*Partial year, inception 03-31-1998

Polen Capital Credit, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Polen Capital Credit, LLC has been independently verified for the periods March 1, 1996 to December 31, 2021.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Polen Credit U.S. Opportunistic High Yield Composite has had a performance examination for the periods January 1, 2005 to December 31, 2021. The verification and performance examination reports are available upon request.

U.S. Opportunistic High Yield Disclosures

Polen Capital Credit, LLC ("the Firm", "Polen Credit") is an investment adviser, registered with the Securities and Exchange Commission, which specializes in high yield securities and special situations investing.

Polen Credit was formerly known as DDJ Capital Management, LLC. On January 31, 2022, Polen Credit was acquired by Polen Capital Management, LLC. Polen Credit's investment team and investment process were not affected by these changes.

The Polen Credit U.S. Opportunistic High Yield Composite ("the Composite") was created in August 2007. The U.S. Opportunistic High Yield strategy seeks to generate capital appreciation and income by investing in high yield securities or higher rated securities that offer yields similar to those available in the high yield market. The strategy focuses on investments in high yield bonds and has a bias toward lower tier securities. Opportunistic High Yield portfolios not denominated in U.S. dollars, where currency hedging is a significant component of the strategy, are excluded from the Composite. Derivatives may be used for hedging purposes only; however, certain credit derivatives may be used in limited circumstances subject to client guidelines. Portfolios within the Composite will be permitted to invest in lower-rated debt securities, equity securities, bank debt, small issues and direct private investments, but allocations to these security types will vary. Portfolios within the Composite will generally invest at least 25% of assets in bank loans, hold no fewer than 50 issuers and will invest in illiquid securities. In January 2021, a lower limit on issuers held was added.

Gross returns do not reflect the deduction of investment management fees, but are net of trading expenses, deal-related legal expenses and foreign withholding tax. Net returns reflect the application of actual management and, if applicable, performance-based fees to gross returns. Composite dispersion is the equal-weighted standard deviation of annual gross returns of all accounts included in the Composite for the entire year. Composite dispersion is not applicable for composites which contain five accounts or fewer for the entire year. The three-year annualized standard deviation measures the variability of the Composite gross returns, and the benchmark returns over the preceding 36-month period. A list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds as well as policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

At 12/31/2022, 16% of Composite assets were valued using subjective, unobservable inputs.

The custom benchmark, the ICE BofA U.S. Non-Financial High Yield Index, is used for comparative purposes only. Like the investments of the benchmark, the Composite consists primarily of bonds and notes rated BB or lower. However, the benchmark is an unmanaged index and does not include any bank loans, private (non-144A) obligations, convertible bonds, preferred and common equity, and certain other securities and obligations, and excludes financials. Investments made by Polen Credit on behalf of the portfolios managed according to the Composite strategy may differ from those of the benchmark and may not have the same investment strategy. Accordingly, investment results for the Composite will differ from those of the benchmark. For periods prior to January 1, 2013, the Composite is measured against the ICE BofA U.S. High Yield Index.

The standard fee schedule is as follows (per annum):

Separate Account (Management Fee)		Collective Investment Trust (All-In Fee)**	
First \$100 million	55 bps	All Assets	60 bps
Next \$100 million	50 bps		
Above \$200 million	45 bps		
Private Fund (All-In Fee)**			
Founders Share Class***	45 bps		
Operating Share Class	55 bps		

** The All-in Fee, which is also the total expense ratio for both the collective investment trust and the private fund, includes all administrative and operational expenses of each fund, as well as the management fee paid to Polen Credit.

*** The Founders Share Class is honored until the applicable fund reaches \$250 million in assets.

As of December 31, 2022, 0.10% of the Composite comprises one non-fee-paying portfolio, which is the private fund. Net-of-fees returns for such non-fee-paying portfolio has been calculated by accruing the model fee of 0.55%.

Performance-based fee schedules are available for separate accounts. Management and performance-based fees may vary according to the specific mandate of the account, investment performance, and assets under management.
