What Are the Risks and What Could I Get in Return?

The risk indicator assumes you keep the product for five years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product which are not taken into account in the summary risk indicator are: **operational risk, counterparty risk and securities risk.**

This Sub-Fund integrates ESG criteria into its investment process and, in addition, aims to achieve a portfolio ESG score above the ESG score of its benchmark, or investment universe (where there is no benchmark). For full details please refer to the Pre-Contractual Annex available on the Global Distributor [website](#), the Polen Sustainable Investment [Policy](#) and the Polen Capital ESG Policy [Statement](#). **The decision of the investor to invest in the promoted fund should consider all the characteristics or objectives of the fund.**

An investment in the Fund concerns the acquisition of shares in the Fund and not in any underlying asset of the Fund. As a result, shares held in the Fund do not confer any interest or share in any particular part of the assets of the Fund. The value of the investment in the Fund can reduce as well as increase and, therefore, the return on the investment in the Fund will be variable. Income may fluctuate in accordance with market conditions and taxation arrangements.

*In an effort to avoid distorting aggregate portfolio characteristics, the weighted average portfolio calculations exclude an individual financial ratio that has a negative denominator or an outlier value (e.g., greater than 100x or 100%, less than 0%) which we view as not representative of the ongoing underlying economics of the business, likely due to transitory issues or GAAP accounting limitations. Additional information is available upon request.

For the avoidance of doubt the portfolio characteristics are based on the underlying assets of the Fund. This information along with all other information in the fact sheet is not intended to be construed or understood in any way to equate to the expected or projected future performance/returns of the Fund. The Investment Manager may at any time determine to divest from some or all of the holdings in the Fund and invest in other assets. The information contained in this fact sheet is not a guarantee or indication of the future performance/returns of the Fund. As a result, there is a risk of an investor losing all or part of their investment in the Fund.

Language used in the Portfolio Statistics and Characteristics sections are defined in the Disclosures under the section "Definitions". **Neither past experience nor the current situation are necessarily accurate guides to future growth in value or rate of return.** All data as of 30-04-2023 unless otherwise noted. *Since launch.

What Are The Costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

In the first year you would get back the amount that you invested (0 % annual return)

For the other holding periods we have assumed the product performs as shown in the moderate scenario
USD 10,000 is invested

What are the performance scenarios?

For more information of the different performance scenarios of the sub-fund in unfavourable, moderate, and favourable scenarios over the last 5 years, please refer to the [PRIIPs KID](#).

Please see our Global [website](#) for more information.

Costs Over Time	If you exit after 1 year	If you exit after 5 years
Total costs	USD 120	USD 783
Annual cost impact(*)	1.20%	1.26%

- (*)This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 17.91% before costs and 16.96% after costs. **There are no Entry/Exist costs or Performance fees for this fund. Recommended Holding Period: 5 years**

Composition Costs	One-off costs upon entry or exit
Management, administrative or operational costs	1.05% of the value of your investment per year. This is an estimate based on actual costs over the last year
Transaction costs	0.14% of the value of your investment per year. (This is an estimate. The actual amount will vary depending on how much we buy and sell)

Active Share: Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Weighted Average Market Cap:** a weighted average of the price of each security multiplied by the number of shares outstanding all the securities in the portfolio. **Estimated 3-5 Year EPS Growth:** an estimate of projected long-term earnings growth rates of the underlying assets of the Fund. **Net Debt/FCF ex lease:** measure of a company's ability to pay its obligations with free cash flow excluding leases. **P/E Forward:** denotes the weighted harmonic average of all the P/E's of the securities in the fund's portfolio. **Return on Total Capital/Total Debt:** a return on investment ratio that quantifies how much return a company has generated through the use of its capital structure in relation to its total debt. **Annual Turnover:** percentage of the portfolio's holdings that have been replaced in a given year. **Alpha:** is the excess return of an investment relative to the return of the benchmark. **Beta:** the measure of systemic risk of a portfolio in comparison to the market as a whole. **Sharpe Ratio:** a ratio of the return on an investment relative to its risk. **Information Ratio:** a measurement of portfolio returns relative to a given benchmark. **Upside Capture:** is a statistical measure of overall performance relative to a benchmark during rising markets. **Downside Capture:** is a statistical measure of overall performance relative to a benchmark during declining markets. **Standard Deviation:** measurement of the dispersion or volatility of investment returns relative to its mean or average.

The MSCI ACWI ex USA Index is a market capitalization weighted equity index that measures the performance of large and mid-cap segments across developed and emerging market countries (excluding the U.S.). The index is maintained by Morgan Stanley Capital International. It is impossible to invest directly in an index. The performance of an index does not reflect any transaction costs, management fees, or taxes.

Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are: 100% three year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar Rating is for the share class specified only; ratings for the other share classes will vary.

The Morningstar Sustainability Rating™ is intended to measure how well the issuing companies of the securities within a fund's portfolio holdings are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers. The Morningstar Sustainability Rating calculation is a five-step process. First, each fund with at least 67% of assets covered by a company-level ESG Risk Score from Sustainalytics receives a Morningstar Portfolio Sustainability Score. The Morningstar Portfolio sustainability Score is an asset-weighted average of

company-level ESG Risk Scores. The Portfolio Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk. Second, the Historical Sustainability Score is an exponential weighted moving average of the Portfolio Sustainability Scores over the past 12 months. The process rescales the current Portfolio Sustainability Score to reflect the consistency of the scores. The Historical Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk, on a consistent historical basis. Third, the Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Global Categories in which at least thirty (30) funds receive a Historical Sustainability Score and is determined by each fund's Morningstar Sustainability Rating Score rank within the following distribution: • High (highest 10%) • Above Average (next 22.5%) • Average (next 35%) • Below Average (next 22.5%) and • Low (lowest 10%). Fourth, we apply a 1% rating buffer from the previous month to increase rating stability. This means a fund must move 1% beyond the rating breakpoint to change ratings. Fifth, we adjust downward positive Sustainability Ratings to funds with a high ESG Risk scores. The logic is as follows: • If Portfolio Sustainability score is above 40, then the fund receives a Low Sustainability Rating • If Portfolio Sustainability score is above 35 and preliminary rating is Average or better, then the fund is downgraded to Below Average • If Portfolio Sustainability score is above 30 and preliminary rating is Above Average, then the fund is downgraded to Average • If Portfolio Sustainability score is below 30, then no adjustment is made. The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe.

Since a Sustainability Rating is assigned to all funds that meet the above criteria, the rating it is not limited to funds with explicit sustainable or responsible investment mandates. Morningstar updates its Sustainability Ratings monthly. The Portfolio Sustainability Score is calculated when Morningstar receives a new portfolio. Then, the Historical Sustainability Score and the Sustainability Rating is calculated one month and six business days after the reported as-of date of the most recent portfolio. As part of the evaluation process, Morningstar uses Sustainalytics' ESG scores from the same month as the portfolio as-of date. Please [click on here](#) for more detailed information about the Morningstar Sustainability Rating methodology and calculation frequency.
