive a refund (if any) of the withheld amount.

Subject to the additional rules described herein, federal income tax withholding will apply to distributions attributable to dividends and other investment income distributed by the Fund. The federal income tax withholding rate may be reduced (and, in some cases, eliminated) under an applicable tax treaty between the United States and the non-U.S. shareholder’s country of residence or incorporation. In order to qualify for treaty benefits, a non-U.S. shareholder must comply with applicable certification requirements relating to its foreign status (generally by providing the Fund with a properly completed Form W-8BEN). **All non-U.S. shareholders are urged and advised to consult their own tax advisers as to the tax consequences of an investment in the Fund.**

Pursuant to the Foreign Account Tax Compliance Act (“FATCA”), a 30% withholding tax generally is imposed on payments of interest and dividends to (i) foreign financial institutions including non-U.S. investment funds and (ii) certain other foreign entities, unless the foreign financial institution or foreign entity provides the withholding agent with documentation sufficient to show that it is compliant with FATCA (generally by providing the Fund with a properly completed Form W-8BEN or Form W-8BEN-E, as applicable). If the payment is subject to the 30% withholding tax under FATCA, a non-U.S. shareholder will not be subject to the 30% withholding tax described above on the same income. Under proposed regulations, FATCA withholding on the gross proceeds of share redemptions and certain capital gain distributions, scheduled to take effect beginning January 1, 2019, has been eliminated. Such proposed regulations are subject to change.

Shareholders are urged and advised to consult their own tax advisers regarding the application of this reporting and withholding regime to their own tax situation.

Shareholders are urged and advised to consult their own tax advisers as to the tax consequences of an investment in the Fund.

FOREIGN BANK AND FINANCIAL ACCOUNTS AND FOREIGN FINANCIAL ASSETS REPORTING REQUIREMENTS. A shareholder that owns directly or indirectly more than 50% by vote or value of the Fund, is urged and advised to consult its own tax adviser regarding its filing obligations with respect to IRS Form FinCEN 114, Report of Foreign Bank and Financial Accounts.

Also, under enacted rules, subject to exceptions, individuals (and, to the extent provided in forthcoming future U.S. Treasury regulations, certain domestic entities) must report annually their interests in “specified foreign financial assets” on their U.S. federal income tax returns. It is currently unclear whether and under what circumstances shareholders would be required to report their indirect interests in the Fund’s “specified foreign financial assets” (if any) under these new rules.

Shareholders may be subject to substantial penalties for failure to comply with these reporting requirements. **Shareholders are urged and advised to consult their own tax advisers to determine whether these reporting requirements are applicable to them.**

TAX-EXEMPT SHAREHOLDERS. A tax-exempt shareholder could realize unrelated business taxable income (“UBTI”) by virtue of its investment in the Fund as a result of the Fund’s investments and if shares in the Fund constitute debt financed property in the hands of the tax-exempt shareholder within the meaning of IRC Section 514(b).

It is possible that a tax-exempt shareholder of the Fund will also recognize UBTI if the Fund recognizes “excess inclusion income” (as described above) derived from direct or indirect investments in REMIC residual interests or TMPs. Furthermore, any investment in a residual interest of a CMO that has elected to be treated as a REMIC can create complex tax consequences, especially if the Fund has state or local governments or other tax-exempt organizations as shareholders.

In addition, special tax consequences apply to charitable remainder trusts (“CRTs”) that invest in RICs that invest directly or indirectly in residual interests in REMICs or in TMPs.

Tax-exempt shareholders are urged and advised to consult their own tax advisers as to the tax consequences of an investment in the Fund.

TAX SHELTER REPORTING REGULATIONS. Under Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper.

Shareholders are urged and advised to consult their own tax advisers to determine the applicability of these regulations in light of their individual circumstances.

TAX BASIS INFORMATION. For shares of the Fund that are redeemed, your financial intermediary or the Fund (if a shareholder holds the shares in the Fund direct account) will report gains and losses realized on redemptions of shares for shareholders who are individuals and S corporations purchased after January 1, 2012 to the Internal Revenue Service (IRS). This information will also be reported to a shareholder on Form 1099-B and the IRS each year. In calculating the gain or loss on redemptions of shares, the average cost method will be used to determine the cost basis of the Fund’s shares purchased after January 1, 2012 unless the shareholder instructs the Fund in writing that the shareholder wants to use another available method for cost basis reporting (for example, First In, First Out (FIFO), Last In, First Out (LIFO), Specific Lot Identification (SLID) or High Cost, First Out (HCFO)). If the shareholder designated SLID as the shareholder’s tax cost basis method, the shareholder will also need to designate a secondary cost basis method (Secondary Method). If a Secondary Method is not provided, the Fund will designate FIFO as the Secondary Method and will use the Secondary Method with respect to systematic withdrawals that are made.

A shareholder's financial intermediary or the Fund (if a shareholder holds the shares in the Fund direct account) is also required to report gains and losses to the IRS in connection with redemptions of shares by S corporations purchased after January 1, 2012. If a shareholder is a corporation and has not instructed the Fund that it is a C corporation in its Account Application or by written instruction, the Fund will treat the shareholder as an S corporation and file a Form 1099-B.

Shareholders are urged and advised to consult their own tax advisers with respect to the tax consequences of an investment in the Fund including, but not limited to, the applicability of state, local, foreign and other tax laws affecting the particular shareholder and to possible effects of changes in federal or other tax laws.

This summary is provided for general information only and should not be considered tax advice or relied on by an investor.

FINANCIAL STATEMENTS

As of the date of this SAI, the Polen Euro High Yield Bond ETF has not yet commenced operations and no financial statements are available. Once produced, you can obtain a copy of the Fund's financial statements by reviewing the Fund's Financials and Additional Information. Copies of the Fund's Annual or Semi-Annual Financials and Additional Information may be obtained without charge, upon request, by writing to the Trust at 500 Ross Street, 154-0520, Pittsburgh, PA 15262, by calling Shareholder Services at (888) 426-7515 or on the Fund's website at <https://www.polencapital.com/strategies/european-high-yield-etf>.

APPENDIX A

DESCRIPTION OF RATINGS

Description of Ratings

The following descriptions of securities ratings have been published by Moody's Investors Services, Inc. ("Moody's"), Standard & Poor's Financial Services LLC ("S&P Global Ratings"), and Fitch Ratings, Inc. ("Fitch"), respectively.

Description of Moody's Global Ratings

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of eleven months or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. Short-term ratings are assigned for obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Description of Moody's Global Long-Term Ratings

Aaa Obligations rated Aaa are judged to be of the highest quality, with minimal risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are considered upper medium-grade and are subject to low credit risk.

Baa Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Obligations rated C are the lowest-rated class of bonds and are typically in default, with little prospect for recovery of principal and interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Hybrid Indicator (hyb)

The hybrid indicator (hyb) is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Description of Moody's Global Short-Term Ratings

P-1 Ratings of Prime-1 reflect a superior ability to repay short-term obligations.

P-2 Ratings of Prime-2 reflect a strong ability to repay short-term obligations.

P-3 Ratings of Prime-3 reflect an acceptable ability to repay short-term obligations.

NP Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Description of Moody's U.S. Municipal Short-Term Obligation Ratings

The Municipal Investment Grade ("MIG") scale is used to rate U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less.

Moody's U.S. municipal short-term obligation ratings are as follows:

MIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Description of Moody's Demand Obligation Ratings

For variable rate demand obligations ("VRDOs"), Moody's assigns both a long-term rating and a short-term payment obligation rating. The long-term rating addresses the issuer's ability to meet scheduled principal and interest payments. The short-term payment obligation rating addresses the ability of the issuer or the liquidity provider to meet any purchase price payment obligation resulting from optional tenders ("on demand") and/or mandatory tenders of the VRDO. The short-term payment obligation rating uses the VMIG scale. Transitions of VMIG ratings with conditional liquidity support differ from transitions of Prime ratings reflecting the risk that external liquidity support will terminate if the issuer's long-term rating drops below investment grade. Please see their methodology that discusses obligations with conditional liquidity support.

For VRDOs, they typically assign a VMIG rating if the frequency of the payment obligation is less than every three years. If the frequency of the payment obligation is less than three years, but the obligation is payable only with remarketing proceeds, the VMIG short-term rating is not assigned, and it is denoted as "NR".

Moody's demand obligation ratings are as follows:

VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.

VMIG 2 This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.

VMIG 3 This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.

SG This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural or legal protections.

Description of S&P Global Ratings' Issue Credit Ratings

An S&P Global Ratings issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings' view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term issue credit ratings are generally assigned to those obligations considered short-term in the relevant market, typically with an original maturity of no more than 365 days. Short-term issue credit ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. S&P Global Ratings would typically assign a long-term issue credit rating to an obligation with an original maturity of greater than 365 days. However, the ratings S&P Global Ratings assigns to certain instruments may diverge from these guidelines based on market practices. Medium-term notes are assigned long-term ratings.

Issue credit ratings are based, in varying degrees, on S&P Global Ratings' analysis of the following considerations:

- The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitments on an obligation in accordance with the terms of the obligation;
- The nature and provisions of the financial obligation, and the promise S&P Global Ratings imputes; and
- The protection afforded by, and relative position of, the financial obligation in the event of a bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

An issue rating is an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

NR indicates that a rating has not been assigned or is no longer assigned.

Description of S&P Global Ratings' Long-Term Issue Credit Ratings*

AAA An obligation rated 'AAA' has the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

BB; B; CCC; CC; and C Obligations rated ‘BB’, ‘B’, ‘CCC’, ‘CC’, and ‘C’ are regarded as having significant speculative characteristics. ‘BB’ indicates the least degree of speculation and ‘C’ the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

BB An obligation rated ‘BB’ is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

B An obligation rated ‘B’ is more vulnerable to nonpayment than obligations rated ‘BB’, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

CCC An obligation rated ‘CCC’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

CC An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

C An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

* Ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

D An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to ‘D’ if it is subject to a distressed debt restructuring.

Description of S&P Global Ratings’ Short-Term Issue Credit Ratings

A-1 A short-term obligation rated ‘A-1’ is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitments on these obligations is extremely strong.

A-2 A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

A-3 A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

B A short-term obligation rated ‘B’ is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

C A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

D A short-term obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to ‘D’ if it is subject to a distressed debt restructuring.

Description of S&P Global Ratings’ Municipal Short-Term Note Ratings

An S&P Global Ratings U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

S&P Global Ratings’ municipal short-term note ratings are as follows:

SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

D ‘D’ is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Description of Fitch’s Credit Ratings

Fitch’s credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issue level ratings are assigned and often include an expectation of recovery and may be notched above or below the issuer level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation’s documentation).

Fitch’s credit rating scale for issuers and issues is expressed using the categories ‘AAA’ to ‘BBB’ (investment grade) and ‘BB’ to ‘D’ (speculative grade) with an additional +/- for AA through CCC levels indicating relative differences of probability of default or recovery for issues. The terms “investment grade” and “speculative grade” are market conventions and do not imply any recommendation or endorsement of a specific security for investment purposes. Investment grade categories indicate relatively low to moderate credit risk, while ratings in the speculative categories signal either a higher level of credit risk or that a default has already occurred.

Fitch may also disclose issues relating to a rated issuer that are not and have not been rated. Such issues are also denoted as ‘NR’ on its web page.

Fitch's credit ratings do not directly address any risk other than credit risk. Credit ratings do not deal with the risk of market value loss due to changes in interest rates, liquidity and/or other market considerations. However, market risk may be considered to the extent that it influences the ability of an issuer to pay or refinance a financial commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the obligation to pay upon a commitment (for example, in the case of payments linked to performance of an equity index).

Note: The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' ratings and ratings below the 'CCC' category. For the short-term rating category of 'F1', a '+' may be appended.

Description of Fitch's Long-Term Corporate Finance Obligations Ratings

AAA Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

BB Speculative. 'BB' ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists that supports the servicing of financial commitments.

B Highly speculative. 'B' ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

CCC Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present, and default is a real possibility.

CC Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk and default of some kind appears probable.

C Near Default. 'C' ratings indicate exceptionally high levels of credit risk. A default or default-like process has begun, or for a closed funding vehicle, payment capacity is irrevocably impaired.

Ratings in the categories of 'CCC', 'CC' and 'C' can also relate to obligations or issuers that are in default. In this case, the rating does not opine on default risk but reflects the recovery expectation only.

Corporate Finance defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'CCC' to 'C' rating categories, depending on their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Description of Fitch's Short-Term Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as "short term" based on market convention. A long-term rating can also be used to rate an issue with short maturity. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

Fitch's short-term ratings are as follows:

F1 Highest short-term credit quality. Indicates the strongest capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Under the agency's National Rating scale, this rating is assigned to the lowest default risk relative to others in the same country or monetary union. Where the liquidity profile is particularly strong, a "+" is added to the assigned rating.

F2 Good short-term credit quality. Indicates a good capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union. However, the margin of safety is not as great as in the case of the higher ratings.

F3 Fair short-term credit quality. Indicates an adequate capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union.

B Speculative short-term credit quality. Indicates an uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union.

C High short-term default risk. Indicates a highly uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country or monetary union.

RD Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

D Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Date: January 21, 2025

APPENDIX B

POLEN CAPITAL CREDIT, LLC

SUMMARY OF PROXY VOTING POLICIES AND PROCEDURES

In accordance with Rule 206(4)-6 promulgated by the Securities and Exchange Commission under the Investment Advisers Act of 1940, as amended, Polen Capital Credit, LLC (the “Adviser” or “Polen Credit”) has adopted and implemented certain Proxy Voting Policies and Procedures (the “Policies”) that the Adviser believes are reasonably designed to ensure that proxies are voted in the best interests of its clients, including the Fund. Accordingly, the Adviser votes proxies based on its judgment as to what voting decision is most likely to maximize total return to the client as an investor in the issuer whose securities are being voted, including, where applicable, returns to the client on positions held in non-voting securities of that issuer or securities of other issuers that may be materially affected by the outcome of the vote. Furthermore, the Policies are intended to support good corporate governance, including those corporate practices that address environmental and social issues, in all cases with the objective of protecting shareholder interests and maximizing shareholder value.

Polen Credit believes that it is not appropriate, in most cases, to vote proxies with respect to the securities of such issuers in accordance with fixed, predetermined guidelines. Accordingly, Polen Credit generally reviews and makes a voting decision on each matter presented in such proxy on an individual, case-by-case basis.

The Adviser has designated an internal proxy administrator who is responsible for coordinating the review and voting of client proxies. In the absence of a material conflict of interest, the internal proxy administrator votes the proxy in accordance with the instructions provided by the applicable investment professional covering the particular issuer.

From time to time, the Adviser (and/or its affiliates) may have a material conflict of interest with respect to a matter to be voted upon in a proxy. If the internal proxy administrator identifies or is notified of a potential material conflict of interest, the internal proxy administrator will notify the Adviser’s chief compliance officer. If the chief compliance officer agrees that a material conflict of interest exists, the Adviser generally will request a waiver of the conflict of interest or otherwise seek to obtain voting instructions from the affected client(s) or an authorized representative of the client(s) (or, in limited circumstances, an appropriate independent third party). In the event that the client(s), client representative(s), or other third party, as the case may be, do not desire to direct the vote of the proxy matter in question, the Adviser may, as circumstances warrant, take other steps, such as consulting with its outside legal counsel or an independent third party service, which steps are designed to result in a decision that is demonstrably based on the client’s best interests and not the product of the conflict.

The Adviser maintains records of proxies that it has voted on behalf of its clients. The Adviser maintains these proxy voting books and records for a period of not less than five years.
