What Are the Risks and What Could I Get in Return?

Risk Indicator

Low Risk

High Risk

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product which are not taken into account in the summary risk indicator are: **operational risk, counterparty risk and securities risk.**

This Sub-Fund integrates ESG criteria into its investment process and, in addition, aims to achieve a portfolio ESG score above the ESG score of its benchmark, or investment universe (where there is no benchmark). For full details please refer to the Pre-Contractual Annex available on the Global Distributor [website](#), the Polen Sustainable Investment [Policy](#) and the Polen Capital ESG Policy [Statement](#). **The decision of the investor to invest in the promoted fund should consider all the characteristics or objectives of the fund.**

An investment in the Fund concerns the acquisition of shares in the Fund and not in any underlying asset of the Fund. As a result, shares held in the Fund do not confer any interest or share in any particular part of the assets of the Fund. The value of the investment in the Fund can reduce as well as increase and, therefore, the return on the investment in the Fund will be variable. Income may fluctuate in accordance with market conditions and taxation arrangements.

What Are The Costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed
In the first year you would get back the amount that you invested (0 % annual return)
For the other holding periods we have assumed the product performs as shown in the moderate scenario
USD 10,000 is invested

What are the performance scenarios?

For more information of the different performance scenarios of the sub-fund in unfavourable, moderate, and favourable scenarios over the last 5 years, please refer to the [PRIIPs KID](#).

Please see our Global [website](#) for more information.

Costs Over Time	If you exit after 1 year	If you exit after 5 years
Total costs	USD 135	USD 860
Annual cost impact(*)	1.35%	1.41%

(*)This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5.76% before costs and 4.35% after costs. **There are no Entry/Exist costs or Performance fees for this fund. Recommended Holding Period: 5 years**

Composition Costs	One-off costs upon entry or exit
Management, administrative or operational costs	1.20% of the value of your investment per year. This is an estimate based on actual costs over the last year
Transaction costs	0.13% of the value of your investment per year. (This is an estimate. The actual amount will vary depending on how much we buy and sell)

Minimum investment: U.S.\$250,000 for institutional shares, U.S.\$1,000 for investor shares (or foreign currency equivalent). ²KID Ongoing Charge is as of December 31, 2022 and may be higher or lower and where applicable, the KID Ongoing Charge is equal to the Max Ongoing Charge because such share class has not yet launched. ³USD A shares carry an entry charge of up to 5%. All other shares have no entry charge. The ongoing charge cap excludes all portfolio transaction charges. Performance for the various share classes will be more or less depending on differences in fees and ongoing charges. Fees, charges and costs may increase or decrease as a result of currency exchange rate fluctuations.

The difference at any one time between the sale and repurchase price of share in the Fund means that the investment should be viewed as medium term to long term. Entry fees charged will lower returns. The ongoing charges figures shown here are based on expenses for the year ending 31 December 2022. This figure may vary from year to year and the Fund's annual report for each financial year will include details on the exact charges made. It excludes all portfolio transaction charges and performance fees. Please consult the prospectus for a comprehensive explanation of all fees.

The Morningstar Sustainability Rating™ is intended to measure how well the issuing companies of the securities within a fund's portfolio holdings are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers. The Morningstar Sustainability Rating calculation is a five-step process. First, each fund with at least 67% of assets covered by a company-level ESG Risk Score from Sustainalytics receives a Morningstar Portfolio Sustainability Score. The Morningstar Portfolio Sustainability Score is an asset-weighted average of company-level ESG Risk Scores. The Portfolio Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk. Second, the Historical Sustainability Score is an exponential weighted moving average of the Portfolio Sustainability Scores over the past 12 months. The process rescales the current Portfolio Sustainability Score to reflect the consistency of the scores. The Historical Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk, on a consistent historical basis. Third, the Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Global Categories in which at least thirty (30) funds receive a Historical Sustainability Score and is determined by each fund's Morningstar Sustainability Rating Score rank within the following distribution: • High (highest 10%) • Above Average (next 22.5%) • Average (next 35%) • Below Average (next 22.5%) and • Low (lowest 10%). Fourth, we apply a 1% rating buffer from the previous month to increase rating stability. This means a fund must move 1% beyond the rating breakpoint to change ratings. Fifth, we adjust

downward positive Sustainability Ratings to funds with a with high ESG Risk scores. The logic is as follows: • If Portfolio Sustainability score is above 40, then the fund receives a Low Sustainability Rating • If Portfolio Sustainability score is above 35 and preliminary rating is Average or better, then the fund is downgraded to Below Average • If Portfolio Sustainability score is above 30 and preliminary rating is Above Average, then the fund is downgraded to Average • If Portfolio Sustainability score is below 30, then no adjustment is made. The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe.

Since a Sustainability Rating is assigned to all funds that meet the above criteria, the rating it is not limited to funds with explicit sustainable or responsible investment mandates. Morningstar updates its Sustainability Ratings monthly. The Portfolio Sustainability Score is calculated when Morningstar receives a new portfolio. Then, the Historical Sustainability Score and the Sustainability Rating is calculated one month and six business days after the reported as-of date of the most recent portfolio. As part of the evaluation process, Morningstar uses Sustainalytics' ESG scores from the same month as the portfolio as-of date.

Risk Considerations: Risk factors you should consider before investing: The value of investments and any income will fluctuate and investors may not get back the full amount invested. Where the Fund's Investment Manager has expressed views and opinions in this fact sheet, these may change. The Fund's investments are concentrated in the U.S. This means the Fund may become more susceptible to fluctuations in value resulting from adverse economic or business conditions in the U.S., including legal, regulatory, and taxation changes. All performance data on this fact sheet are in USD currency. Changes in exchange rates may have an adverse effect on the value, price, or income of the product. Whilst the Company aims to ensure the accuracy of the data contained in the factsheet, it is provided for information purposes only. It should not be relied on as the basis for making an investment decision.

Operational risk: management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.

Counterparty risk: a counterparty may fail to deliver the proceeds related to the sale of securities by the Fund or in safekeeping of the securities purchased by the Fund.

Securities risk: some of the markets or exchanges on which the Fund may invest may go up and down, and the value of your investment may not increase.

Emerging Markets risk: countries where investment markets are considered to be less developed. Investments are generally riskier than those in developed markets because they: may not be as well regulated and laws may be less sophisticated, may be more difficult to buy and sell, may have less reliable arrangements for the safekeeping of investments, or may be more exposed to political and taxation uncertainties. The value of the Fund can go up and down more often and by larger amounts than funds that invest in developed countries, especially in the short term.

Investors should consider the investment objectives, risks and expenses of any investment carefully before investing as described in the Company's Prospectus
